Economics Today, 20e (Miller)

Chapter 2 Scarcity and the World of Trade-Offs

2.1 Scarcity

1) Scarcity arises because

- A) resources are limited and are inadequate to meet all human wants.
- B) shortages always occur.
- C) natural resources are abundant.
- D) some people do not behave in a rational manner.

Answer: A

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

2) Scarcity refers to

- A) a shortage in a good or service.
- B) the ability of society to consume all that it produces.
- C) the inability of society to satisfy all human wants because of limited resources.
- D) the inability of an individual to purchase a good or service due to her limited income.

Answer: C

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

3) Which of the following statements is TRUE about scarcity?

- A) Both rich and poor people face the problem of scarcity.
- B) Scarcity exists only when supply is insufficient to meet demand.
- C) Scarcity exists only when a shortage exists.
- D) Scarcity can be eliminated when people earn sufficient incomes.

Answer: A

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

4) The problem of economic scarcity applies

- A) only in countries with no markets to meet people's wants.
- B) only in underdeveloped countries, because there are no productive resources in these nations.
- C) only to nations with few resources.
- D) to the economies of all nations, regardless of their levels of development.

Answer: D

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

5) In every economic system, choices must be made because resources

- A) are unlimited, but human desires and wants are limited.
- B) are limited, but human desires and wants are unlimited.
- C) are unlimited, and so are human desires and wants.
- D) are limited, and so are human desires and wants.

Answer: B

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

6) In the production of goods and services, trade-offs exist because

- A) not all production is efficient.
- B) society has only a limited amount of productive resources.
- C) we have abundant resources to choose from.
- D) human wants and needs are limited at a particular point in time.

Answer: B

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

7) Which of the following statements about economic scarcity is FALSE?

- A) Scarcity occurs among the poor and the rich.
- B) Scarcity only occurs if there are shortages and people wait in line to buy things.
- C) Scarcity results from not having enough resources to produce all the things we want.
- D) Scarcity results in the necessity to make choices.

Answer: B

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

8) Which of the following statements is FALSE?

- A) Economic goods are available in desired quantities at a zero price.
- B) A good is anything that gives satisfaction or happiness to individuals.
- C) Services are intangible goods such as dry cleaning, hospital care, and restaurant meal preparation.
- D) Wants are unlimited and include all material and nonmaterial desires.

Answer: A

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

9) Which of the following statements about scarcity is TRUE?

- A) Scarcity occurs only among less developed countries.
- B) Scarcity exists in all societies.
- C) Scarcity is a problem only for greedy people.
- D) Scarcity is a problem only in countries that do not use markets to organize economic activity.

Answer: B

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

10) In 2020, tornadoes damaged parts of the U.S. Midwest, destroying homes, businesses, schools, and infrastructure. In strictly economic terminology, these tornadoes are said to have caused

- A) scarcity, because the damages made food and shelter scarce.
- B) scarcity, because some goods were difficult to get.
- C) shortages, because supplies were cut off and goods were destroyed.
- D) trade-offs, because some areas of the country were damaged when others were not.

Answer: C

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

- 11) Scarcity implies that people must
- A) be irrational.
 - B) be selfish.
 - C) make choices.
 - D) earn as much as income as they are able to.

Answer: C

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

- 12) Scarcity
- A) does not exist in the United States.
 - B) applies only to developing countries.
 - C) can be reduced with more efficient production methods.
 - D) cannot be avoided in the world.

Answer: D

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

- 13) The difference between scarcity and a shortage is that
- A) scarcity is caused by poverty and shortages are caused by natural disasters.
 - B) shortages are a type of scarcity caused by natural disasters while scarcity is caused by human errors.
 - C) scarcity always is a part of human life while shortages usually are temporary.
 - D) shortages are always part of human life while scarcity is usually temporary.

Answer: C

Diff: 3

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

14) Which of the following is the best example of scarcity?

