Chapter 2

Recording Business Transactions

Review Questions

1. The three categories of the accounting equation are assets, liabilities, and equity. Assets include Cash, Accounts Receivable, Notes Receivable, Prepaid Expenses, Land, Building, Equipment, Furniture, and Fixtures. Liabilities include Accounts Payable, Notes Payable, Accrued Liability, and Unearned Revenue. Equity includes Owner, Capital, Owner, Withdrawals, Revenue, and Expenses.
2. Companies need a way to organize their accounts so they use a chart of accounts. Accounts starting with 1 are usually Assets, 2 – Liabilities, 3 – Equity, 4 – Revenues, and 5 – Expenses. The second and third digits in account numbers indicate where the account fits within the category.
3. A chart of accounts and a ledger are similar in that they both list the account names and account numbers of the business. A ledger, though, provides more detail. It includes the increases and decreases of each account for a specific period and the balance of each account at a specific point in time.
4. With a double-entry you need to record the dual effects of each transaction. Every transaction affects at least two accounts.
5. A T-account is a shortened form of each account in the ledger. The debit is on the left side, credit on the right side, and the account name is shown on top.
6. Debits are increases for assets, withdrawals, and expenses. Debits are decreases for liabilities, capital, and revenue.
7. Credits are increases for liabilities, capital, and revenue. Credits are decreases for assets, withdrawals, and expenses.
8. Assets, withdrawals, and expenses have a normal debit balance. Liabilities, capital, and revenue have a normal credit balance.
9. Source documents provide the evidence and data for accounting transactions. Examples of source documents a business would have are: bank deposit slips, purchase invoices, bank checks, and sales invoices
10. Transactions are first recorded in a journal, which is the record of transactions in date order.

- 11.** Step 1: Identify the accounts and the account type. You need this information before you can complete the next step. Step 2: Decide if each account increases or decreases, then apply the rules of debits and credits. Reviewing the rules of debits and credits, we use the accounting equation to help determine debits and credits for each account. Step 3: Record transactions in the journal using journal entries. Step 4: Post the journal entry to the ledger. When journal entries are posted from the journal to the ledger, the dollar amount is transferred from the debit and credit columns to the specific accounts in the ledger. The date on the journal entry should also be transferred to the accounts in the ledger. Step 5: Determine whether the accounting equation is in balance. After each entry the accounting equation should always be in balance.
- 12.** Part 1: Date of the transaction. Part 2: Debit account name and dollar amount. Part 3: Credit account name and dollar amount. The credit account name is indented. Part 4: Brief explanation.
- 13.** When transactions are posted from the journal to the ledger, the dollar amount is transferred from the debit and credit columns to the specific accounts in the ledger. The date of the journal entry is also transferred to the accounts in the ledger. The posting reference columns in the journal and ledger are also completed. In a computerized system, this step is completed automatically when the transaction is recorded in the journal.
- 14.** The trial balance is used to prove the equality of total debits and total credits of all accounts in the ledger; it is also used to prepare the financial statements.
- 15.** A trial balance verifies the equality of total debits and total credits of all accounts on the trial balance and is an internal document used only by employees of the company. The balance sheet, on the other hand, presents the business's accounting equation and is a financial statement that can be used by both internal and external users.
- 16.** If total debits equal total credits on the trial balance, it does not mean that the trial balance is error-free. An incorrect amount could have been used, an entry could have been completely missed, or the wrong account title could have been debited or credited.
- 17.** The debt ratio is calculated by dividing total liabilities by total assets and shows the proportion of assets financed with debt. It can be used to evaluate a business's ability to pay its debts.

Critical Thinking

Tying It All Together Case 2-1

Requirement 1

Fry's Electronics would record the following journal entry:

Date	Accounts and Explanation	Debit	Credit
	Cash	10,500	
	Service Revenue		10,500

The transaction would increase assets (Cash) and equity on the balance sheet and increase Service Revenue on the income statement.

Requirement 2

Fry's Electronics would record the following journal entry:

Date	Accounts and Explanation	Debit	Credit
	Cash	24,000	
	Unearned Revenue		24,000

The transaction would increase assets (Cash) and increase liabilities (Unearned Revenue) on the balance sheet.

Requirement 3

In requirement 1, Fry's Electronics recorded revenue because the company had received the cash from the customer and provided the service. In requirement 2, Fry's Electronics recorded a liability, Unearned Revenue, because even though cash was received, the service has not been provided. The revenue related to requirement 2 will not be recorded until the service has been provided.

McChesney should discontinue the business because net income falls below the target amount.

Ethical Issue 2-1

The bank has a standing agreement with Better Days Ahead for overdrafts, so as long as transactions are compliant with terms of the agreement, there is no ethical issue. The exercise refers to Better Days Ahead managing funds “wisely.” However, whether funds are managed wisely or not is a matter of prudent business management and not an ethical issue. Presumably if Better Days Ahead was exceeding the terms of the agreement, the bank would cancel the arrangement.

Ethical Issue 2-1, cont.

Some students may point out that the agreement was for times when donations were running low, whereas the reasons given for the overdraft are for expansion and fundraising. If this is interpreted to mean that Better Days Ahead is abusing the privilege according to the terms of the agreement, then there may be an ethical issue involved, but that is not made clear by the information given.

Students may approve of Henson's cash management if the arrangement is beneficial to Better Days Ahead, and thus helps them accomplish their charitable mission more effectively. Students may disapprove of Henson's cash management if (a) they feel it is "unwise" (poor business management), or (b) if they believe he is exceeding the terms of the agreement.

Fraud Case 2-1

Requirement 1

By changing an expense to an asset, the total expenses will decrease and net income will increase.

Requirement 2

The CEO gained by earning a bonus, and the accounting manager may have gained by getting favorable treatment from the CEO. The company lost, because the company paid out the bonus under fraudulent conditions.

Financial Statement Case 2-1

Requirement 1

Debt ratio = Total liabilities / Total assets
= \$27,305 (in millions) / \$40,262 (in millions)
= 0.678* = 67.8%
* rounded

Requirement 2

Target's debt ratio is significantly higher than Kohl's (59.6%).

Communication Activity 2-1

Debits are on the left, credits are on the right. Normal balance for assets, expenses, and Owner's Withdrawals is a debit. For liability, Owner's Capital, and revenue accounts, the normal balance is a credit.

Chapter 2

Recording Business Transactions

Review Questions

1. Identify the three categories of the accounting equation, and list at least four accounts associated with each category.

The three categories of the accounting equation are assets, liabilities, and equity. Assets include Cash, Accounts Receivable, Notes Receivable, Prepaid Expenses, Land, Building, Equipment, Furniture, and Fixtures. Liabilities include Accounts Payable, Notes Payable, Accrued Liability, and Unearned Revenue. Equity includes Owner, Capital, Owner, Withdrawals, Revenue, and Expenses.

2. What is the purpose of the chart of accounts? Explain the numbering typically associated with the accounts.

Companies need a way to organize their accounts so they use a chart of accounts. Accounts starting with 1 are usually Assets, 2 – Liabilities, 3 – Equity, 4 – Revenues, and 5 – Expenses. The second and third digits in account numbers indicate where the account fits within the category.

3. What does a ledger show? What's the difference between a ledger and the chart of accounts?

A chart of accounts and a ledger are similar in that they both list the account names and account numbers of the business. A ledger, though, provides more detail. It includes the increases and decreases of each account for a specific period and the balance of each account at a specific point in time.

4. Accounting uses a double-entry system. Explain what this sentence means.

With a double-entry you need to record the dual effects of each transaction. Every transaction affects at least two accounts.

5. What is a T-account? On which side is the debit? On which side is the credit? Where does the account name go on a T-account?

A T-account is a shortened form of each account in the ledger. The debit is on the left side, credit on the right side, and the account name is shown on top.

