## CHAPTER LEARNING OBJECTIVES

1. **Identify the sections of a classified balance sheet.** In a classified balance sheet, companies classify assets as current assets; long-term investments; property, plant, and equipment; and intangibles. They classify liabilities as either current or long-term. A stockholders' equity section shows common stock and retained earnings.
2. **Use ratios to evaluate a company's balance sheet.** Ratio analysis expresses the relationship among selected items of financial statements data. Liquidity ratios, such as the current ratio, measure the short-term ability of a company to pay its maturing obligations and to meet unexpected needs for cash. Solvency ratios, such as the debt to assets ratio, measure the ability of a company to survive over a long period.

Current liabilities:  $\$600 + \$200 + (\$450 \times 12) = \$6,200$

Current ratio:  $\$2,200 / \$6,200 = .35:1$

Working capital:  $\$2,200 - \$6,200 = (\$4,000)$

- (a) Comment on the relative profitability of the companies by computing the net income for each company for 2022.
- (b) Comment on the relative solvency of the companies by computing the debt to assets ratio for each company for 2022.

Ans: N/A, LO: 2, Bloom: AN, Difficulty: Medium, Min: 15, AACSB: Analytic, AICPA BB: Governance Perspective, AICPA FC: Measurement Analysis and Interpretation, AICPA PC: None, IMA: Business Economics

**Solution 113**

- (a) Arthur Company appears to be more profitable. Its net income for 2022 is \$228,000 (\$1,850,000 – \$1,225,000 – \$303,000 – \$9,000 – \$85,000). Lancelot's net income for 2022 is \$116,400 (\$620,000 – \$365,000 – \$98,000 – \$3,800 – \$36,800).
- (b) Arthur appears to be slightly more solvent. Arthur's 2022 debt to assets ratio of 22.4% ( $\$214,825 \div \$959,200$ )<sup>a</sup> is lower than Lancelot's ratio of 24.1% ( $\$64,968 \div \$270,064$ )<sup>b</sup>. The lower the percentage of debt to assets, the lower the risk that a company may be unable to pay its debts as they income due.

<sup>a</sup>\$214,825 (\$66,325 + \$148,500) is Arthur's 2022 total liabilities

\$959,200 (\$427,200 + \$532,000) is Arthur's 2022 total assets.

<sup>b</sup>\$64,968 (\$35,348 + \$29,620) is Lancelot's 2022 total liabilities

\$270,064 (\$130,336 + \$139,728) is Lancelot's 2022 total assets.

The following information is available from the annual reports of Marin Company and Nance Company.

	(amounts in millions)	
	<u>Marin</u>	<u>Nance</u>
Sales	\$26,510	\$34,512
Gross profit	6,610	8,887
Net income	565	1,221
Current assets	13,712	28,447
Beginning total assets	17,102	33,130
Ending total assets	22,088	36,167
Current liabilities	7,966	13,950
Total liabilities	16,136	29,222

**Instructions**

- (a) For each company, compute the following ratios:
- Current ratio
  - Debt to assets ratio
- (b) Based on your calculations, discuss the relative liquidity and solvency of the two companies.

Ans: N/A, LO: 2, Bloom: AP, Difficulty: Medium, Min: 12, AACSB: Analytic, AICPA BB: Governance Perspective, AICPA FC: Measurement Analysis and Interpretation, AICPA PC: None, IMA: Business Economics

**Solution 114**

(a)	<u>Marin</u>	<u>Nance</u>
1. Current ratio	1.72:1 ( $\$13,712 \div \$7,966$ )	2.04:1 ( $\$28,447 \div \$13,950$ )
2. Debt to assets ratio	73% ( $\$16,136 \div \$22,088$ )	81% ( $\$29,222 \div \$36,167$ )

- (b) Based on the current ratio, Nance is more liquid than Marin since its current ratio (2.04:1) is 19% higher than Marin's ratio (1.72:1). However, Marin would be considered more solvent than Nance since its debt to assets ratio (73%) is 10% lower than Nance's debt ratio (81%). A lower debt to assets ratio indicates a company is more solvent and better able to survive over a long period of time.

