## Chapter 02 Auditors' Professional Roles and Responsibilities

### Multiple Choice Questions

1. In what way does the regulation of public accountants in Canada help to reduce information risk for investors?
- A. By guaranteeing the accuracy of the financial statements.
  - B. By establishing performance and quality control standards that all public accounting firms must follow when conducting audits.**
  - C. By acting as a source of financial compensation for investors when corporate failures occur.
  - D. By requiring auditors to quantify and set information risk to a uniformly acceptable level.

*Topic: 02-31 Quality Control Standards*

*Topic: 02-32 Elements of Quality Control*

### Short Answer Questions

43. Explain the effect major corporate failures and financial reporting scandals - such as Enron and WorldCom, has contributed towards shaping the auditing environment of today.

Major, unexpected corporate failures and financial reporting scandals weaken the public's confidence in not only capital markets but in the audit profession. After high-profile accounting scandals occur, like that of Enron, the public perception is that the audit profession has failed to live up to its professional responsibilities but not adequately reducing the information risk faced by investors. Greater calls for oversight of the auditing profession led to the Public Company Accounting Oversight Board (PCAOB) to oversee auditors of public companies in the United States. In Canada, the Canadian Public Accountability Board (CPAB) was similarly created. The result for the audit profession in both countries includes tighter quality control requirements, stricter independence rules, and more frequent practice inspections. In short, the auditing profession has become highly regulated as it continues to face greater public scrutiny. Each scandalous collapse within a particular business sector elicits calls for the government to exercise greater control over auditors and the public accounting profession. In dealing with an increasingly complex financial world, the audit profession faces an increasingly greater threat of losing its ability to affectively self-regulate and instead face more government oversight.

Chapter 02 - Auditors' Professional Roles and Responsibilities

44. Alan Fallon was recently promoted to senior accountant. He was put in charge of the Mellow Markets audit because of his experience with other grocery clients. Mellow Markets has a small, but growing chain of natural food stores. This is the first year Mellow Markets has been audited. Because of its growth, Mellow needs additional capital. Mellow intends to take its audited financial statements to a bank to secure a loan.

Alan has been assigned two inexperienced staff assistants for the audit. Because this is his first audit as a senior, he intends to bring the job in on budget. To save time, he gave the assistants the audit program for Happy Time Food Stores. He told his staff that this would make things go more quickly. He also told them that he could not spend much time with them at the client's place of business because "my time is billed out at such a high rate, we'll go right over budget." He did call them once a day from another audit on which he was working. The assistants told Alan that the audit program did not always match up with what they found at Mellow Markets. Alan responded, "Just cross out whatever is not relevant in the audit program and don't add anything-it will only make us go over the budget."

When Alan came out near the end of fieldwork, one assistant communicated her concern that they had not attended the inventory counts at any of the out-of-town locations of Mellow Markets. The audit program had stipulated that inventory should be observed for in-town stores only. Happy Time had only one store not in town while Mellow Markets had three of their five stores in other cities. Alan told the assistant to get inventory sheets from the client for the other stores. He added, "Make sure that the inventory balance in the general ledger agrees with the total for all the inventory sheets." The next day, Alan reviewed all work papers and submitted the job for review by the manager.

**Required:**

A. Describe three GAAS examination standards.

B. Do you believe that the Mellow Markets audit is in compliance with these standards? Explain.

Chapter 02 - Auditors' Professional Roles and Responsibilities

**A.** The examination standards are outlined below.

1. The work should be adequately planned and properly executed using sufficient knowledge of the entity's business as a basis. If assistants are employed, they should be properly supervised.
2. A sufficient understanding of internal control should be obtained to plan the audit. When control risk is assessed below maximum, sufficient appropriate audit evidence should be obtained through tests of controls to support the assessment.
3. Sufficient appropriate audit evidence should be obtained, by such means as inspection, observation, enquiry, confirmation, computation, and analysis, to afford a reasonable basis to support the content of the report.

**B.** 1. The Mellow Markets audit is not in compliance with these standards. A proper audit program was not prepared. This, along with the emphasis on cutting time, means that it is also doubtful that a meaningful knowledge of the client's business was obtained. It appears that the planning portion of the first examination standard was clearly violated. The lack of time and attention the inexperienced staff received from Alan Fallon is indicative of a violation of the supervision part of the first examination standard.

2. There is no indication of any steps taken to understand, evaluate, or test the internal control of Mellow Markets. This is a violation of the second examination standard.

3. The third examination standard also seems to have been violated. First, the deficiencies in meeting the first two examination standards suggest that the auditors could not have obtained sufficient appropriate evidence. In addition, the failure to observe any of the inventory counts in other cities is an additional deficiency-particularly since Mellow is a new client. Finally, ensuring that the inventory sheets agree with the balance in the general ledger account is merely a first step in the audit of inventory. By itself it is not sufficient appropriate evidence.

## Chapter 02 - Auditors' Professional Roles and Responsibilities

45. What is the difference between audit procedures and audit standards?

Audit standards are audit-quality recommendations that remain the same over time for all audits. Audit procedures, on the other hand, are quite different and include the particular specialized actions auditors take to obtain evidence in a specific audit engagement.

*Topic: 02-13 Generally Accepted Auditing Standards: Examination Standards*

*Topic: 02-23 Generally Accepted Auditing Standards: Reporting Standards*

46. What are practice inspections and why are they performed?

Practice inspections are a system of reviewing and evaluating practice units' audit files and other documentation by an independent external party. The main objective of practice inspection is to evaluate conformity of the work with the *CPA Canada Handbook* and with the professional ethical principles and rules of conduct.