- A) The Talking Teddy is a surprise holiday hit, resulting in long lines of consumers trying to purchase the limited number of available Teddies.
- B) Fred only gets a one-hour lunch break and each day must decide between working out at the gym or socializing with his colleagues.
- C) The local market's buy-one-get-one-free sale on strawberries results in more people wanting the berries than producers are able and willing to supply.
- D) Pokemon Go is the most popular cell-phone app that can be downloaded free from an app store.

Answer: B

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

15) Scarcity is caused by

- A) unlimited wants running up against limited economic resources.
- B) a company's slow production speed.
- C) an individual's budget that is insufficient to cover the expenses of certain goods or services.
- D) shortages.

Answer: A

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

16) Human resources that perform the functions of organizing, managing, and assembling the other factors of production are called

- A) physical capital.
- B) venture capital.
- C) entrepreneurs.
- D) productive capital.

Answer: C

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

- 17) In economic terminology, when a resource is used to produce output it is referred to as
- A) an intangible.
 - B) a factor of production.
 - C) a service.
 - D) a fifth element.

Answer: B

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

- 18) All of the following are examples of physical capital EXCEPT

- A) buildings.
- B) machinery.
- C) stocks and bonds.
- D) computer equipment.

Answer: C

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Application of knowledge

- 19) Entrepreneurs are important to market economies because

- A) they engage in risk taking and innovation.
- B) they make up a large portion of low-skilled labor.
- C) they take few risks and thereby, suffer fewer bankruptcies.
- D) they represent the bulk of employment at large corporations.

Answer: A

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

20) Which of the following are considered factors of production?

- I. Land
- II. Labor
- III. Physical capital
- IV. Entrepreneurship
- A) I and II only
- B) I and III only
- C) I, II and III only
- D) I, II, III and IV

Answer: D

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

21) All of the following are economic resources, or factors of production EXCEPT

- A) land.
- B) physical capital.
- C) money.
- D) entrepreneurship.

Answer: C

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

22) In economic terminology, the accumulated training and education that workers receive to increase their productivity is referred to as

- A) entrepreneurship.
- B) human capital.
- C) labor.
- D) physical capital.

Answer: B

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

23) Physical capital is distinguished from human capital because

- A) physical capital refers to trained people.
- B) physical capital refers to equipment and machinery, whereas human capital refers to trained people.
- C) human capital refers only to day laborers.
- D) physical capital refers to trained people, whereas human capital refers to equipment and machinery.

Answer: B

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

24) In economics, the term *physical capital*

- A) refers to funds used by businesses to acquire goods and services.
- B) refers to all manufactured resources used for production.
- C) refers to the process of raising funds through the stock market.
- D) refers to the stock of merchandise already produced.

Answer: B

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

25) Human capital is

- A) what people get from physical capital.
- B) the accumulation of skills, training and education of workers.
- C) the value of funds that entrepreneurs obtained from other people.
- D) the human resources that perform the function of raising capital.

Answer: B

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

26) The conversion of resources into consumer goods or services is called

- A) human capital.
- B) production.
- C) opportunity cost.
- D) consumption.

Answer: B

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

27) Services can be thought of as

- A) unvalued goods.
- B) unwanted goods.
- C) inferior goods.
- D) intangible goods.

Answer: D

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

28) Economic goods are defined as

- A) tangible items only.
- B) services only.
- C) anything from which an individual derives satisfaction.
- D) any item which is available in sufficient quantity at zero price.

Answer: C

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

29) If the quantity desired of something exceeds the amount available at zero price, that item is called

- A) capital.
- B) an economic good.
- C) an intangible good.
- D) a bad.

Answer: B

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

30) Which is the best example of an intangible good?

- A) the car you dream of owning but cannot afford
- B) the suit you hope will make a good impression when you go on job interviews
- C) the textbook study guide you hope will prepare you to perform well on examinations
- D) the advice and expertise provided by the music store clerk who sold you that CD

Answer: D

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

31) At a zero price, which of the following conditions is TRUE for an economic good?

