## Matching Questions

67) Match the 5 financial statement user groups listed below (A-E) with the 5 goals (1-5) that follow.

### Users

- A bankers
- B equity investors
- C government agencies
- D customers
- E managers

- \_\_\_\_\_ 1. Purchase ownership securities in a company that earn returns higher than fixed income instruments
- \_\_\_\_\_ 2. Accurately predict future cash flows necessary for repayment
- \_\_\_\_\_ 3. Determine how much tax a company must pay
- \_\_\_\_\_ 4. Purchase the best product possible for the money
- \_\_\_\_\_ 5. Achieve a high level of compensation

Answer:

- 1. B
- 2. A
- 3. C
- 4. D
- 5. E

Title/Media Ref.: Matching Question 1 / None

68) For each description listed in items 1 through 4 below, select the letter of the accounting term (A through F) it best describes. You may use each letter more than once.

Accounting Terms

- A Asset
- B Liability
- C Retained earnings
- D Revenues
- E Expenses
- F Shareholders' equity

- \_\_\_\_\_ 1. Total past earnings less the amount distributed to owners
- \_\_\_\_\_ 2. A measure of assets generated (or liabilities extinguished) from the product and services sold
- \_\_\_\_\_ 3. Dollar amount owed at a given point in time and must be paid in the future
- \_\_\_\_\_ 4. Total assets less total liabilities

Answer:

- 1. C
- 2. D
- 3. B
- 4. F

Title/Media Ref.: Matching Question 2 / None

69) Identify which accounting document(s) listed in A through D contain the information described in the items 1 through 5 below. You may use each letter more than once or not at all. Some items may require more than one answer.

Accounting Documents

- A Auditor's report
- B Management letter
- C Financial statements
- D Footnotes

- \_\_\_\_\_ 1. Represents that the financial statements are stated fairly, in all material respects
- \_\_\_\_\_ 2. Indicates that financial statements were prepared in conformity with GAAP
- \_\_\_\_\_ 3. Contains assets, liabilities, and equity, as well as income from operations
- \_\_\_\_\_ 4. Explains certain items on the balance sheet
- \_\_\_\_\_ 5. An acceptance of responsibility for the financial information provided

Answer:

- 1. A
- 2. A, B, D
- 3. C
- 4. D
- 5. B

## Short Problem Questions

94) Bricklin Company has \$700 in its checking account. A customer owes Bricklin \$1,100. The company has store equipment that cost \$1,600 and a truck that cost \$5,200. Bricklin Company owes the bank \$3,600 on the truck loan of which one payment of \$900 is due in one week and owes \$4,200 to creditors for its monthly operating expenses, including rent, all of which is due in the next 30 days.

- A. List Bricklin Company's assets and the dollar amount of each.
- B. List Bricklin Company's liabilities and the dollar amount of each.
- C. Is Bricklin Company solvent? Explain.

Answer:

A.

### ASSETS

Cash	\$ 700
Accounts receivable	1,100
Truck	5,200
Store equipment	<u>1,600</u>
Total	<u>\$8,600</u>

B.

### LIABILITIES

Note payable (truck loan)	\$3,600
Accounts payable	<u>4,200</u>
Total	<u>\$7,800</u>

C. Solvency is the ability of a company to generate cash in order to meet its debts as they come due. While Bricklin Company's assets exceed its liabilities by \$800, the company may not be solvent. A truck payment of \$900 is due in one week, and the creditors expect payments of \$4,200 within 30 days. There is only \$700 in cash readily available and Bricklin cannot be sure when (or even if) the customer will pay the \$1,100 amount owed. Bricklin Company appears to have a cash flow problem.

Title/Media Ref.: Short Problem 1 / None

- 95) Sonnan Company showed profits for the last two years totaling \$120,000 and \$260,000, respectively. Sonnan Company paid a total of \$90,000 to its owners over the two-year period.
- A. How much remains in Sonnan Company as retained earnings at the end of the second year of business?
- B. Briefly explain the concept of 'earning power' as it pertains to Sonnan Company.

Answer:

A.

Total profits (\$120,000 + \$260,000)	\$380,000
Distributions to owners	<u>(90,000)</u>
	<u>\$290,000</u>

B. Earning power is the ability to create profits in the future. Sonnan Company has demonstrated earning power by generating \$380,000 in profits over the last two years. The board of directors has also chosen to distribute some of those profits to the equity investors, suggesting that the board believes that the company has enough capital to continue to create profits in the future.

96) Matura, Inc. reported the following activities for the year:

- Borrowed \$350,000 from the bank to be repaid in 5 years
- Issued stock to investors for \$40,000 cash
- Paid dividends to shareholders totaling \$10,000
- Purchased equipment by promising to pay \$150,000 to a creditor over the next 3 years

A. Identify which activities involve debt financing.

B. Identify which activities involve equity investments.

Answer:

A. Debt financing: Borrowed \$350,000 from the bank to be repaid in 5 years  
Promising to pay \$150,000 to a creditor over the next 3 years

B. Equity investments: Issued stock to investors for \$40,000 cash

## Short Essay Questions

97) Veronica Ingram is the CEO of a small corporation whose stock is traded on a public stock exchange. She has been concerned with the high cost of producing and distributing annual financial statements. She has proposed that the corporation stop producing these financial reports which would save the company \$240,000 annually. Briefly explain to Ms. Ingram why her proposal cannot be adopted.

