Key Terms (Chapter 1)

Atheism: the view that God does not exist.

Conventional morality: the system of widely accepted rules and principles that members of a culture or society use to govern their own lives and to assess the actions and the motivations of others.

Critical morality: a set of moral norms that (i) does not have its origin in social agreements; (ii) is untainted by mistaken beliefs, irrationality, or popular prejudices; and (iii) can serve as the true standard for determining when conventional morality has got it right and when it has fallen into error.

Divine Command Theory: the view that an act is morally required just because it is commanded by God, and immoral just because God forbids it.

Norms: standards that we ought to live up to

Normative system: a set of norms, that is, a set of standards for how we ought to behave, ideals to aim for, rules that we should not break.

Omniscient: all-knowing.

Theists: those who believe that God exists.

Key Terms (Chapter 2)

Antecedent: the “if” clause of a conditional; the clause that specifies a sufficient condition of the conditional’s consequent.

Argument: a chain of thought in which reasons are offered in support of a particular conclusion.

Biconditional: a claim that supplies a condition that is both necessary and sufficient for something; an “if and only if” sentence.

Conditional: an if–then sentence.

Consequent: the “then” clause of a conditional; it specifies a necessary condition of the conditional’s antecedent.

Hypothetical syllogism: An argument of the form: if P, then Q; If Q, then R; therefore, If P, then R.

Logical validity: the feature of an argument that guarantees the truth of its conclusion, on the assumption that its premises are true.

Modus ponens: An argument of the form: If P, then Q; P; therefore, Q.

Modus tollens: An argument of the form: if P, then Q; Q is false; therefore, P is false.

Necessary condition: a requirement, a prerequisite, a precondition

Premises: the reasons within an argument that, taken together, are meant to support the argument’s conclusion.

Sufficient condition: a guarantee.

Soundness: the feature that arguments have when they are logically valid and all of their premises are true.