- A) Its quantity supplied exceeds its quantity demanded.
- B) Its quantity demanded exceeds its quantity supplied.
- C) Its quantity demanded equals its quantity supplied.
- D) Scarcity disappears.

Answer: B

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

32) The most basic concept in economics is

- A) wealth.
- B) income.
- C) scarcity.
- D) human need.

Answer: C

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

33) Scarcity

- A) exists in all human societies.
- B) is a problem for less-developed nations only.
- C) used to be a problem, but is not an issue for modern industrial nations.
- D) afflicts greedy people only.

Answer: A

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

34) Scarcity affects

- A) only rich people.
- B) only poor people.
- C) only middle income people.
- D) all people.

Answer: D

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

35) Scarcity is

- A) a shortage of goods and services.
- B) poverty and misery.
- C) a situation in which the resources for producing the goods and services that people desire are sufficient to satisfy people's desires.
- D) a situation in which the resources required to produce the goods and services that people desire are insufficient to satisfy all wants.

Answer: D

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

36) Scarcity implies that

- A) people should limit their wants, since shortages exist.
- B) firms should be more efficient when producing goods.
- C) people must make choices.
- D) nonrenewable resources should never be used.

Answer: C

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

37) Economic goods are

- A) abundant goods, about which we must constantly make decisions about their best use.
- B) all intangible items from which individuals derive satisfaction or happiness.
- C) goods that are scarce, for which the quantity demanded exceeds the quantity supplied at a zero price.
- D) goods that are scarce, for which the quantity demanded exceeds the quantity supplied at any price.

Answer: C

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

38) Scarcity exists because

- A) the majority of people in the world are poor.
- B) people are too greedy and refuse to share what they have with others.
- C) human wants exceed what can be produced with the limited resources available.
- D) not enough new technology is being used to eliminate scarcity.

Answer: C

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

39) A drought has destroyed orange crops in California. The drought has caused

- A) scarcity because there are less oranges now than people want.
- B) scarcity because people have to switch to oranges grown in Florida.
- C) a shortage because people cannot obtain as many oranges as they wish to buy at the pre-drought price.
- D) a shortage because orange growers will have less income.

Answer: C

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

40) The existence of scarcity means that

- A) there are not enough resources to satisfy unlimited human wants.
- B) firms will increase their production to eliminate the scarcity.
- C) the government will step in to eliminate the scarcity.
- D) firms working with the government will allocate resources to eliminate the scarcity.

Answer: A

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

41) David has just ordered a smartphone only to be told that he will have to wait one month for it to be delivered. Which of the following statements is TRUE?

- A) The smartphone is not a scarce good.
- B) The smartphone is an economic good.
- C) The smartphone is human capital.
- D) The smartphone is an intangible good.

Answer: B

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

42) Scarcity and shortages differ in that

- A) scarcity is caused by natural disasters and shortages are caused by mistakes people make.
- B) scarcity is a condition of human life while shortages are usually temporary phenomena related to an imbalance between the amount desired and the amount produced.
- C) scarcity is a type of shortage but shortage is a broader concept.
- D) shortages apply to resource markets while scarcity applies to product markets.

Answer: B

Diff: 3

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

43) There are not enough of four goods to satisfy the wants of people. For good A, this is true when the price is \$100. This is true for good B at a price of \$10, for good C at a price of \$1, and for good D at a price of zero. Which situation reflects scarcity rather than shortage?

- A) A
- B) B
- C) C
- D) D

Answer: D

Diff: 3

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Application of knowledge

44) Production refers to

- A) physically producing material goods only.
- B) any activity of a firm, whether a corporation, partnership, or sole proprietorship.
- C) any activity that results in the conversion of resources into goods or services that can be consumed.
- D) any activity that causes a material conversion of manufactured goods.

Answer: C

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

45) Which of the following activities are production?

- A) combining flour, milk, and eggs to make cookies
- B) moving crude oil from one part of Texas to an oil refinery near the Texas coast
- C) taking ice cubes from a tray to put in a drink
- D) All of these are production.

