Solutions

Chapter 1

The Financial Statements

Ethics Check

(5-10 min.) EC 1-1

- a. Objectivity and independence
- b. Due care
- c. Integrity
- d. Integrity

Short Exercises

(10 min.) S 1-1

- a. Corporation, limited partners of a Limited-liability partnership (LLP) and Limited-liability company (LLC). If any of these businesses fails and cannot pay its liabilities, creditors cannot force the owners to pay the business's debts from the owners' personal assets. Creditors can go after the general partner of a limited liability partnership.
- b. *Proprietorship*. There is a single owner of the business, so the owner is answerable to no other owner.
- c. *Partnership*. If the partnership fails and cannot pay its liabilities, creditors can force the partners to pay the business's debts from their personal assets. A partnership affords more protection for creditors than a proprietorship because there are two or more owners to share this liability.

(5 min.) S 1-2

- 1. The *entity assumption* applies.
- 2. Application of the entity assumption will separate Osmond's personal assets from the assets of Simple Treats, Inc. This will help Osmond, investors, and lenders know how much assets, liabilities

and equity the business has, and this knowledge will help all parties evaluate the business realistically.

(5-10 min.) S 1-3

- a. Stable-monetary-unit assumption
- b. Historical cost principle; \$300 is the accounting value of the laptop
- c. Historical cost principle; the sale price is the amount actually received from the sale
- d. Entity assumption

(10 min.) S 1-4

Computed amounts in boxes

	Total Assets	=	Total Liabilities	+	Stockholders' Equity
a.	\$660,000	=	\$300,000	+	\$360,000
b.	85,000	=	50,000	+	35,000
C.	350,000	=	75,000	+	275,000

(5 min.) S 1-5

- 1. Liabilities = Assets Owners' Equity
- 2. Owners' Equity = Assets Liabilities

This way of determining the amount of owners' equity applies to any company or your household.

a. Land A g. Retained earnings S
b. Accrued expenses payable L h. Prepaid expenses A
c. Supplies A i. Accounts payable L
d. Equipment A j. Accounts receivable A
e. Notes payable L k. Merchandise inventory A
f. Long-term debt L l. Common stock S

(5-10 min.) S 1-7

(5-10 min.) S 1-6

1. *Assets* are the *economic resources* of a business that are expected to produce a benefit in the future.

Owners' (stockholders') equity represents the insider claims of a business, the owners' interest in its assets.

Assets and owners' equity *differ* in that assets are *resources* and owners' equity is a *claim to assets*.

Assets must be at least as large as owners' equity, so equity can be smaller than assets.

2. Both liabilities and owners' (stockholders') equity are *claims to* assets.

Liabilities are the *outsider* claims to the assets of a business; they are obligations to pay creditors.

Owners' equity represents the *insider* claims to the assets of the business; they are the owners' interest in its assets.

(5 min.) S 1-8

- 1. Revenues and expenses
- 2. Net income (or net loss)

(10 min.) S 1-9

- a. Salary expense ____I___
- b. Dividends R, C
- c. Accounts payable B
- d. Net income I, R, C
- e. Common stock B
- f. Inventory B
- g. Interest revenue I
- h. Cash <u>B, C</u>
- i. Retained earnings R, B
- j. Long-term debt <u>B</u>
- k. Increase or decrease in cash <u>C</u>
- I. Net cash provided by operating activities <u>C</u>
- m. Sales revenue I
- n. Net cash used for financing activities <u>C</u>

(15-20 min.) S 1-10

- a. Paying large dividends will cause retained earnings to be low.
- b. Heavy *investing activity* and *paying off debts* can result in a cash shortage even if net income has been high.
- c. The single best source of cash for a business is operating activities.

 This source of cash is best because it results from the core operations of the business. Operating activities should be the main source of cash for a business.
- d. Borrowing, issuing stock, and selling land, buildings, and equipment can bring in cash even when the company has experienced losses. Reducing accounts receivable and inventory can also increase cash flow.