6. When are debits increases? When are debits decreases?

Debits are increases for assets, withdrawals, and expenses. Debits are decreases for liabilities, capital, and revenue.

7. When are credits increases? When are credits decreases?

Credits are increases for liabilities, capital, and revenue. Credits are decreases for assets, withdrawals, and expenses.

- 8.** Identify which types of accounts have a normal debit balance and which types of accounts have a normal credit balance.

Assets, withdrawals, and expenses have a normal debit balance. Liabilities, capital, and revenue have a normal credit balance.

- 9.** What are source documents? Provide examples of source documents that a business might use.

Source documents provide the evidence and data for accounting transactions. Examples of source documents a business would have are: bank deposit slips, purchase invoices, bank checks, and sales invoices

- 10.** Where are transactions initially recorded?

Transactions are first recorded in a journal, which is the record of transactions in date order.

- 11.** Explain the five steps in journalizing and posting transactions.

Step 1: Identify the accounts and the account type. You need this information before you can complete the next step. Step 2: Decide if each account increases or decreases, then apply the rules of debits and credits. Reviewing the rules of debits and credits, we use the accounting equation to help determine debits and credits for each account. Step 3: Record transactions in the journal using journal entries. Step 4: Post the journal entry to the ledger. When journal entries are posted from the journal to the ledger, the dollar amount is transferred from the debit and credit columns to the specific accounts in the ledger. The date on the journal entry should also be transferred to the accounts in the ledger. Step 5: Determine whether the accounting equation is in balance. After each entry the accounting equation should always be in balance.

- 12.** What are the four parts of a journal entry?

Part 1: Date of the transaction. Part 2: Debit account name and dollar amount. Part 3: Credit account name and dollar amount. The credit account name is indented. Part 4: Brief explanation.

- 13.** What is involved in the posting process?

When transactions are posted from the journal to the ledger, the dollar amount is transferred from the debit and credit columns to the specific accounts in the ledger. The date of the journal entry is also transferred to the accounts in the ledger. The posting reference columns in the journal and ledger are also completed. In a computerized system, this step is completed automatically when the transaction is recorded in the journal.

- 14.** What is the purpose of the trial balance?

The trial balance is used to prove the equality of total debits and total credits of all accounts in the ledger; it is also used to prepare the financial statements.

15. What is the difference between the trial balance and the balance sheet?

A trial balance verifies the equality of total debits and total credits of all accounts on the trial balance and is an internal document used only by employees of the company. The balance sheet, on the other hand, presents the business's accounting equation and is a financial statement that can be used by both internal and external users.

16. If total debits equal total credits on the trial balance, is the trial balance error-free? Explain your answer.

If total debits equal total credits on the trial balance, it does not mean that the trial balance is error-free. An incorrect amount could have been used, an entry could have been completely missed, or the wrong account title could have been debited or credited.

17. What is the calculation for the debt ratio? Explain what the debt ratio evaluates.

The debt ratio is calculated by dividing total liabilities by total assets and shows the proportion of assets financed with debt. It can be used to evaluate a business's ability to pay its debts.

S2-5 Journalizing transactions

Learning Objective 3

John Daniel opened a medical practice in Sacramento, California, and had the following transactions during the month of January.

Jan. 1	The business received \$34,000 cash and gave capital to Daniel.
2	Purchased medical supplies on account, \$17,000.
4	Performed services for patients receiving \$1,600.
12	Paid monthly office rent of \$3,000.
15	Recorded \$7,000 revenue for services rendered to patients on account.

Journalize the transactions of John Daniel, M.D. Include an explanation with each entry.

SOLUTION

Date	Accounts and Explanation	Debit	Credit
Jan. 1	Cash Daniel, Capital <i>Owner contribution.</i>	34,000	34,000
2	Medical Supplies Accounts Payable <i>Purchased medical supplies on account.</i>	17,000	17,000
4	Cash Service Revenue <i>Performed services for patients.</i>	1,600	1,600

15	Accounts Receivable Service Revenue <i>Performed services for patients on account.</i>	7,000	7,000

S2-6 Journalizing transactions

Learning Objective 3

Harper Sales Consultants completed the following transactions during the latter part of January:

Jan. 22	Performed services for customers on account, \$7,500.
30	Received cash on account from customers, \$8,000.
31	Received a utility bill, \$220, which will be paid during February.
31	Paid monthly salary to salesman, \$2,500.
31	Received \$2,310 for three months of consulting service to be performed starting in February.
31	The owner, Damon Harper, withdrew \$950 from the business.

Journalize the transactions of Harper Sales Consultants. Include an explanation with each journal entry.

SOLUTION

S2-9 Calculating debt ratio

Learning Objective 5

Aladdin Carpet Care had the following total assets, liabilities, and equity as of October 31:

Assets	\$ 200,000
Liabilities	30,000
Equity	170,000

What is Aladdin Carpet Care's debt ratio as of October 31?

SOLUTION

Debt ratio = Total liabilities / Total assets = \$30,000 / \$200,000 = 0.15 = 15%

E2-11 Creating a chart of accounts

Raymond Autobody Shop has the following accounts:

Accounts Payable	Service Revenue
Cash	Equipment
Utilities Expense	Raymond, Capital
Automotive Supplies	Advertising Expense
Raymond, Withdrawals	Unearned Revenue

Create a chart of accounts for Raymond Autobody Shop using the standard numbering system. Each account is separated by a factor of 10. For example, the first asset account will be 100 and the next asset account will 110.

SOLUTION

Assets	Equity
100 – Cash	300 – Raymond, Capital
110 – Automotive Supplies	310 – Raymond, Withdrawals
120 – Equipment	
	Revenues
Liabilities	400 – Service Revenue
200 – Accounts Payable	
210 – Unearned Revenue	Expenses
	500 – Utilities Expense
	510 – Advertising Expense

E2-12 Identifying accounts, increases in accounts, and normal balances

Learning Objectives 1, 2

E2-25 Analyzing accounting errors

Learning Objectives 4

Courtney Meehan has trouble keeping her debits and credits equal. During a recent month, Courtney made the following accounting errors:

- a. In preparing the trial balance, Courtney omitted a \$5,000 Notes Payable. The debit to Cash was correct.
- b. Courtney posted a \$1,000 Utilities Expense as \$100. The credit to Cash was correct.
- c. In recording a \$600 payment on account, Courtney debited Furniture instead of Accounts Payable.
- d. In journalizing a receipt of cash for service revenue, Courtney debited Cash for \$50 instead of the correct amount of \$500. The credit was correct.
- e. Courtney recorded a \$210 purchase of office supplies on account by debiting Office Supplies for \$120 and crediting Accounts Payable for \$120.

Requirements

1. For each of these errors, state whether total debits equal total credits on the trial balance.
2. Identify each account that has an incorrect balance and the amount and direction of the error (e.g., “Accounts Receivable \$500 too high”).

SOLUTION

Requirements 1 and 2

Debits equal Credits,				
	Yes or No	Accounts	Amount	High or Low
a.	No	Notes Payable	\$5,000	Low
b.	No	Utilities Expense	900	Low
c.	Yes	Furniture	600	High

Salaries Expense	1,900	
Rent Expense	800	
Utilities Expense	700	
Total	<u>\$ 35,000</u>	<u>\$ 33,100</u>

Investigation of the accounting records reveals that the bookkeeper:

- Recorded a \$400 cash revenue transaction by debiting Accounts Receivable. The credit entry was correct.
- Posted a \$2,000 credit to Accounts Payable as \$200.
- Did not record Utilities Expense or the related Utilities Payable in the amount of \$300.
- Understated McDowell, Capital by \$100.

Prepare the corrected trial balance as of May 31, 2018, complete with a heading; journal entries are not required.

Salaries Expense	23,500	
Utilities Expense	1,100	
Advertising Expense	200	
Total	<u>\$ 256,700</u>	<u>\$ 256,700</u>

Calculate the debt ratio for John Hart, M.D.