Answer: D

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

46) In economics, resources are also known as

- A) minerals.
- B) factories.
- C) factors of production.
- D) human capital.

Answer: C

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

47) Which type of resource will improve through more education and training by workers?

- A) money
- B) physical capital
- C) natural resources
- D) human capital

Answer: D

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

48) A tractor used to prepare land for planting is called

- A) land.
- B) labor.
- C) physical capital.
- D) human capital.

Answer: C

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

49) Naturally occurring diamonds are an example of

- A) land.
- B) labor.
- C) physical capital.
- D) human capital.

Answer: A

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

50) A man-made resource such as a building or a machine is an example of which resource?

- A) entrepreneurial ability
- B) labor
- C) physical capital
- D) human capital

Answer: C

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

51) Which of the following is NOT an economic resource?

- A) company stock share
- B) low-skilled labor
- C) coal
- D) an economist

Answer: A

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

52) Bonnie volunteers to help make floral arrangements at a flower shop. She is an example of

- A) entrepreneurial ability.
- B) labor.
- C) physical capital.
- D) human capital.

Answer: B

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

53) Bonnie is self-employed. She makes floral arrangements in a building she rents. She owns the delivery vehicle and has hired a delivery driver. She is an example of

- A) entrepreneurial ability.
- B) labor.
- C) physical capital.
- D) human capital.

Answer: A

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

54) Amy goes to college to become a nurse. This is an example of an

- A) investment in physical capital.
- B) investment in human capital.
- C) increase in entrepreneurship.
- D) increase in labor.

Answer: B

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

55) An irrigation system is installed on a farm in Idaho. This is an example of which factor of production?

- A) labor
- B) land
- C) human capital
- D) physical capital

Answer: D

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

56) Which of the following is NOT an example of investment in human capital?

- A) a business student's internship
- B) a mobile device for work
- C) A mechanic attends a training workshop on a new type of engine.
- D) Johnny learns how to read.

Answer: B

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

57) Bonnie has just opened a new business selling pet food online.

- A) Bonnie is an entrepreneur.
- B) Bonnie is not providing economic goods since people purchase the goods.
- C) Bonnie is not providing economic goods since pet food is not being sold in a store.
- D) Bonnie is not an entrepreneur since there are other businesses that sell pet food.

Answer: A

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

58) Which of the following is a TRUE statement?

- A) All goods are economic goods.
- B) All economic goods are goods, but not all goods are economic goods.
- C) Economic goods and goods mean the same thing.
- D) Economic goods do not include services while goods do include services.

Answer: B

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

59) Which of the following is NOT an economic good?

- A) a haircut
- B) broccoli
- C) garbage
- D) a textbook

Answer: C

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

60) John has decided to watch the sunrise tomorrow morning. The sunrise is an example of

- A) a good.
- B) an economic good.
- C) a service.
- D) an economic bad.

Answer: A

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

61) A typical economic good has which one of the following characteristics?

- A) The desired quantity exceeds the quantity available at a zero price.
- B) The quantity available exceeds the desired quantity at a zero price.
- C) It uses no resources to produce.
- D) It is never scarce.

Answer: A

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

62) A waitress brings a loaf of bread without charge when you sit down in a restaurant. This loaf of bread is

- A) a service because the waitress carried it instead of making it.
- B) a good, but not an economic good because there is no price charged for the bread.
- C) a bad because there is no price charged for the bread.
- D) an economic good because the bread is a scarce resource, even if it is free to you.

Answer: D

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

63) Which of the following is NOT a service?

- A) physical labor purchased by a producer
- B) things purchased by a consumer that do not have physical characteristics
- C) a diamond used in an engagement ring
- D) tasks performed by someone else

Answer: C

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

64) When an employee at a grocery store scans the price of your items, bags the groceries, and collects your paper, the individual has provided

- A) physical capital.
- B) entrepreneurship.
- C) a service.
- D) land.