(5 min.) S 1-18

Ethics is a factor that should be included in every business and accounting decision, beyond the potential economic and legal consequences. Ideally, for each decision, honesty and truthfulness should prevail, considering the rights of others. The decision guidelines at the end of the chapter spell out the considerations we should take when making decisions. Simply, we might ask ourselves three questions: (1) Is the action legal? (2) Who will be affected by the decision? (3) How will the decision make me feel afterward?

Asset (m) Economic resources that are

expected to produce a benefit in the

future

Balance sheet (I) Also called the statement of financial

Position

Bookkeeping (k) Mechanical part of accounting

Corporation (f) Owned by stockholders whose

liability is limited to the amount they

have invested in the business

Equity (r) Insider claims of a business

Ethical duties (d) Responsibilities of the members of

society to each other

Expenses (h) Costs of doing business

Financial accounting (b) Provides information for decision

makers outside of the organization

Historical cost principle (j) States that assets should be

recorded at their actual cost on the

date of purchase

Income statement (o) Answers the question "How well did

the company perform during the

period?"

Investors and creditors (n) Entities that provide money to

finance a company's operations

Liability (g)

A debt payable to an outsider

(continued) S 1-19

Managerial accounting (c) Provides information for managers of

the organization

Net income (a) Total revenues minus total expenses

Partnership (q) A business organization form with

two or more owners who are each

personally liable for all of the

business's debts

Proprietorship (i) A business organization form with a

single owner who is personally liable

for all of the business's debts

Revenues (e) Inflows of resources resulting from

delivering goods or services to

customers

Statement of cash flows (p) Reports cash flows from operating,

investing, and financing activities

Exercises

(10-15 min.) E 1-22A

Amounts in billions; (computed amounts in boxes)

			Stockholders'
	Assets	= Liabilities +	- Equity
Smythe Real Estate	\$73	\$41	\$32
Odessa Florals	26	11	15
Hometown Bank	29	14	15

Odessa Florals appears to have the strongest financial position because its liabilities make up the smallest percentage of company assets (\$11/\$26 = .42). Stated differently, Odessa Florals' equity is the highest percentage of company assets (\$15/\$26 = .58).

Liabilities as a percent of total assets:

Smythe Real Estate: \$41/\$73 = 0.56 Odessa Florals: \$11/\$26 = 0.42 Hometown Bank: \$14/\$29 = 0.48

SUBJECT: Opinion of net income, dividends, financial position,

and cash flows

Your first month of operations was successful. Revenues totaled \$278,700 and net income was \$193,300. These operating results look very strong.

The company was able to pay a \$2,800 dividend, and this should make you happy with so quick a return on your investment. Your financial position looks secure, with assets of \$214,200 and liabilities of only \$8,800. Your stockholders' equity is \$205,400.

Operating activities generated cash of \$194,700, which is outstanding. Operating activities are the main source of cash, which is expected for a thriving company. You ended the month with cash of \$5,300. Based on the above facts, I believe you should stay in business.

Student responses may vary.

SUBJECT: Opinion of net income, dividends, financial position, and

cash flows

Your first month of operations was successful. Revenues totaled \$279,300 and net income was \$193,600. These operating results look very strong.

The company was able to pay a \$2,700 dividend, and this should make you happy with so quick a return on your investment. Your financial position looks secure, with assets of \$213,500 and liabilities of only \$8,900. Your stockholders' equity is \$204,600.

Operating activities generated cash of \$195,000, which is respectable. Operating activities are the main source of cash, which is expected for a thriving company. You ended the month with cash of \$6,000. Based on the above facts, I believe you should stay in business.