SOLUTION

Liabilities:

Accounts Payable	\$ 1,600
Utilities Payable	800
Unearned Revenue	24,795
Notes Payable	<u>69,000</u>
Total liabilities	<u>\$ 96,195</u>

Assets:

Total	<u>\$ 117,550</u>	<u>\$ 117,750</u>

The following errors are detected:

- a. Cash is understated by \$1,500.
- b. A \$4,100 debit to Accounts Receivable was posted as a credit.
- c. A \$1,400 purchase of office supplies on account was neither journalized nor posted.
- d. Equipment was incorrectly transferred from the ledger as \$91,500. It should have been transferred as \$83,000.
- e. Salaries Expense is overstated by \$700.
- f. A \$300 cash payment for advertising expense was neither journalized nor posted.
- g. A \$200 owner's withdrawal of cash was incorrectly journalized as \$2,000.
- h. Service Revenue was understated by \$4,100.
- i. A 12-month insurance policy was posted as a \$1,900 credit to Prepaid Insurance. Cash was posted correctly.

Prepare the corrected trial balance as of August 31, 2018. Journal entries are not required.

Using Excel

P2-41 Using Excel to journalize and post transactions, and to create financial statements

Download an Excel template for this problem online in MyAccountingLab or at <http://www.pearsonhighered.com/Horngren>.

Redmond Company started operations on April 1, 2018. Seventeen transactions occurred during April. Financial statements are prepared at the end of the month.

Requirements

1. Use Excel to record the transactions for April. Use the blue shaded areas for inputs.
 - a. To record the account name in the journal, click in the Account and Explanation column. A drop down arrow will appear to the right. Click the arrow and select an account from the chart of accounts. Use the explanation to help you with the entry.

Date	Account and Explanation	DR	CR
Jul 31			
	Cash		
	Accounts Receivable		
	Office Supplies		
	Prepaid Rent		
	Land		
	Building		
	Furniture		
31	Accounts Payable		

- b. Indent the account name of the account to be credited using the indent button on the Home tab. Click the Increase Indent button twice.

2. Post the transactions to T-Accounts. Use the blue shaded areas for inputs.
 - a. For each transaction, post the amount on the correct side of the T-Account. The T-account totals will be calculated automatically.
 - b. Total debits should equal total credits. The debit-credit balance check appears in the top right-hand corner of the T-Account worksheet.
3. Prepare the income statement, statement of owner's equity, and balance sheet for the company using the trial balance. Each financial statement appears on a separate worksheet tab.
 - a. Fill in the blue shaded areas using a formula that references the account balances in the T-Accounts at the end of the month.
 - b. Format the cells requiring dollar signs. Number formatting is located on the Home tab.

- c. Format the cells requiring a single underline and cells requiring double underlines. The borders tool is found on the Home tab. It looks like a window pane. Click the down arrow for different border selections.

Continuing Problem

P2-42 Journalizing transactions, posting to T-accounts, and preparing a trial balance

Problem P2-42 continues with the company introduced in Chapter 1, Canyon Canoe Company. Here you will account for Canyon Canoe Company's transactions as it is actually done in practice. Begin by reviewing the transactions from Chapter 1. The transactions have been reprinted below.

Nov. 1	Received \$16,000 cash to begin the company and gave capital to Amber Wilson.
2	Signed a lease for a building and paid \$1,200 for the first month's rent.
3	Purchased canoes for \$4,800 on account.
4	Purchased office supplies on account, \$750.
7	Earned \$1,400 cash for rental of canoes.
13	Paid \$1,500 cash for wages.
15	Wilson withdrew \$50 cash from the business.
16	Received a bill for \$150 for utilities. (Use separate payable account.)
20	Received a bill for \$175 for cell phone expenses. (Use separate payable account.)
22	Rented canoes to Early Start Daycare on account, \$3,000.
26	Paid \$1,000 on account related to the November 3 purchase.
28	Received \$750 from Early Start Daycare for canoe rental on November 22.
30	Wilson withdrew cash of \$100 from the business.

In addition, Canyon Canoe Company completed the following transactions for December.

Dec. 1	Amber contributed land on the river (worth \$85,000) and a small building to use as a rental office (worth \$35,000) in exchange for capital.
1	Prepaid \$3,000 for three months' rent on the warehouse where the company stores the canoes.
2	Purchased canoes signing a note payable for \$7,200
4	Purchased office supplies on account for \$500.
9	Received \$4,500 cash for canoe rentals to customers.
15	Rented canoes to customers for \$3,500, but will be paid next month.
16	Received a \$750 deposit from a canoe rental group that will use the canoes next month.
18	Paid the utilities and telephone bills from last month.
19	Paid various accounts payable, \$2,000.
20	Received bills for the telephone (\$325) and utilities (\$295) which will be paid later.
31	Paid wages of \$1,800.
31	Wilson withdrew cash of \$300 from the business.

Requirements

- Journalize the transactions for both November and December, using the following accounts: Cash; Accounts Receivable; Office Supplies; Prepaid Rent; Land; Building; Canoes; Accounts Payable; Utilities Payable; Telephone Payable; Unearned Revenue; Notes Payable; Wilson, Capital; Wilson, Withdrawals; Canoe Rental Revenue; Rent Expense; Utilities Expense; Wages Expense; and Telephone Expense. Explanations are not required. (Hint: For November transactions, refer to your answer for Chapter 1.)

2. Open a T-account for each of the accounts.
3. Post the journal entries to the T-accounts, and calculate account balances. Formal posting references are not required.
4. Prepare a trial balance as of December 31, 2018.
5. Prepare the income statement of Canyon Canoe Company for the two months ended December 31, 2018.
6. Prepare the statement of owner's equity for the two months ended December 31, 2018.
7. Prepare the balance sheet as of December 31, 2018.
8. Calculate the debt ratio for Canyon Canoe Company at December 31, 2018.

Practice Set

P2-43 Journalizing transactions, posting to T-accounts, and preparing a trial balance

Consider the following transactional data for the first month of operations for Crystal Clear Cleaning.

Nov. 1	Aaron Hideaway contributed \$15,000 and a truck, with a market value of \$3,000, to the business in exchange for capital.
2	The business paid \$4,000 to Pleasant Properties for November through February rent. (Debit Prepaid Rent)
3	Paid \$4,800 for a business insurance policy for the term November 1, 2018 through October 31, 2019. (Debit Prepaid Insurance)
4	Purchased cleaning supplies on account, \$320.
5	Purchased on account an industrial vacuum cleaner costing \$1,500. The invoice is payable November 25.
7	Paid \$3,900 for a computer and printer.
9	Performed cleaning services on account in the amount of \$4,700.
10	Received \$200 for services rendered on November 9.
15	Paid employees, \$400.
16	Received \$15,000 for a 1-year contract beginning November 16 for cleaning services to be provided. Contract begins November 16, 2018, and ends November 15, 2019. (Credit Unearned Revenue)
17	Provided cleaning services and received \$400 cash.
18	Received a utility bill for \$175 with a due date of December 4, 2018. (Use Accounts Payable)
20	Borrowed \$36,000 from bank with interest rate of 6% per year.
21	Received \$500 on account for services performed on November 9.
25	Paid \$750 on account for vacuum cleaner purchased on November 5.
29	Paid \$200 for advertising.
30	Hideaway withdrew cash of \$1,400 from the business.

Requirements

1. Journalize the transactions, using the following accounts: Cash; Accounts Receivable; Cleaning Supplies; Prepaid Rent; Prepaid Insurance; Equipment; Truck; Accounts Payable; Unearned Revenue; Notes Payable; Hideaway, Capital; Hideaway, Withdrawals; Service Revenue; Salaries Expense; Advertising Expense; and Utilities Expense. Explanations are not required.
2. Open a T-account for each account.
3. Post the journal entries to the T-accounts, and calculate account balances.
4. Prepare a trial balance as of November 30, 2018.