Answer: C

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

65) The most basic concept of economics is

- A) money.
- B) scarcity.
- C) bounded rationality.
- D) shortage.

Answer: B

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

66) Scarcity exists because

- A) there is a temporary disruption in the market supply.
- B) there is a shortage of goods caused by a natural disaster.
- C) there are not enough resources available to produce all the goods that people want.
- D) there is a shortage of labor throughout the world.

Answer: C

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

67) Which of the following is the LEAST scarce?

- A) college education
- B) medicine
- C) gold deposits
- D) air

Answer: D

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

68) The fact that our wants are unlimited but our resources are limited implies that

- A) we should limit our wants.
- B) entrepreneurship has failed as an economic system.
- C) we have to make choices.
- D) the only way to make someone better off is to make someone else worse off.

AACSB: Analytical thinking

98) What is production? What economic factors are involved in production?

Answer: Production involves any activity that converts resources into goods and services that can be consumed. Production requires the use of all kinds of resources—natural resources, capital, and human resources, so the owners of all these resources are involved with production.

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

99) Briefly explain the difference between the concepts of scarcity and shortage.

Answer: Scarcity is not a shortage. Scarcity occurs when we cannot obtain all that we want at a zero price. We can eliminate a shortage but we cannot eliminate scarcity because it always exists as a result of limited resources relative to our unlimited wants.

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

100) Briefly explain the factors of production and give an example of each.

Answer: The factors of production are resources used as inputs in the production of the things we want. There are five factors of production. **Land** encompasses all the nonhuman gifts of nature, including timber, water, fish, minerals, and the original fertility of land. It is often called the *natural resource*. **Labor** is the *human resource*, which includes productive contributions made by individuals who work, such as Web page designers, ballet dancers, and professional football players. **Physical capital** consists of the factories and equipment used in production. It also includes improvements to natural resources, such as irrigation ditches. **Human capital** is the economic characterization of the education and training of workers. An example is a worker's skills. **Entrepreneurship** is the component of human resources that performs the functions of organizing, managing, and assembling the other factors of production to create and operate business ventures.

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

101) Explain why even the most affluent people, businesses and countries never solve the problem of scarcity.

Answer: Scarcity is a problem that is never completely solved. Scarcity means that we do not ever have enough of everything, including time, to satisfy our *every* desire. Thus even the most affluent have limited resources and unlimited wants even though they may have solved more of their wants with their larger amount of resources.

Diff: 3

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

102) Labor, human capital, and entrepreneurship are resources related to human beings.

Distinguish among the three resources.

Answer: Labor is the work done by human beings. Human capital refers to the worker education and training that makes human beings more productive. Whenever a worker's skills increase, there has been an improvement of human capital. Entrepreneurship refers to the use of human beings in organizing, managing, and assembling the other factors of production to make business ventures.

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

103) Distinguish between scarcity and shortages.

Answer: Scarcity exists because the wants of human beings are unlimited while resources are limited. The meaning of a shortage is not the same as scarcity. A shortage exists when people have to wait in line for things, especially on a temporary basis. Scarcity relates to the poor but also to the rich; scarcity is a fact of life that affects everyone. A shortage occurs when the quantity of a good desired exceeds the quantity available at a positive price.

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

105) "Economics is the study of how people eliminate scarcity." Do you agree or disagree? Why?

Answer: Disagree. Economics is the study of how people make choices because of scarcity. Scarcity cannot be eliminated because people do not ever have enough of everything to satisfy their every desire. Scarcity is a fact of life for both rich and poor.

Diff: 2

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

106) What does scarcity have to do with the fact that people must make choices?

Answer: Scarcity implies that people cannot have everything they want. This implies that ways must be found to determine which of the many goods that people want will actually be produced. Further, since any person cannot have everything he or she wants, the person must decide which specific things to acquire. That is, the person must make choices.

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

107) "Economics deals with human needs." Do you agree or disagree? Why?

Answer: Disagree. The concept of needs is difficult to define objectively for each person, so that economists consider people's unlimited wants instead of their needs.