- 1. The Cheesecake Factory is organized as a corporation, per the name of the business ("Incorporated").
- 2. Net income flows from the Income Statement to the Statement of Retained Earnings.
- 3. Ending retained earnings flows from the Statement of Retained Earnings to the Balance Sheet
- 4. Ending cash and cash equivalents flows from the Statement of Cash Flows to the Balance Sheet
- 5. The Cheesecake Factory earned net income of \$127,293 (in thousands) in fiscal 2019. This income was earned from January 1, 2019 to December 31, 2019.
- 6. The Cheesecake Factory's accounting equation (in thousands):

7. Cheesecake Factory had \$2,840,593 (Total Assets) to work with and owes \$2,268,851* (Total Liabilities) to creditors. (Numbers in thousands)

*(\$614,587 + \$1,654,264 = \$2,268,851)

Decision Cases

(30-40 min.) C1-77

Req. 1

Based solely on these balance sheets, Insley Sales Co. appears to be the better credit risk because:

- 1. Queens Service has more assets (\$150,000) than Insley Sales (\$65,000), but Queens Service owes much more in liabilities (\$130,000 versus \$15,000 for Insley Sales). Insley Sales' stockholders' equity is far greater than that of Queens Service (\$50,000 compared to \$20,000). Insley Sales is not heavily in debt, but Queens Service is.
- 2. You would be better off granting the loan to Insley Sales. You should consider what will happen if the borrower cannot pay you back as planned. Queens Service has far more liabilities to pay, and it may be hard for Queens Service to come up with the money to pay you. On the other hand, Insley Sales has little debt to pay to others before paying you.

Student responses may vary.

Expenses 140,000 ²	Other assets <u>90,000</u> ³ S/H Equity <u>26,000</u> ⁵					
•	Total liabilities					
Net income <u>\$ -0-</u>	Total assets <u>\$96,000</u> and S/H equity <u>\$96,000</u>					
1\$100,000 + \$40,000 = \$140,000						
2 \$80,000 + \$50,000 + \$10,000 = \$140,000						
3 \$100,000 - \$50,000 + \$40,000 = \$90,000						
⁴ \$60,000 + \$10,000 = \$70,000						
⁵ \$96,000 - \$70,000 = \$26,000						

Req. 2

The company's *financial position* is much *weaker* than originally reported. Assets and stockholders' equity are lower and liabilities are higher. *Results of operations* are *worse* than reported. The company did not earn any profit.

Req. 3

Based on the actual figures, I would *not* invest in Flowers Unlimited for reasons given in *Req. 2*.

Ethical Issue

(40-50 min) C1-79

Note to instructor: student responses will vary on this problem. Keep the discussion pointed toward use of the multiple-criteria model for making good ethical decisions, pointing out elements of students' reasoning that may be faulty or incomplete. It might be useful to have a debate or role play, assigning students to different sides of the issue (for or against accepting a copy of the exam).

Req. 1

The fundamental ethical issue in this situation is whether you should accept a copy of the old exam from your friend.

Req. 2

The stakeholders are:

- a. You
- b. Your friend
- c. The remainder of the students in the class
- d. The professor
- e. The University
- f. Your family

(This may not be a complete list; you may think of more.)

Consequences are discussed in requirement 3.

(continued) C1-79

Req. 3

Analysis of the problem:

Economic perspective: If use of the old exam turns out to help you (it may not) you might improve your grade and allow you to retain your scholarship. This might help you and your family financially. If you use the exam to your unfair advantage, and you are reported, you and possibly your friend might receive grades of F in the class although you might otherwise have passed. This could cause adverse economic consequences to you, your friend and your families.

Legal perspective: Although it may not violate local or federal law, giving or accepting copies of old exams may violate the university's honor code, which serves the same purpose as a legal code in this case. If you use the old exam and it turns out that you violated the University's honor code, both you and your friend could be in trouble. Your family and your friend's family could also be impacted by any adverse consequences to you or her. Academic institutions establish policies against academic dishonesty because cheating hurts everyone—the student who commits the act, the other students in the class whose rights to fair treatment are violated by cheating, and the professor who must endure hours of investigating, reporting, and perhaps testifying.

