LO: 2.7: Discuss the benefits of a firm of having a clear vision and mission statements.

AACSB: Analytical thinking

116) Explain the process of developing vision and mission statements.

Answer: A widely used approach to develop a mission statement is first to select several articles as background information for managers to read. Then managers themselves are asked to prepare a mission statement for the organization. A facilitator or committee of top managers should then merge these statements into a single document and distribute this draft mission statement to all managers. A request for modifications, additions and deletions is needed next, along with a meeting to revise the document. To the extent that all managers have input into and support the final mission statement document, organizations can more easily obtain managers' support for other strategy formulation, implementation and evaluation activities.