Answer: Although the \$240,000 savings is significant, failure to comply with the Securities Exchange Act of 1934 is a violation of regulatory practices for publicly held companies. This Act requires companies with equity securities that are listed on public security markets to (1) annually file a Form 10-K (audited financial reports), (2) quarterly 10-Qs (unaudited quarterly financial statements) and (3) annually provide audited financial reports to the shareholders. Violations lead to being barred from public trading.

98) Why must managers understand financial reporting?

Answer: Managers often use financial statements to assess the financial condition and performance of their own company, its competitors, and other companies of which investments in stocks and bonds of other companies might be undertaken. Managers must understand how business decisions affect the financial statements and how capital providers and other outsiders use financial statements to evaluate and control their actions.

Title/Media Ref.: Short Essay Question 2 / None

99) What are the two fundamental economic reasons why investors and creditors demand financial accounting information?

Answer: Both investors and creditors need financial accounting information to guide their investment decisions — equity investors invest in equity (ownership) securities and debt investors (creditors) lend money to companies. The success of these investments is determined by the financial performance of the companies which is measured by the financial statements. Both groups also need financial accounting information to help monitor and control the decisions of management — equity investors do so by creating compensation packages that reward management on the basis goals expressed in terms of financial statement numbers; and creditors do so by writing debt contracts that express limitations on management decisions in terms of financial accounting numbers.

101) Describe the two components of the income statement.

Answer: The two components of the income statement are revenues and expenses, the difference of which represents net income or loss for a period of time. Revenues are a measure of the assets generated, or liabilities extinguished, from products sold and services provided. Expenses are a measure of the asset outflows (or liabilities created) associated with products sold and providing the services.

102) Describe the three components of the statement of cash flows.

Answer: The three components of the statement of cash flows are operating, investing, and financing activities. Operating activities are associated with the actual products and services provided by a company. Investing activities include the purchase and sale of assets, such as equipment and land. Financing activities refer to the collections and payments related to a company's debt and equity capital resources, such as cash borrowings, loan payments, cash from owners, and payment of dividends to owners.

104) Why might corporate management want to lobby the FASB?

Answer: Corporate management and other interested parties wish to influence generally accepted accounting principles (GAAP). Financial statements, which reflect management's performance, are prepared by management using GAAP, so management is very concerned that the required accounting principles accurately measure the financial effects of transactions engaged in by the company. Management also wishes to ensure that the accounting principles used to prepare the financial statements reflect the company's financial performance and condition as positively as possible.

106) Frank Smithson, chief operating officer for Star Master Corporation, has discovered that two separate and distinct sets of financial statements are being provided—one to the Internal Revenue Service and the other to its shareholders. He objected to this policy and is insisting that one set of financial statements be provided to all interested parties. Provide examples of the needs of the two parties.

Answer: Although one might initially react favorably to Frank's proposal of one set of financial statements for all users, it would be impossible. Various rules for determining income and financial position are specified by each user. These rules reflect different uses of accounting information. The IRS raises money to support government operations and has codified rules designed to accomplish this task. The public information provided to shareholders and other outside parties is governed by generally accepted accounting principles that are designed to provide the general users with information required for investment decisions.

## Data Analytic Questions

**Important Note to Instructor:** All of the real world data included in the data analytic test bank questions was taken from the company information data base used for the data analytic concept practice exercises in the text located at [www.wiley.com/go/pratt/financialaccounting11e](http://www.wiley.com/go/pratt/financialaccounting11e). These questions can be used in at least two different ways to test two levels of data analytic skills. To test only the basic analysis required simply provide the student with the financial information followed by the questions just as they are illustrated in the test bank. Alternatively, to test both their ability to access and navigate the data base as well as their analysis skills, you can provide for the students only the questions and require them to access and navigate the data base, organize the data, and perform the analysis.

109) Income statements and balance sheets for 2016 – 2019 reported by Ethan Allen Interiors, furniture manufacturer, are provided below. Review the statements and answer the questions that follow.

Ethan Allen Interiors (in Millions)

	<b>2019</b>	<b>2018</b>	<b>2017</b>	<b>2016</b>
Sales	\$747	\$767	\$763	\$794

Total Liabilities	146	147	167	185
Shareholders' Equity	364	384	401	392

Compute the rate of growth experienced by Ethan Allen for the following financial statement accounts for the following time periods:

- a. Sales for 2017 – 2018
- b. Sales for 2018 – 2019
- c. Net income for 2017 – 2018
- d. Net income for 2018 – 2019
- e. Total assets for 2017 – 2018
- f. Total assets for 2018 – 2019

Answer:

- a.  $(\$767 - \$763) / \$763 = .005$
- b.  $(\$747 - \$767) / \$767 = -.026$
- c.  $(\$36 - \$36) / \$36 = 0$
- d.  $(\$26 - \$36) / \$36 = -.278$
- e.  $(\$530 - \$568) / \$568 = -.067$
- f.  $(\$510 - \$530) / \$530 = -.038$
