**Chapter 2 The Accounting Cycle: During the Period**

- 1) External transactions are transactions the company conducts with a separate economic entity, such as selling products to a customer, purchasing supplies from a vendor, paying salaries to an employee, and borrowing money from a bank.
- 2) Internal transactions are events that affect the financial position of the company but do not include an exchange with a separate economic entity.
- 3) A list of all account names used to record transactions of a company is referred to as a T-account.
- 4) A source document provides information related to external transactions.
- 5) After recording each transaction, total assets must equal total liabilities plus stockholders' equity.
- 6) If a transaction causes total assets of the company to increase by \$2,000, then liabilities plus stockholders' equity also increases by \$2,000.
- 7) If a transaction causes total assets of the company to increase by \$5,000 and total liabilities to increase by \$3,000, then stockholders' equity increases by \$8,000.
- 8) Borrowing cash from the bank causes assets to increase and liabilities to increase.
- 9) Purchasing equipment using cash causes assets to increase.
- 10) Providing services to customers for cash causes stockholders' equity to increase.
- 11) Paying employees' salaries for the current month causes no change to stockholders' equity.
- 12) Paying dividends to its stockholders causes a company's stockholders' equity to decrease.
- 13) Selling common stock for cash causes assets to increase and stockholders' equity to decrease.
- 14) Purchasing office supplies on account causes assets to increase and liabilities to increase.
- 15) Providing services to customers on account causes assets to increase and stockholders' equity to increase.
- 16) Receiving cash in advance from a customer for services to be provided in the future causes assets to increase and stockholders' equity to increase.
- 17) Paying for one year of rent in advance causes one asset to increase and another asset to decrease, so there is no effect on the accounting equation.

- 18) Purchasing supplies on account increases the balance of the Accounts Receivable account.
- 19) Amounts owed from customers are recorded in the Accounts Receivable account.
- 20) The two components of stockholders' equity are Debits and Credits.
- 21) Revenues have the effect of increasing retained earnings.
- 22) Expenses have the effect of decreasing retained earnings.
- 23) Receiving cash in advance from customers increases the Service Revenue account.
- 24) Deferred Revenue is a liability account.
- 25) Liability accounts increase with a debit and decrease with a credit.
- 26) Liability accounts increase with a credit and decrease with a debit.

- 30) The Dividends account increases with a credit and decreases with a debit.
- 31) A debit to an account balance always results in the balance increasing.
- 32) A credit to an account balance always results in the balance decreasing.
- 33) A journal provides a chronological record of all transactions affecting a firm.
- 34) For each transaction, there must be at least one debit amount and one credit amount.
- 35) For each transaction, the total debit amounts must equal the total credit amounts.
- 36) Selling common stock for cash is recorded with a debit to common stock.
- 37) Borrowing cash from the bank is recorded with a debit to cash.
- 38) Purchasing office supplies is recorded with a credit to office supplies.
- 39) Paying employees' salaries for the current period is recorded with a debit to Salaries Expense.
- 40) Providing services to customers is recorded with a debit to Service Revenue.

- 41) The general ledger includes all accounts used to record the company's transactions.
- 42) The process of transferring the debit and credit information from the journal to individual accounts in the general ledger is called journalizing.
- 43) After posting transactions to the general ledger accounts, the sum of the accounts with debit balances should equal the sum of the accounts with credit balances.
- 44) A trial balance is a list of all accounts and their balances at a particular date, showing that assets equal liabilities.
- 45) If total debits equal total credits in the trial balance, then all balances are correct.
- 46) Which of the following is not part of measuring external transactions?
- A) Using source documents to analyze accounts affected.
  - B) Recording transactions.

Supplies	14,000
Cash	26,000

- A) \$15,000.
- B) \$25,000.
- C) \$12,000.
- D) Cannot be determined given the information provided.

Answer: D

Explanation: Total liabilities + Stockholders' equity = (\$288,000) = Accounts Payable (?) + Salaries Payable (?) + Notes Payable (\$88,000) + Common Stock (\$100,000) + Retained Earnings (\$40,000); therefore, with two unknowns there is not enough information to solve the problem.

- A) \$15,000.
- B) \$25,000.
- C) \$12,000.
- D) \$39,000.

Answer: A

Explanation: Total assets (\$290,000) = Land (\$150,000) + Equipment (\$90,000) + Supplies (\$10,000) + Cash (\$25,000) + Prepaid Rent (?); therefore, Prepaid Rent = \$15,000.

206) Suppose a company has the following balance sheet accounts:

Accounts	Balances
Land	\$9,000
Building	?
Salaries payable	3,700
Common stock	?
Accounts payable	2,600
Cash	5,300
Retained earnings	11,600
Supplies	3,200
Equipment	4,500

Calculate the missing amounts assuming the company has total assets of \$40,000.

Answer: Building = \$18,000; Common stock = \$22,100.

Feedback: Building: Total Assets (\$40,000) = Land (\$9,000) + Building (?) + Cash (\$5,300) + Supplies (\$3,200) + Equipment (\$4,500); therefore, Building = \$18,000.

Total Liabilities and Stockholders' Equity (\$40,000) = Salaries Payable (\$3,700) + Common Stock (?) + Accounts Payable (\$2,600) + Retained Earnings (\$11,600); therefore, Common Stock = \$22,100.