**Solution 115**

$$(a) \quad \text{Current ratio} = \frac{\$60,000}{\$40,000} = 1.50:1 \quad (\text{Cash} + \text{Acc. rec.} + \text{Prep. ins.} \div \text{Cur. liab.})$$

$$\text{Working capital} = \$60,000 - \$40,000 = \$20,000 \quad (\text{Cash} + \text{Acc. rec.} + \text{Prep. ins.} - \text{Cur. liab.})$$

$$(b) \quad \text{Current ratio} = \frac{\$40,000^*}{\$20,000^{**}} = 2.0:1$$

$$\text{Working capital} = \$40,000 - \$20,000 = \$20,000$$

$$^*\$60,000 - \$20,000 \quad ^{**}\$40,000 - \$20,000$$

## SHORT-ANSWER ESSAY QUESTIONS

### S-A E 123

Identify the two parts of stockholders' equity in a corporation and indicate the purpose of each.

Ans: N/A, LO: 1, Bloom: K, Difficulty: Medium, Min: 5, AACSB: Communication, AICPA BB: Governance Perspective, AICPA FC: Reporting, AICPA PC: Communication, IMA: Reporting

### Solution 123

The two parts of stockholders' equity and the purpose of each are: (1) Common stock is used to record investments of assets in the business by the owners (stockholders). (2) Retained earnings is used to record net income retained in the business.

### S-A E 124

What do these classes of ratios measure?

- (a) Liquidity ratios.
- (b) Solvency ratios.

Ans: N/A, LO: 2, Bloom: K, Difficulty: Medium, Min: 5, AACSB: Communication, AICPA BB: Governance Perspective, AICPA FC: Reporting, AICPA PC: Communication, IMA: Business Economics

### Solution 124

- (a) Liquidity ratios measure the short-term ability of the company to pay its maturing obligations and to meet unexpected needs for cash.
- (b) Solvency ratios measure the company's ability to survive over a long period of time.

### S-A E 125

Give the definition of current assets, current liabilities and the current ratio.

Ans: N/A, LO: 1, 2, Bloom: K, Difficulty: Medium, Min: 5, AACSB: Communication, AICPA BB: Governance Perspective, AICPA FC: Reporting, AICPA PC: Communication, IMA: Business Economics

### Solution 125

Current assets are cash or other resources that are reasonably expected to be realized in cash or sold or consumed in the business within one year or the operating cycle, whichever is longer. Current liabilities are obligations reasonably expected to be paid from the existing current assets or through the creation of other current liabilities within the next year or operating cycle, whichever is longer. The current ratio is a measure used to evaluate a company's liquidity and short-term debt paying ability, computed by dividing current assets by current liabilities.

**S-A E 126**

Are short-term creditors, long-term creditors, and stockholders primarily interested in the same characteristics of a company? Explain.

Ans: N/A, LO: 2, Bloom: C, Difficulty: Medium, Min: 5, AACSB: Communication, AICPA BB: Governance Perspective, AICPA FC: Reporting, AICPA PC: Communication, IMA: Business Economics

**Solution 126**

The three parties are not primarily interested in the same characteristics of a company. Short-term creditors are primarily interested in the liquidity of the enterprise. In contrast, long-term creditors and stockholders are primarily interested in the solvency of the company.

**S-A E127 (Ethics)**

Many bonus plans are based upon the attainment of some specified short-term goal. For example, some employees in the finance area at Metal Crafters are given a bonus of 5% if the current ratio is 1.2 or greater. Sometimes the attainment of these goals is achieved by methods detrimental to the long-term needs of the company. Sales representative Sara Crown, for example, authorizes payment, on 12/30, of a current liability earlier than usual to increase the current ratio from 1.15 (\$300,000/\$260,000) to 1.2 (\$240,000/\$200,000). She complains that the bonus system itself is unethical.

**Required:**

Is a bonus system like the one at Metal Crafters unethical? Explain.

Ans: N/A, LO: 2, Bloom: E, Difficulty: Medium, Min: 5, AACSB: Ethics, AICPA BB: Governance Perspective, AICPA FC: None, AICPA PC: Ethical Conduct, IMA: Performance Measurement

**Solution 127**

The bonus system described is not necessarily unethical, but it may be short-sighted. When employees are able to manipulate financial numbers to obtain bonuses by performing actions which may not be in the best interest of the company, then the bonus system is not working as intended. While the bonus system may not be unethical, it could encourage employees to act unethically in order to receive the bonus. For Sara Crown to authorize a payment earlier than is normal within the company's normal procedures would be unethical on her part. She is required to use integrity, even when the possibility exists of her not using it, and even when she might gain by not using it.