Diff: 1

Topic: 2.1 Scarcity

Learning Outcome: Micro-1: Identify the basic principles of economics and explain how to think like an economist

AACSB: Analytical thinking

108) Explain the difference between human needs and wants.

Answer: Needs are objectively undefinable. Needs are the essentials of life: food, clothing, water and shelter. They are basics of life you can't live without. Needs are things you have to have, items you can't do without. Wants are things you desire to increase your level of happiness. They are not absolutely necessary. Humans have unlimited wants, and so they cannot have all of them given limited resources.

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

73) Briefly explain the concept of opportunity cost. What is the opportunity cost of attending college?

Answer: The opportunity cost of an action is the value of the next best alternative that a person has to give up when making a choice. The opportunity cost of attending college is what the college student would give up by going to school, such as the income she could have earned if she did not go to school.

Diff: 1

Topic: 2.2 Opportunity Cost, Trade-Offs, and Choices

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

74) How are scarcity, choice, and opportunity cost related?

Answer: Since resources are scarce, we cannot have everything we want. This implies that we must make choices. But when we choose one thing, we're prevented from choosing one or more other things. The highest-valued alternative good that we don't choose is the opportunity cost of the good we did select.

Diff: 2

Topic: 2.2 Opportunity Cost, Trade-Offs, and Choices

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

75) Suppose that nuclear power plants are banned. What are examples of the opportunity costs of this decision?

Answer: Electricity must be produced by some method, so if there are fewer nuclear plants, there will be more plants that use fossil fuels. There will be an increase in coal mining and petroleum production. Coal mining is hazardous and will increase the number of injuries and deaths, and the increased use of oil may generate more oil spills.

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

78) Both an NBA basketball player and a fast-food cook are going to graduate school. Who has a higher opportunity cost? Explain.

Answer: The opportunity cost is the income lost while going to graduate school. An NBA basketball player typically earns much more than does a fast-food cook so that the opportunity cost of going to graduate school is likely to be higher for the NBA basketball player than for the fast-food cook.

Diff: 2

Topic: 2.2 Opportunity Cost, Trade-Offs, and Choices

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

79) What does the slope of the production possibilities curve represent? Explain.

Answer: It represents the trade-off between two goods from two points on the PPC. Specifically, as we move from one point to another, in order to produce more of one good, we must trade-off or give up the other good. If the trade-off is constant, then the slope is constant along the PPC and the PPC is a straight line. If the trade-off increases, then the slope is increasing along the PPC and the PPC is bowed outward.

Diff: 1

Topic: 2.2 Opportunity Cost, Trade-Offs, and Choices

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

80) What does a production possibilities curve show?

Answer: A production possibilities curve shows the combinations of maximum outputs that can be produced with a fixed amount of resources that are fully employed, and fixed technology.

Diff: 1

Topic: 2.2 Opportunity Cost, Trade-Offs, and Choices

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

81) How can the concepts of opportunity costs, scarcity and choice be illustrated by the production possibilities curve?

Answer: The concept of opportunity cost is illustrated by movements along the production possibilities curve, meaning that producing more of one good necessarily means less production of another good. Because of scarcity, we can select a point on the PPC but are unable to reach points beyond the PPC due to limited resources. Choice is represented by the actual point chosen on the PPC from all the possible production points on the PPC.

102) Efficiency is defined as

- A) the maximum consumption of goods.
- B) the production of goods and services.
- C) the production of output at minimum cost.
- D) the most profits for companies.

Answer: C

Diff: 1

Topic: 2.3 The Economic Choices a Nation's People Face

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

103) For a country that produces two goods: Environmental clean-up goods and space program goods. What economic information is contained in its production possibility curve?

Answer:

The above figure illustrates the production possibility curve, which divides the area into two parts. The area beyond the PPC is unattainable, illustrating the concept of scarcity. The curve slopes down, indicating the fact that the only way to apply more resources to producing space program goods is to devote fewer resources to producing environmental clean-up goods. It is bowed out, illustrating increasing opportunity cost. Efficiency is illustrated when society is on the PPC rather than inside it.