Critical Thinking

Tying It All Together Case 2-1

Before you begin this assignment, review the Tying It All Together feature in the chapter.

Part of the **Fry's Electronics, Inc.**'s experience involves providing technical support to its customers. This includes in-home installations of electronics and also computer support at their retail store locations.

Requirements

1. Suppose Fry's Electronics, Inc. provides \$10,500 of computer support at the Dallas-Fort Worth store during the month of November. How would Fry's Electronics record this transaction? Assume all customers paid in cash. What financial statement(s) would this transaction affect?
2. Assume Fry's Electronics, Inc.'s Modesto, California, location received \$24,000 for an annual contract to provide computer support to the local city government. How would Fry's Electronics record this transaction? What financial statement(s) would this transaction affect?
3. What is the difference in how revenue is recorded in requirements 1 and 2? Clearly state when revenue is recorded in each requirement.

SOLUTION

Requirement 1

Fry's Electronics would record the following journal entry:

Date	Accounts and Explanation	Debit	Credit
	Cash	10,500	
	Service Revenue		10,500

The transaction would increase assets (Cash) and equity on the balance sheet and increase Service Revenue on the income statement.

Requirement 2

Fry's Electronics would record the following journal entry:

Date	Accounts and Explanation	Debit	Credit
	Cash	24,000	
	Unearned Revenue		24,000

The transaction would increase assets (Cash) and increase liabilities (Unearned Revenue) on the balance sheet.

Requirement 3

In requirement 1, Fry's Electronics recorded revenue because the company had received the cash from the customer and provided the service. In requirement 2, Fry's Electronics recorded a liability, Unearned Revenue, because even though cash was received, the service has not been provided. The revenue related to requirement 2 will not be recorded until the service has been provided.

Decision Case 2-1

Your friend, Dean McChesney, requested that you advise him on the effects that certain transactions will have on his business, A-Plus Travel Planners. Time is short, so you cannot journalize the transactions. Instead, you must analyze the transactions without a journal. McChesney will continue the business only if he can expect to earn a monthly net income of \$6,000. The business completed the following transactions during June:

- a. McChesney deposited \$10,000 cash in a business bank account to start the company. The company gave capital to McChesney.
- b. Paid \$300 cash for office supplies.
- c. Incurred advertising expense on account, \$700.
- d. Paid the following cash expenses: administrative assistant's salary, \$1,400; office rent, \$1,000.
- e. Earned service revenue on account, \$8,800.
- f. Collected cash from customers on account, \$1,200.

Requirements

1. Open the following T-accounts: Cash; Accounts Receivable; Office Supplies; Accounts Payable; McChesney, Capital; Service Revenue; Salaries Expense; Rent Expense; and Advertising Expense.
2. Post the transactions directly to the accounts without using a journal. Record each transaction by letter. Calculate account balances.
3. Prepare a trial balance at June 30, 2018.
4. Compute the amount of net income or net loss for this first month of operations. Would you recommend that McChesney continue in business?

McChesney should discontinue the business because net income falls below the target amount.

Ethical Issue 2-1

Better Days Ahead, a charitable organization, has a standing agreement with First National Bank. The agreement allows Better Days Ahead to overdraw its cash balance at the bank when donations are running low. In the past, Better Days Ahead managed funds wisely and rarely used this privilege. Jacob Henson has recently become the president of Better Days Ahead. To expand operations, Henson acquired office equipment and spent large amounts on fundraising. During Henson's presidency, Better Days Ahead has maintained a negative bank balance of approximately \$10,000.

What is the ethical issue in this situation, if any? State why you approve or disapprove of Henson's management of Better Days Ahead's funds.

SOLUTION

The bank has a standing agreement with Better Days Ahead for overdrafts, so as long as transactions are compliant with terms of the agreement, there is no ethical issue. The exercise refers to Better Days Ahead managing funds "wisely." However, whether funds are managed wisely or not is a matter of prudent business management and not an ethical issue. Presumably if Better Days Ahead was exceeding the terms of the agreement, the bank would cancel the arrangement.

Some students may point out that the agreement was for times when donations were running low, whereas the reasons given for the overdraft are for expansion and fundraising. If this is interpreted to mean that Better Days Ahead is abusing the privilege according to the terms of the agreement, then there may be an ethical issue involved, but that is not made clear by the information given.

Students may approve of Henson's cash management if the arrangement is beneficial to Better Days Ahead, and thus helps them accomplish their charitable mission more effectively. Students may disapprove of Henson's cash management if (a) they feel it is "unwise" (poor business management), or (b) if they believe he is exceeding the terms of the agreement.

Fraud Case 2-1

Roy Akins was the accounting manager at Zelco, a tire manufacturer, and he played golf with Hugh Stallings, the CEO, who was something of a celebrity in the community. The CEO stood to earn a substantial bonus if Zelco increased net income by year-end. Roy was eager to get into Hugh's elite social circle; he boasted to Hugh that he knew some accounting tricks that could increase company income by simply revising a few journal entries for rental payments on storage units. At the end of the year, Roy changed the debits from "rent expense" to "prepaid rent" on several entries. Later, Hugh got his bonus, and the deviations were never discovered.

Requirements

1. How did the change in the journal entries affect the net income of the company at year-end?
2. Who gained and who lost as a result of these actions?

SOLUTION

Requirement 1

By changing an expense to an asset, the total expenses will decrease and net income will increase.

Requirement 2

The CEO gained by earning a bonus, and the accounting manager may have gained by getting favorable treatment from the CEO. The company lost, because the company paid out the bonus under fraudulent conditions.

Financial Statement Case 2-1

Refer to <http://www.pearsonhighered.com/Horngren> to view a link to **Target Corporation's** Fiscal 2015 Annual Report.

Requirements

1. Calculate the debt ratio for Target Corporation as of January 30, 2016.
2. How did the debt ratio for Target Corporation compare to the debt ratio for **Kohl's Corporation**? Discuss.

SOLUTION

Requirement 1

$$\begin{aligned}\text{Debt ratio} &= \text{Total liabilities} / \text{Total assets} \\ &= \$27,305 \text{ (in millions)} / \$40,262 \text{ (in millions)} \\ &= 0.678^* = 67.8\% \\ &\quad * \text{ rounded}\end{aligned}$$

Requirement 2

Target's debt ratio is significantly higher than Kohl's (59.6%).

Communication Activity 2-1

In 35 words or fewer, explain the difference between a debit and a credit, and explain what the normal balance of the six account types is.

SOLUTION

Debits are on the left, credits are on the right. Normal balance for assets, expenses, and Owner's Withdrawals is a debit. For liability, Owner's Capital, and revenue accounts, the normal balance is a credit.

Chapter 2

Recording Business Transactions

Chapter 2: Overview

The chapter introduces the account and then briefly describes specific asset, liability, and equity accounts. The chart of accounts is presented as a way to organize accounts, and the ledger is introduced as a tool for maintaining the accounts. The concept of double-entry accounting and the rules of debit and credit for increasing or decreasing assets, liabilities, and equity are described. The rules of debit and credit are then expanded to include specific types of equity accounts. The normal balances of accounts are explained. The T-account is illustrated. The accounting equation is tied to the rules of debit and credit.

The flow of accounting data is illustrated from the occurrence of a transaction through recording of the transaction. The process of recording transactions (journalizing) is presented. A series of entries are analyzed, journalized, and posted to T-accounts in the ledger. The four-column account is introduced. The trial balance is defined and illustrated. Some typical accounting errors revealed by a trial balance are described. How the debt ratio is used to evaluate business performance is discussed.