Ethical perspective: Receiving questionable help from others in the face of policies that prohibit it is, at best, risky, and at worst, downright wrong. Cheating is similar to stealing, since it is stealing

(continued) C1-79

the work of another without their permission. It is usually accompanied by lying to cover it up, or at least, not revealing the truth. Cheating violates other students' rights to fair and equal treatment. It violates the instructor's rights to run a course as a "fair game" for all participants. Because the students and faculty are hurt by cheating, the university is hurt too. If cheating goes unpunished, grades are inflated, ultimately damaging the academic reputation of the institution and eroding the value of its degrees. Parents of students who are caught cheating have to endure the agony of working through the problem with their son or daughter, and perhaps the social stigma that comes from adverse publicity.

These are just some of the arguments against cheating. Of course, there is a question in this case as to whether taking the test actually violates the professor's or the university's policies.

Req. 4

It would be helpful to find out what the professor's policies are with respect to the use of fraternity and sorority test files. The university might have a blanket policy on this. (Some students might spend a little time researching this by reading the university's honor code on their web site; just reading the honor code will be an eye-opening

experience for most students). Advise your students to research the use of fraternity and sorority test files on the university web site, or to (continued) C1-79

discuss the issue with the head of the department or the chair of the university honor council.

Unfortunately, in this case, there is not much time. Researching the issue in the university's honor code takes valuable time away from studying for the exam, which, if you do, could help you raise your grade and solve the whole problem!

Probably the best solution to this problem is "when in doubt, don't." You may not do well on the test, but at least you won't have to live with the terrible consequences of being accused as a cheater. It should make you feel better in the long run that, although you may not make the highest grades in the class, at least you are not a cheater.

Req. 5

Cheating is very closely related to stealing, which is a form of fraud. When employees steal from their companies, they steal property that belongs to others. There are economic, legal, and ethical consequences to the company, the employee and their families, and customers (who ultimately have to pay for fraud through higher prices). We will study fraud in depth in Chapter 4.

Focus on Financials: Apple Inc.

(20-30 min.) C1-80

- 1. Students can emphasize a variety of points regarding Apple Inc., and its industry. For example, a discussion on the product innovation and competitive changes in technology would be appropriate. Additionally, discussing recent news articles related to Apple or its competitors would also be appropriate. Student answers will vary.
- 2. Some important information in this portion of the financials is the description of their distribution channels (third-party resellers), competitors (product innovation, market opportunities, etc.), and supply chain (shortages, component availability, outsourcing, etc). Additionally, the seasonality of Apple's business is important to note given that it has higher sales in its first quarter relative to the last three. Lastly, it may come as a surprise that Apple employs approximately 137,000 full-time employees. (Student answers will vary.)
- 3. Samsung, Google, Sony, or HP are some of Apple Inc.'s competitors. It is important to identify competitors because competitors tend to have similar business dynamics to one another, meaning that their financial statements can be compared to and benchmarked against each other. Student answers will vary.

(continued) C1-80

- 4. *Net income*, because it shows the overall result of all the revenues minus all the expenses for a period. In effect, net income gives the results of operations in a single figure and shows whether the company has been profitable. Apple's net income after taxes decreased from \$59.5 billion in 2018 to \$55.3 billion in 2019, which is unfavorable.
- 5. Apple Inc.'s largest expense is cost of sales. The company has cost of sales for products and cost of sales for services. The former is the cost of the products that the company sells, such as iPhones, iPads, Apple TVs, software, and Mac desktops. The cost of sales for services pertains to the cost of services that Apple provides such as iCloud, Siri, and Maps. Another title of this account is cost of goods sold. In this chapter, The Walt Disney Company called this account cost of products and cost of services.
- 6. Total resources (total assets) at September 28, 2019.....\$338,516 million

Amount owed (total liabilities) at September 28, 2019....\$248,028 million

Portion of the company's assets owned by the stockholders (stockholders' equity) at September 28, 2019......\$90,488 million

Apple Inc.'s accounting equation (in millions):

Asse \$338,

(continued) C1-80

7. At September 29, 2018, Apple Inc. had \$25,913 million of cash and cash equivalents. At September 28, 2019, Apple Inc. had \$48,844 million of cash and cash equivalents.