Diff: 3

Topic: 2.3 The Economic Choices a Nation's People Face

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

104) What causes the production possibility curve to be bowed out?

Answer: A bowed production possibility curve indicates increasing opportunity costs. To produce more of one good, resources must be taken away from producing another good. These resources often are specialized. This implies that the resources cannot move easily from producing one good to another. The more of a good that is produced, the more it must use resources that are better suited for the other good, and the extra costs of producing another unit of the good increase.

Diff: 2

Topic: 2.3 The Economic Choices a Nation's People Face

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

105) Explain: "The law of increasing additional cost is an inevitable phenomenon in economics."

Answer: Economic resources are seldom suitable for all types of production. Hence, when society demands more of a particular good or service, an increase in the demand for the resources most adaptable to its production will rise; as more of the good is produced, eventually less efficient inputs will be pressed into production. It is the utilization of these less efficient inputs that gives rise to higher societal cost of production.

Diff: 2

Topic: 2.3 The Economic Choices a Nation's People Face

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

106) Explain the concept of the law of increasing additional cost.

Answer: The law of increasing additional cost is the fact that the opportunity cost of additional units of a good increases as society tries to produce more of that good. This accounts for the bowed-out shape of the production possibilities curve.

Diff: 1

Topic: 2.3 The Economic Choices a Nation's People Face

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

107) Explain what is meant by economic efficiency. Does efficiency imply that the fastest production processes or the most powerful equipment must always be used? Explain.

Answer: Efficiency involves a situation in which a given output is produced at lowest cost. Consequently, the fastest-operating or most powerful equipment may not always be efficient.

Diff: 3

Topic: 2.3 The Economic Choices a Nation's People Face

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

108) Why is a point below the production possibilities curve less efficient than a point on that curve?

Answer: A point on the production possibilities curve is efficient because it means the economy is producing the maximum outputs of goods and services with given resources and technology. By contrast, a point below the production possibility curve means that the use of the given resources is not generating the maximum possible outputs of goods and services. Thus, this point represents an inefficient combination of outputs produced with available resources and technology.

AACSB: Analytical thinking

37) If a country wants to promote future growth, it should

- A) produce more capital goods today.
- B) produce more consumer goods today.
- C) produce only economic goods.
- D) produce only needed goods.

Answer: A

Diff: 2

Topic: 2.4 Economic Growth, Production Possibilities, and the Trade-Off between Present and Future

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

38) "Because resources are scarce, the production of more capital goods means that fewer resources are available to produce consumption goods, so there is less current consumption." Do you agree or disagree? Explain.

Answer: Agree. Capital goods are goods that are used to produce other goods rather than for the sake of current consumption. The resources used to make capital goods are not available to produce current consumption goods, so there is less current consumption.

Diff: 2

Topic: 2.4 Economic Growth, Production Possibilities, and the Trade-Off between Present and Future

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

39) Explain briefly what will likely happen to society if it chooses to produce more capital goods and fewer consumption goods.

Answer: Because capital goods enable society to produce larger quantities of consumption goods, giving up some consumption goods in exchange for more capital goods today will result in larger production of consumption goods in the future.

Diff: 2

Topic: 2.4 Economic Growth, Production Possibilities, and the Trade-Off between Present and Future

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

40) Explain what will happen to the production possibilities curve over time if society gives up some consumption goods in favor of more capital goods.

Answer: If society chooses to give up some consumption goods in favor of more capital goods, then the production possibilities curve will shift outward over time. This happens because the capital goods can be used to produce more goods in the future.

Diff: 2

Topic: 2.4 Economic Growth, Production Possibilities, and the Trade-Off between Present and Future

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

41) Why does the trade-off between consumption goods and capital goods represent a trade-off between the present and the future?