An Ethics feature helps give real-world perspective on the importance of source documents. The Tying It All Together feature focusses on Fry's Electronics, Inc. A Decisions feature helps students see how the debt ratio can be used to make a real-world decision. The Review section includes Things You Should Know, which highlights the information students should have acquired from the chapter. A Check Your Understanding reviews opening accounts, journalizing, posting, and preparing a trial balance. A list of Key Terms is provided. A Quick Check gives students a chance to assess their knowledge of the chapter learning objectives.

Chapter 2: Learning Objectives

LO 1. Explain accounts as they relate to the accounting equation and describe common accounts

LO 2. Define debits, credits, and normal account balances using double-entry accounting and T-accounts

LO 3. Record transactions in a journal and post journal entries to the ledger

LO 4. Prepare the trial balance and illustrate how to use the trial balance to prepare financial statements

LO 5. Use the debt ratio to evaluate business performance

Chapter 2: Teaching Outline with Lecture Notes

LO 1. Explain accounts as they relate to the accounting equation and describe common accounts

- a) Review the accounting equation
- b) Review the following terms and give examples of common accounts:
 - i. Account
 - ii. Assets
 - Exhibit 2-1: Asset Accounts
 - iii. Liabilities
 - Exhibit 2-2: Liability Accounts
 - iv. Equity
 - Exhibit 2-3: Equity Accounts
 - v. Chart of accounts
 - Exhibit 2-4: Chart of Accounts—Smart Touch Learning
 - vi. Ledger

Lecture Notes: An understanding of Chapter 2 is essential for student success in the remaining financial accounting chapters. Spend adequate time in the beginning with accounting terminology. Accounting is a “foreign” language to many students, and, as is the case with a real foreign language, you must start with the basics.

Students seem to understand assets and liabilities more easily than they understand equity. An asset can be touched, and a liability can be confirmed by looking at an invoice, but equity is conceptual. Equity is the residual owner’s claims to the business assets—what is left over after liabilities are subtracted from assets. Students may own a car or home that has an outstanding loan or mortgage, so it may be helpful to ask them to think about their personal equity for their car or home.

Suggested In-Class Exercise: E2-11

LO 2. Define debits, credits, and normal account balances using double-entry accounting and T-accounts

- a) Double-entry system
- b) The T-account
- c) The accounting equation and the rules of debit and credit

- d) Increases and decreases in the accounts
- e) Expanding the rules of debit and credit
- f) The normal balance of an account

- Exhibit 2-5: Rules of Debit and Credit and Normal Balances for Each Account Type

- g) Determining the balance of a T-account

Lecture Notes: Keep it simple when discussing T-accounts and the rules of debit and credit. Emphasize that in accounting, *debit* means left side, and *credit* means right side—nothing more. Point out that students may have heard the terms used in other contexts, such as credit reports and debit cards, but these are different meanings of the words *debit* and *credit*. Furthermore, *debit* does not mean increase, and *credit* does not mean decrease. Increases and decreases depend on the account type.

Emphasize that *every* basic accounting transaction affects at least two accounts, with at least one account to be debited and at least one account to be credited. Every journal entry must balance (debits = credits) in order for the accounting system to accurately generate correct and useful information. An incorrect journal entry that is posted to the correct accounts will still produce incorrect information.

An account can have only one balance. Debits and credits within the same account are subtracted to determine the account balance, just like positives and negatives from a mathematical standpoint. The normal balance is the side used to record increases in the account.

Suggested In-Class Exercise: E2-13

LO 3. Record transactions in a journal and post journal entries to the ledger

- a) Define the following terms:

- i. Source documents
- ii. Journal
- iii. Posting

- Exhibit 2-6: Flow of Accounting Data

- b) Introduce the five steps of journalizing and posting
- c) Journalize and post with 17 specific Smart Touch Learning examples
- d) The ledger accounts after posting

- Exhibit 2-7: Smart Touch Learning's Accounts After Posting Journal Entries in November and December

e) The four-column account: An alternative to the T-account

- Exhibit 2-8: T-Account Versus Four-Column Account
- Exhibit 2-9: Posting References

Lecture Notes: When discussing the posting process, emphasize the need to be very careful when transferring amounts to the ledger. It is common for students to reverse a posting and record a debit as a credit or vice versa. A debit is placed on the left side, and a credit is placed on the right side. Also, relate to them that transposing digits during the posting process is a common mistake. For example, a transaction might be for \$630 and recorded in the journal as \$630 but posted to the ledger as \$360. If the trial balance doesn't balance, it is common for students to have reversed a posting or transposed digits. For this reason, it is important to include dates and/or transaction numbers linking the journal entry to the ledger account to more easily trace those errors.

Suggested In-Class Exercises: E2-16 and E2-17

LO 4. Prepare the trial balance and illustrate how to use the trial balance to prepare financial statements

a) Define a trial balance

- Exhibit 2-10: Trial Balance

b) Preparing financial statements from the trial balance

- Exhibit 2-11: Smart Touch Learning's Financial Statements

c) Correcting trial balance errors

Lecture Notes: It may be helpful for students to view the accounting system from both ends. The natural process is to journalize transactions, post entries, and prepare a trial balance. However, once the chapter content is discussed, you can also begin with the trial balance and have students trace back to the ledger and journal to find a specific transaction. They may also get experience doing this when correcting a trial balance that does not balance.

Suggested In-Class Exercise: E2-22

LO 5. Use the debt ratio to evaluate business performance

a) Define the debt ratio and explain how it is calculated

Lecture Notes: Remind student about the accounting equation: $\text{Assets} = \text{Liabilities} + \text{Equity}$. This makes it clear that the debt ratio represents the proportion of the total assets that "belong" to the creditors of the business. Conversely, $1 - \text{Debt ratio}\%$ is the proportion of the assets that belong to the owners of the business.

Suggested In-Class Exercise: E2-28

Chapter 2: Student Chapter Summary

LO 1. Explain accounts as they relate to the accounting equation and describe common accounts

An account is a detailed record of all increases and decreases that have occurred in an individual asset, liability, or equity during a specific period. Common asset accounts include Cash, Accounts Receivable, Notes Receivable, Prepaid Expense, Land, Building, and Furniture. Common liability accounts include Accounts Payable, Notes Payable, Accrued Liability, and Unearned Revenue. Equity accounts include Owner Capital, Owner Withdrawals, Revenues, and Expenses. A chart of accounts lists a company's accounts along with account numbers. A ledger shows the increases and decreases in each account along with their balances.

LO 2. Define debits, credits, and normal account balances using double-entry accounting and T-accounts

Double-entry accounting requires transactions to be recorded into at least two accounts. The T-account is shaped like a capital *T*, with debits posted to the left side of the vertical line and credits posted to the right side of the vertical line. T-accounts represent ledger accounts. In accounting, *debit* means left side of the account, and *credit* means right side of the account. Assets, Expenses, and Owner Withdrawals are increased with a debit and decreased with a credit. Liabilities, Owner Capital, and Revenues are increased with a credit and decreased with a debit. The normal balance of an account is the increase side of that account.

LO 3. Record transactions in a journal and post journal entries to the ledger

Source documents provide the evidence and data for transactions. Transactions are recorded in a journal, and then the journal entries are posted (transferred) to the ledger. Transactions are journalized and posted using five steps:

- Step 1. Identify the accounts and the account type (asset, liability, and equity).
- Step 2. Decide whether each account increases or decreases, then apply the rules of debits and credits.
- Step 3. Record the transaction in the journal.
- Step 4. Post the journal entry to the ledger.
- Step 5. Determine whether the accounting equation is in balance.

LO 4. Prepare the trial balance and use the trial balance to prepare financial statements

The trial balance summarizes the ledger by listing all the accounts with their balances. Assets are listed first, followed by liabilities, and then equity. The trial balance ensures that debits equal credits and is used to prepare the financial statements.