Focus on Analysis: Under Armour, Inc.

(30 min.) C1-81

- 1. Under Armour, Inc. is an athletic apparel company. Students can emphasize a variety of points regarding Under Armour, Inc. and its industry. For example, a discussion on the brand, new product development, etc. would be appropriate. Additionally, discussing recent news articles related to Under Armour or its competitors would also be appropriate. (Student answers will vary.)
- 2. Note 1 states Under Armour is a developer, marketer and distributor of branded performance apparel, footwear, and accessories. These products are sold worldwide and worn by athletes of all levels and consumers with active lifestyles.
- 3. Nike, Adidas, and Columbia Sportswear are some of Under Armour, Inc.'s competitors. It is important to identify competitors because competitors tend to have similar business dynamics to one another, meaning that their financial statements can be compared to and benchmarked against each other. (Student answers will vary.)

(continued) C1-81

4. Under Armour, Inc.'s Accounting Equation (in thousands):

Assets = Liabilities + Shareholders' Equity

\$4,843,531 = \$2,693,444 + \$2,150,087

If we express the numbers in millions:

Assets = Liabilities + Shareholders' Equity

\$4,843 = \$2,693 + \$2,150

Under Armour, Inc. appears to be in strong financial condition. Total assets are significantly higher than the amount of total liabilities. This suggests that the company will have no difficulty paying its debts and will have money to expand.

- 5. The result of operations for 2019 was a net income of \$92,139 thousand, following two years of net losses. This is good news for Under Armour, Inc. Revenue exceeded expenses for fiscal 2019, and there appears to be a reversal of the company's fortunes from previous years. It is too early to tell, however, whether profitability is a trend.
- 6. According to Under Armour, Inc.'s Consolidated Statements of Stockholders' Equity, the cause of the company's increase in retained earnings during 2019 was comprehensive income of \$92,139 thousand. (Comprehensive income is closely related to net income.)

7. The Consolidated Balance Sheets report cash and cash equivalents as part of the company's financial position. The Consolidated (continued) C1-81

Statements of Cash Flows tell why cash and cash equivalents increased or decreased. Operating activities provided \$509,031 thousand, investing activities used \$147,113 thousand, and financing activities used \$137,070 thousand.

Group Projects

Student responses will vary.

Chapter 1: The Financial Statements

Learning Objectives

- 1. **Explain** why accounting is critical to business
- 2. Explain and apply underlying accounting concepts, assumptions, and principles
- 3. **Apply** the accounting equation to business organizations
- 4. Construct financial statements and analyze the relationships among them
- 5. Evaluate business decisions ethically
- 6. **Identify** tools and technologies used in accounting and business

Chapter Outline

- I. Accounting Critical to Business
 - A. Decision makers
 - 1. Individuals
 - 2. Investors and creditors
 - 3. Regulatory bodies
 - 4. Nonprofit organizations
 - B. Financial accounting vs. management accounting
 - C. Organizing a business
 - 1. Proprietorship
 - 2. Partnership
 - 3. Limited-liability company
 - 4. Corporation
- II. Underlying Accounting Concepts, Assumptions, and Principles
 - A. Financial Accounting Standards Board (FASB)/Generally Accepted Accounting Principles (GAAP)
 - B. International Accounting Standards Board (IASB)/International Financial Reporting Standard (IFRS)
 - C. Fundamental qualitative characteristics
 - 1. Relevance
 - 2. Faithful representation
 - D. Enhancing (supplementary) qualitative characteristics
 - 1. Comparability
 - 2. Verifiability
 - 3. Timeliness
 - 4. Understandability
 - E. Cost/benefit
 - F. Entity assumption