Answer: This is because consumption goods are for current satisfaction but capital goods are goods that can be used for producing consumption goods in the future. Society that reduces the production of consumption goods in favor of capital goods will produce more consumption goods in the future.

Diff: 2

Topic: 2.5 Comparative Advantage and Maximizing Your Future Income

Learning Outcome: Micro-3: Discuss different types of market systems and the gains that can be made from trade

AACSB: Analytical thinking

65) Distinguish the concepts of comparative advantage and absolute advantage.

Answer: Comparative advantage is the ability to produce a good or service at a lower opportunity cost compared to other producers, while absolute advantage is the ability to produce more units of a good or service using a given quantity of labor or resource inputs. Comparative advantage is a relative concept and it is the basis for specialization.

Diff: 2

Topic: 2.5 Comparative Advantage and Maximizing Your Future Income

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

66) What is the "division of labor"? How is the division of labor related to production?

Answer: The division of labor occurs when resources specialize into specific tasks. Total output is greater when resources are specialized.

Diff: 2

Topic: 2.5 Comparative Advantage and Maximizing Your Future Income

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

67) Explain how comparative advantage, specialization and division of labor are related.

Answer: Comparative advantage is the ability to perform an activity at a lower opportunity cost. Specialization involves the organization of economic activity among different individuals and regions. Most individuals specialize based on their comparative advantage. The division of labor refers to the segregation of a workers into different specific tasks. The division of labor occurs when resources specialize into specific tasks. Total output is greater when resources are specialized.

Diff: 2

Topic: 2.5 Comparative Advantage and Maximizing Your Future Income

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

68) What is the difference between comparative advantage and absolute advantage?

Answer: Absolute advantage refers to the ability to produce a good with fewer total resources. Comparative advantage is the ability to produce at the lower opportunity cost. A comparative advantage exists when one has to give up fewer units of the other good than another person or country.

Diff: 3

Topic: 2.5 Comparative Advantage and Maximizing Your Future Income

Learning Outcome: Micro-20: Apply the concepts of opportunity cost, marginal analysis, and present value to make decisions

AACSB: Analytical thinking

70) Briefly explain how specialization and trade can benefit nations.

Answer: When nations specialize in producing goods for which they have a comparative advantage and then trade with other nations, their production possibilities curves move outward, which yields greater production and consumption possibilities.

Diff: 1

Topic: 2.5 Comparative Advantage and Maximizing Your Future Income

Learning Outcome: Micro-3: Discuss different types of market systems and the gains that can be made from trade

AACSB: Analytical thinking

71) Would a country with an absolute advantage in the production of all goods and services trade with other countries? Explain.

Answer: Yes. Trade is based on comparative advantage, not absolute advantage. While it is possible for a country to have an absolute advantage in all goods, it can only have a comparative advantage in one (based on a two good model). When nations specialize in what they have a comparative advantage and then trade with other nations, their production possibilities curves move outward, which yields greater production and consumption possibilities.

Diff: 3

Topic: 2.5 Comparative Advantage and Maximizing Your Future Income

Learning Outcome: Micro-3: Discuss different types of market systems and the gains that can be made from trade

AACSB: Analytical thinking

72) Politicians often argue that a country's standard of living is reduced when it allows imports into the country. Offer an economically sound counter-argument.

Answer: Specialization of labor is productive, so output is greater when people produce goods for which they have a comparative advantage—that is, goods for which the opportunity cost of producing is lower than others. They trade for those in which they do not have a comparative advantage. International trade based on comparative advantage then increases total output of the two countries and can result in higher standards of living for citizens of both countries.

Diff: 2

Topic: 2.5 Comparative Advantage and Maximizing Your Future Income

Learning Outcome: Micro-3: Discuss different types of market systems and the gains that can be made from trade

AACSB: Analytical thinking

73) What happens to overall living standards when countries trade with other countries?

Answer: When countries specialize in producing goods for which they have a comparative advantage and then trade with the rest of the world, then their living standards tend to rise as people can have more goods than before.

Diff: 1