LO 5. Use the debt ratio to evaluate business performance

The debt ratio, calculated as $\text{Total liabilities} / \text{Total assets}$, is used to evaluate a business's ability to pay its debts.

CHAPTER 2 TEN-MINUTE QUIZ

Circle the letter of the best response.

1. Which of the following is a collection of all the accounts, the changes in those accounts, and their balances?
 - A. Balance sheet
 - B. Ledger
 - C. Journal
 - D. Trial balance

2. Which of the following statements is correct?
 - A. Service Revenue is increased with a debit.
 - B. Accounts Receivable is decreased with a debit.
 - C. Unearned Revenue is increased with a credit.
 - D. Owner Capital is decreased with a credit.

3. Suppose Howard Company has Furniture totaling \$158,000, Cash of \$18,000, and a \$64,000 Note Payable. In addition, the business has Accounts Payable of \$52,000 and Accounts Receivable of \$43,000. How much is Howard's owner's equity?
 - A. \$231,000
 - B. \$145,000
 - C. \$121,000
 - D. \$103,000

4. Amada Company billed a customer for \$5,500 of services provided on account. This transaction appears in T-accounts as follows:

5. Barstock, Inc., began the year with total assets of \$177,000 and liabilities of \$112,000. During the year, the business earned revenue of \$103,000 and incurred expenses of \$48,000. The owner withdrew cash of \$24,000, and no additional contributions were made. How much is owner's equity at year-end?
- \$120,000
 - \$96,000
 - \$79,000
 - \$31,000
6. Hughes Copies, Inc., erroneously recorded a purchase of equipment on account by debiting Equipment and crediting Cash. What will be an effect of this error on the trial balance?
- Liabilities understated
 - Cash overstated
 - Equipment overstated
 - Equipment understated
7. Terry Baxter is the owner of Alpha Company. Baxter provided Alpha Company with \$75,000 of computer equipment. The journal entry to record this transaction is as follows:

	Accounts and Explanations	Debit	Credit
A.	Baxter, Capital	75,000	
	Equipment Expense		75,000
B.	Equipment Expense	75,000	
	Baxter, Capital		75,000
C.	Equipment	75,000	
	Baxter, Capital		75,000
D.	Baxter, Capital	75,000

9. What is the detailed record of all increases and decreases that have occurred in a specific individual asset, liability, or equity during a specific period?
- A. Ledger
 - B. Trial balance
 - C. Account
 - D. Journal
10. A company has \$72,000 in liabilities and \$98,000 in equity. What is the debt ratio?
- A. 26.5%
 - B. 42.4%
 - C. 73.5%
 - D. 136.1%

Answer Key to Ten-Minute Quiz:

1. B
2. C
3. D

Assets		=	Liabilities		+	Owner's Equity	
Accounts Receivable	\$ 43,000		Accounts Payable	\$ 52,000			
Cash	18,000		Note Payable	64,000			
Furniture	158,000						
Total	<u>\$ 219,000</u>		Total	<u>\$ 116,000</u>		Total	<u>?</u>

Assets = Liabilities + Owner's equity; therefore, Owner's equity = Assets – Liabilities

Owner's equity = \$219,000 – \$116,000 = \$103,000

4. C

5. B

Assets = Liabilities + Owner's equity; therefore, Owner's equity = Assets – Liabilities

Owner's equity at the beginning of the year = \$177,000 – \$112,000 = \$65,000

Owner capital, beginning of year	\$ 65,000
Net income earned during the year (revenue – expenses)	<u>55,000</u>
	120,000
Owner withdrawal	<u>(24,000)</u>
Owner capital, end of year	<u>\$ 96,000</u>

6. A
7. C
8. D
9. C
10. B

Debt ratio = Total liabilities / Total assets* = \$72,000 / \$170,000 = 42.4%

*Total assets = Liabilities + Equity = \$72,000 + 98,000 = \$170,000

Extra Critical Thinking Questions

Decision Case 2-2

Answer the following questions. Consider each question separately.

Requirements

1. Explain the advantages of double-entry bookkeeping instead of recording transactions in terms of the accounting equation to a friend who is opening a used book store.
2. When you deposit money in your bank account, the bank credits your account. Is the bank misusing the word *credit* in this context? Why does the bank use the term *credit* instead of *debit* to refer to your deposit?

Decision Case 2-2: Solution

Requirement 1

The advantage of double-entry bookkeeping is that it provides an arithmetic check on the accounting transactions; the total debits and total credits have to equal, and something is wrong if they don't. Double-entry bookkeeping can also handle a higher number of transactions than using the accounting equation.

Requirement 2

The bank uses the term *credit your account* when you deposit money because it is crediting a liability on its books. It owes you the funds that you just deposited.

Team Project 2-1

Contact a local business and arrange with the owner to learn what accounts the business uses.

Requirements

1. Obtain a copy of the business's chart of accounts.
2. Prepare the company's financial statements for the most recent month, quarter, or year. (You may omit the statement of cash flows.) You may use either made-up account balances or balances supplied by the owner.

If the business has a large number of accounts within a category, combine related accounts and report a single amount on the financial statements. For example, the company may have several Cash accounts. Combine all Cash amounts and report a single Cash amount on the balance sheet. You will probably encounter numerous accounts that you have not yet learned about. Deal with them as best you can. Keep in mind that the financial statements report the balances of the accounts listed in the company's chart of accounts, either by individual account or in summarized categories. Therefore, the financial statements must be consistent with the chart of accounts.

Team Project 2-1: Solution

Requirements 1 and 2

Student answers will vary widely, as the various groups use the charts of accounts of different businesses. The financial statements that the students prepare should be consistent with the business's chart of accounts.

Directed Reading Guide

LO1. What is an account?

- a) In your own words, what is an *account*? **An account is the detailed record of all increases and decreases that have occurred in an individual asset, liability, or equity during a specified period.**
 - i) Assets: List some examples of assets. **Cash, Accounts Receivable, Notes Receivable, Prepaids, Land, Building, and equipment are a few examples.**
 - ii) Liabilities: List some examples of liabilities. **Accounts payable, Notes Payable, Accrued Liabilities, and Unearned Revenue are a few examples.**
 - iii) Equity: List the four equity accounts. **Owner's Capital, Owner's Withdrawals, Revenues, and Expenses.**
- b) In your own words, what is a *chart of accounts*? **A chart of accounts lists all company accounts along with the account numbers.**
- c) In your own words, what is a *ledger*? **A ledger is a collection of all the accounts, the changes in those accounts, and their balances.**

In MyAccountingLab, complete Try It! 2-1 and S2-1.

LO2. What is double-entry accounting?

- a) Draw a T-account and label the debit and credit side.

Debit	Credit

- b) Fill in the expanded accounting equation with Debit (DR), Credit (CR), and Increase (Inc.) and Decrease (Dec.).

Assets		=	Liabilities		+	Equity							
					</								

- c) Fill in the normal balance of the account

Account type	Normal Balance
Asset	Debit
Expenses	Debit
Owner, Withdrawals	Debit
Liabilities	Credit
Revenues	Credit
Owner, Capital	Credit

- d) Determining the balance in the following T-account

Cash	
25,000	1,000
2,000	3,000
	\$23,000
	balance

In MyAccountingLab, complete Try It! 2-2 and S2-2, S2-3, and S2-4.

LO3. How do you record transactions?

- a) In your own words, define the following terms:
- Source documents* - Accountants use source documents to provide the evidence and data for recording transactions.
 - Journal* – A journal is the record of transactions in date order.
 - Posting* - The process of transferring data from the journal to the ledger.

- b) What are the steps for journalizing and posting? - **1) Identify the accounts and account type; 2) Decide whether each account increases or decreases, then apply the rules of debits and credits; 3) Record the transaction in the journal; 4) Post the journal entry to the ledger; 5) Determine whether the accounting equation is in balance.**

In MyAccountingLab, complete Try It! 2-3 and S2-5.