- G. Continuity (going-concern) assumption
- H. Historical cost principle
- I. Stable-monetary-unit assumption
- III. Application of the Accounting Equation (Assets = Liabilities + Equity)
 - A. Assets economic resources with future benefit
 - B. Liabilities "outsider claims"
 - C. Owners' equity "insider claims"
 - 1. Paid-in capital
 - 2. Retained earnings
 - a. Revenues
 - b. Expenses
 - c. Dividends
- IV. Construct Financial Statements and Analyze the Relationships Among Them
 - A. The Income Statement (Revenues Expenses = Net Income (Net Loss))
 - 1. Revenues and
 - 2. Gains
 - 3. Expenses and
 - 4. Losses
 - B. Statement of Retained Earnings (Beginning Retained Earnings + Net Income
 Dividends = Ending Retained Earnings)
 - C. Balance Sheet (Assets = Liabilities + Equity)
 - 1. Assets
 - a. Current assets
 - b. Long-term (non-current) assets
 - 2. Liabilities
 - a. Current liabilities
 - b. Long-term liabilities
 - 3. Stockholders' equity
 - a. Paid-in capital (common stock and additional paid-in capital)
 - b. Retained earnings
 - c. Sometimes, Treasury stock and/or Other equity
 - D. Statement of Cash Flows (Net cash flow from (Operating Activities + or Investing Activities + or Financing Activities) + Beginning Cash balance = Ending Cash balance)
- V. Evaluate Business Decisions Ethically
 - A. The role of judgment
 - B. Economic factors
 - C. Legal factors
 - D. Ethical factors
 - E. AICPA Code of Professional Conduct

- VI. Identify Tools and Technologies Used in Accounting and Business
 - A. Spreadsheets
 - B. Data Analytics
 - C. Artificial Intelligence (AI) and Machine Learning
 - D. Robotic Process Automation (RPA)
 - E. Technology Risks
 - F. Introduction to Excel

Chapter Activities

1. Chapter Opener

Chapter 1 spotlights The Walt Disney Company and details the services and products the worldwide entertainment corporation provides and sells, its network of theme parks, movies, and stores, and financial information for the year ended September 28, 2019. Additionally, the section introduces the terms "revenues" and "net income." Discuss with the students the many different ways Disney generates revenues as they produce and provide entertainment; mention the services and goods that the company sells and the prices related to those items. Talk about the flow of revenues from goods and services sold to the financial statements and how those revenues become part of net income. Visit https://www.disney.com and read about the company's many different sources of revenues. From the company's website, https://thewaltdisneycompany.com, you can also download the most current annual report. Throughout this chapter, there are many references to information from Disney's financial statements.

Additionally, ask the students what information they would need from the financial statements if they had \$10,000 to invest. How would they decide if The Walt Disney Company was a good investment?

2. Accounts Activity

On slips of paper, list accounts and distribute one slip of paper to each student. You can use the following chart of accounts as an example:

Cash

Accounts Receivable

Inventory

Prepaid Rent

Office Supplies

Land

Automobiles

Buildings

Patents

Copyrights

Trademark

Accounts Payable

Income Taxes Payable

Interest Payable

Notes Payable

Salaries and Wages Payable

Bonds Payable

Common Stock

Retained Earnings
Sales Revenue
Interest Revenue
Rent Revenue
Advertising Expense
Commissions Expense
Cost of Goods Sold
Depreciation Expense
Income Tax Expense
Insurance Expense
Interest Expense
Salary and Wage Expense
Supplies Expense
Dividends
Dividends Payable

Divide the room up into five areas: assets, liabilities, stockholders' equity, revenues, and expenses. Ask the students to move to their particular area of the room depending on what account types they have been assigned. Quiz each student to confirm that he or she is in the correct section of the room. Move the students accordingly if they are in the wrong section. Repeat the exercise by dividing the room into a balance sheet section and an income statement section. Again, quiz the students to confirm that they are in the correct area for that particular financial statement and move them, if necessary.