LO4. What is the trial balance?

- a) In your own words, what is a *trial balance*? **The trial balance summarizes the ledger by listing all the accounts with their balances.**

In MyAccountingLab, complete Try It! 2-4 and S2-8.

LO5. Use the debt ratio to evaluate business performance

- a) Write the formula for the debt ratio. **Total liabilities / Total Assets**
- b) What does the debt ratio show? **The debt ratio shows the proportion of assets financed with debt.**

In MyAccountingLab, complete Try It! 2-5 and S2-9.

Chapter 2

Recording Business Transactions

Chapter 2 Learning Objectives

1. Explain accounts as they relate to the accounting equation and describe common accounts
2. Define debits, credits, and normal account balances using double-entry accounting and T-accounts
3. Record transactions in a journal and post journal entries to the ledger

Chapter 2 Learning Objectives

4. Prepare the trial balance and illustrate how to use the trial balance to prepare financial statements
5. Use the debt ratio to evaluate business performance

Learning Objective 1

Explain accounts as they relate to the accounting equation and describe common accounts

WHAT IS AN ACCOUNT?

$$\text{Assets} = \text{Liabilities} + \text{Equity}$$

- The accounting equation contains three categories: assets, liabilities, and equity. Each part contains accounts.
- An **account** is a detailed record of all increases and decreases that have occurred in an asset, liability, or equity during a specified period.

Assets

Exhibit 2-1 | Asset Accounts

Account Name	Explanation
Cash	A business's money. Includes bank balances, bills, coins, and checks.
Accounts Receivable	A customer's promise to pay in the future for services or goods sold. Often described as "On Account."
Notes Receivable	A <i>written</i> promise that a customer will pay a fixed amount of money and <i>interest</i> by a certain date in the future. Usually more formal than an Accounts Receivable.
Prepaid Expense	A payment of an expense in advance. It is considered an asset because the prepayment provides a benefit in the future. Examples of prepaid expenses are <i>Prepaid Rent</i> , <i>Prepaid Insurance</i> , and <i>Office Supplies</i> .
Land	The cost of land a business uses in operations.
Building	The cost of an office building, a store, or a warehouse.
Equipment, Furniture, and Fixtures	The cost of equipment, furniture, and fixtures (such as light fixtures and shelving). A business has a separate asset account for each type.

Liabilities

Exhibit 2-2 | Liability Accounts

Account Name	Explanation
Accounts Payable	A promise made by the business to pay a debt in the future. Arises from a credit purchase.
Notes Payable	A <i>written</i> promise made by the business to pay a debt, usually involving <i>interest</i> , in the future.
Accrued Liability	An amount owed but not paid. A specific type of payable such as <i>Taxes Payable</i> , <i>Rent Payable</i> , and <i>Salaries Payable</i> .
Unearned Revenue	Occurs when a company receives cash from a customer but has not provided the product or service. The promise to provide services or deliver goods in the future.

Equity

Exhibit 2-3 | Equity Accounts

Account Name	Explanation
Owner, Capital	Represents the net contributions of the owner in the business. Increases equity.
Owner, Withdrawals	Distributions of cash or other assets to the owner. Decreases equity.
Revenues	Earnings that result from delivering goods or services to customers. Increases equity. Examples include <i>Service Revenue</i> and <i>Rent Revenue</i> .
Expenses	The cost of selling goods or services. Decreases equity. Examples include <i>Rent Expense</i> , <i>Salaries Expense</i> , and <i>Utilities Expense</i> .

Chart of Accounts

Exhibit 2-4 | Chart of Accounts—Smart Touch Learning

Balance Sheet and Statement of Owner's Equity Accounts		
Assets	Liabilities	Equity
101 Cash	201 Accounts Payable	301 Owner, Capital
111 Accounts Receivable	211 Salaries Payable	311 Owner, Withdrawals

A **chart of accounts** is used to organize a company's accounts.

A **ledger** is a record holding all the accounts of a business, the changes in those accounts, and their balances.

Learning Objective 2

Define debits, credits, and normal account balances using double-entry accounting and T-accounts

WHAT IS DOUBLE-ENTRY ACCOUNTING?

- Transactions always involve at least two accounts.
- Accounting uses the **double-entry system** to record the dual effects of each transaction.
 - For example, office supplies are purchased for cash, requiring an increase in Office Supplies and a decrease in Cash.

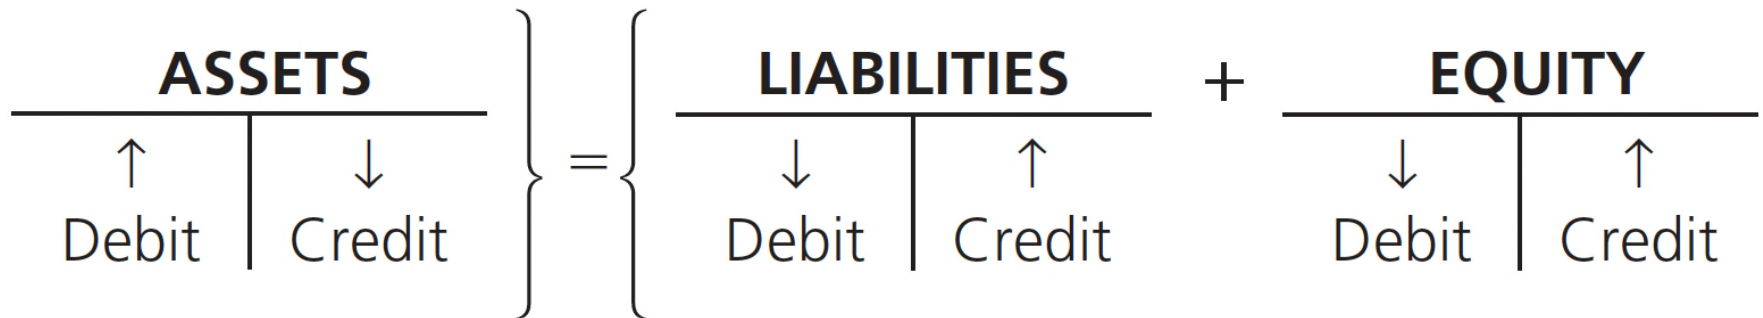

The T-Account

- A shortened form of the ledger is called the **T-account**.
 - The left side of the T-account is called the **debit** side.
 - The right side of the T-account is called the **credit** side.

Increases and Decreases in the Accounts

How we record increases and decreases to an account is determined by the account type.

Increases and Decreases in the Accounts

- To increase the Cash account, a business would record a debit to Cash.

- To decrease the Cash account, a business would record a credit to Cash.

[illegible]

The Normal Balance of an Account

- All accounts are summarized on one side of the T-account, called the normal balance.
- An account's **normal balance** appears on the increase side of the account.
 - Assets increase with a debit, so the normal balance is a debit.
 - Liabilities and equity increase with a credit, so the normal balance is a credit.

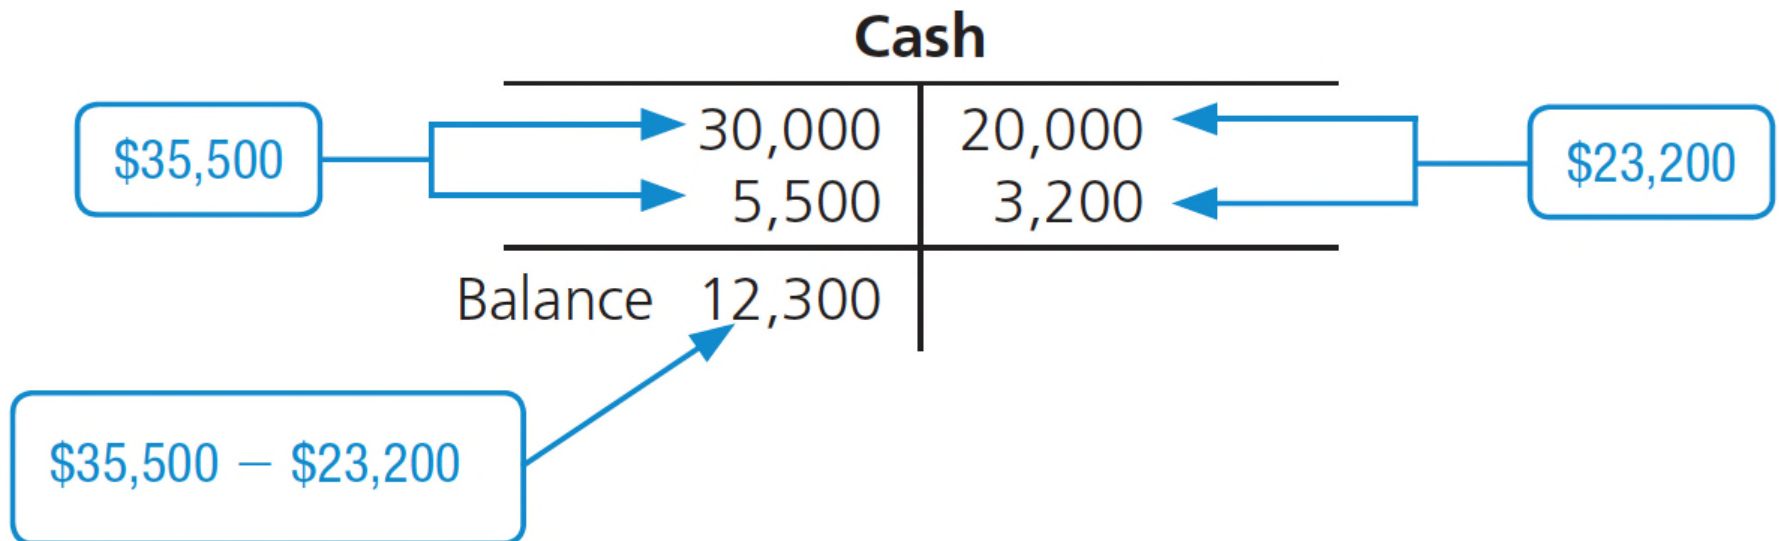

The Normal Balance of an Account

Exhibit 2-5 | Rules of Debits and Credits and Normal Balances for Each Account Type

Account Type	Increases	Decreases	Normal Balance
Assets	Debit	Credit	Debit
Expenses	Debit	Credit	Debit
Owner, Withdrawals	Debit	Credit	Debit
Liabilities	Credit	Debit	Credit
Revenues	Credit	Debit	Credit
Owner, Capital	Credit	Debit	Credit

Determining the Balance of a T-Account

Use the T-account to determine the ending balance in an account. The ending balance is shown on the side with the larger number.

Learning Objective 3

Record transactions in a journal and post journal entries to the ledger

HOW DO YOU RECORD TRANSACTIONS?

- Accountants use **source documents** to provide evidence and data for recording transactions.
- The documents help businesses determine how to record the transactions.

Source Documents—The Origin of the Transactions

Exhibit 2-6 | Flow of Accounting Data

- Other source documents used include:
 - Purchase invoices
 - Bank checks
 - Sales invoices

Journalizing and Posting Transactions

- After reviewing source documents, accountants record the transactions.
- Transactions are recorded in a **journal**, which is a record of the transactions in date order.
- The data from the journal is then transferred to the ledger, a process called **posting**.

Date		Debit	Credit
Nov. 1	Cash Bright, Capital Owner contribution.	30,000	30,000

Transactions are recorded
in a journal.

Cash	
30,000	

Bright, Capital	
	30,000

Data is posted (transferred) to
the ledger.

Journalizing and Posting Transactions

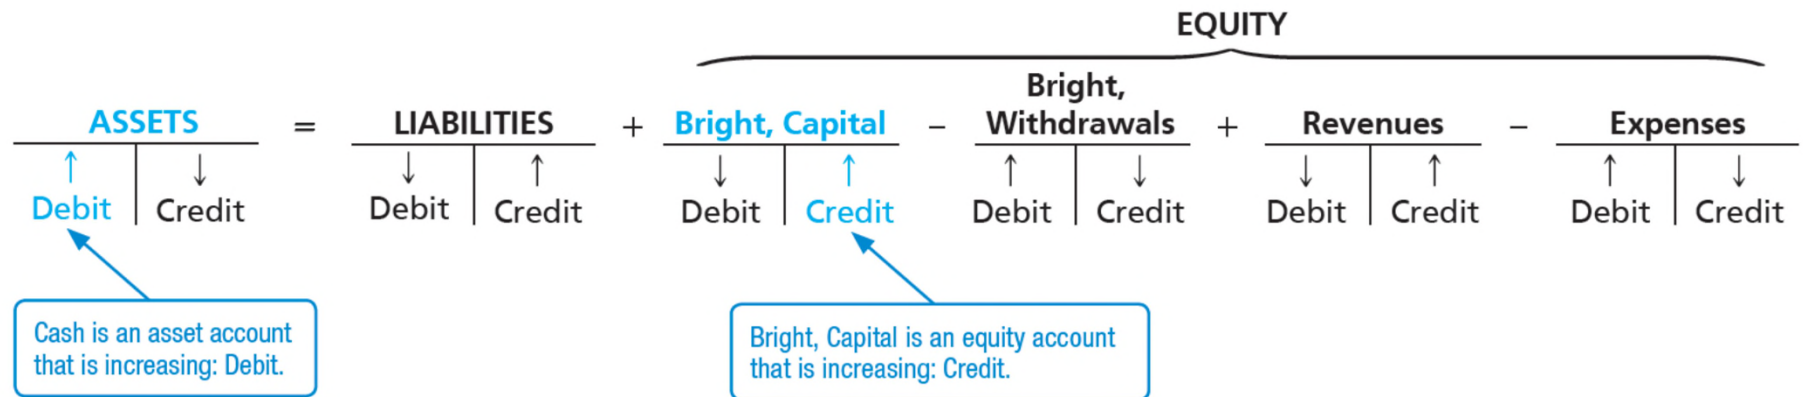

The journalizing and posting process has five steps:

- **Step 1:** Identify the accounts and the account types (asset, liability, or equity).
- **Step 2:** Decide whether each account increases or decreases and then apply the rules of debits and credits.
- **Step 3:** Record the transaction in the journal.
- **Step 4:** Post the journal entry to the ledger.
- **Step 5:** Determine whether the accounting equation is in balance.

Journalizing and Posting Transactions

Transaction 1—Owner Contribution

On November 1, Smart Touch Learning received \$30,000 cash from Sheena Bright, and the business issued capital to her.

Journalizing and Posting Transactions

Learning Objective 4

Prepare the trial balance and illustrate how to use the trial balance to prepare financial statements

WHAT IS THE TRIAL BALANCE?

A **trial balance** is a list of all ledger accounts with their balances at a point in time.

The asset accounts are listed first, followed by liabilities, and then equity.

Correcting Trial Balance Errors

If total debits do not equal total credits:

1. Search the trial balance for a missing account.
2. Divide the difference between total debits and total credits by 2.
3. Divide the out-of-balance amount by 9 to find slide or transposition errors.

Note: Even if total debits equal total credits, there can still be errors, such as the use of the wrong accounts.

Learning Objective 5

Use the debt ratio to
evaluate business
performance

HOW DO YOU USE THE DEBT RATIO TO EVALUATE BUSINESS PERFORMANCE?

- The **debt ratio** shows the proportion of assets financed with debt.
- It can be used to evaluate a business's ability to pay its debts and to determine if the company has too much debt to be considered financially healthy.

$$\text{Debt ratio} = \text{Total liabilities} / \text{Total assets}$$