Difficult Topics

• Statement of Cash Flows

Chapter 1: Assignment Grid

						ve an X if ilable)
Assignment	Topic(s)	L.O.	Estimated Time (minutes)	Level of Difficulty	Excel Projects	General Ledger Templates
S1-1	Explain and differentiate between business organizations	1	10	Easy

Answer Key to Chapter 1 Quiz (Quiz on following pages.)

- 1. A
- 2. B
- 3. C
- 4. D
- 5. A
- 6. D
- 7. A
- 8. C
- 9. A
- 10. D
- 11. D

Name	Date
Section	

CHAPTER 1 10-MINUTE QUIZ

Circle the letter of the best response.

- 1. Which of these is a liability?
 - A. Long-Term Debt
 - B. Accounts Receivable
 - C. Cash
 - D. Inventory
- 2. Assumption that any organization or person that stands apart as a separate economic unit:
 - A. Continuity (going-concern) assumption.
 - B. Entity assumption.
 - C. Stable-monetary-unit assumption.
 - D. Historical cost principle.
- 3. Which financial statement is sometimes known as the statement of financial position?
 - A. Income Statement
 - B. Statement of Retained Earnings
 - C. Balance Sheet
 - D. Statement of Cash Flows
- 4. If total liabilities decreased by \$100,000 and total assets decreased by \$180,000 during the same accounting time period, what happened to total owners' equity during this period?
 - A. \$180,000 increase
 - B. \$180,000 decrease
 - C. \$80,000 increase
 - D. \$80,000 decrease
- 5. The equation for the Income Statement is:
 - A. Net Income = Total Revenues and Gains Total Expenses and Losses
 - B. Net Income = Total Revenues and Gains + Total Expenses and Losses
 - C. Net Income = Total Revenues and Losses Total Expenses and Gains
 - D. Net Income = Total Revenues and Losses +Total Expenses and Gains

- 6. Jennie Browne the owner of a small business. She has decided to save money during her initial years of operation by not hiring a professional accountant. She does not add noncash types of compensation included in some of the costs of her assets. Which accounting principle, concept, or assumption does this violate?
 - A. Entity assumption
 - B. Continuity (going-concern) assumption
 - C. Stable-monetary-unit assumption
 - D. Historical cost principle
- 7. The _____ states that accountants should assume that the dollar's purchasing power is stable over time.
 - A. Stable-monetary-unit assumption
 - B. Continuity (going-concern) assumption
 - C. Historical cost principle
 - D. Entity assumption
- 8. Which section of the balance sheet contains retained earnings and paid-in capital?
 - A. Assets
 - B. Liabilities
 - C. Stockholders' Equity
 - D. Long Term Assets
- 9. Listed below are the account balances of the Spark Corporation:

Accounts Payable	\$ 63,000
Building	190,000
Cash	88,000
Common Stock	150,000
Dividends	5,000
Land	160,000
Miscellaneous Expense	3,000
Service Revenue	250,000
Equipment	35,000
Note Payable due in 60 days	125,000
Long-Term Debt	13,000
Salary Expense	120,000

Total Assets are:

- A. \$473,000.
- B. \$438,000.
- C. \$248,000.
- D. \$385,000.

10. Listed below are the account balances of the Golden Corporation:

Accounts Payable	\$ 75,000
Cash	100,000
Common Stock	200,000
Dividends	10,000
Land	170,000
Miscellaneous Expense	10,000
Service Revenue	147,000
Equipment	130,000
Note Payable due in 90 days	60,000
Long-Term Debt	15,000
Salary Expense	87,000

Net Income (Net Loss) is:

- A. \$60,000
- B. \$40,000
- C. (\$18,000)
- D. \$50,000

Alternative Multiple-Choice Question on new Learning Objective

- 11. What is the most widely used program in business for spreadsheets?
 - A. Robotic Process Automation (RPA)
 - B. Data Analytics
 - C. Apple Numbers
 - D. Microsoft Excel
