Principles of Athletic Training 17th Edition by Prentice

CH01

Answer Key

Test name: CH01

1) [A, B, D]

Empathy, intellectual curiosity, and a sense of humor are essential qualities for a good athletic trainer.

2) [D, G]

The Numeric Pain Rating Scale & the Short-form McGill Pain Questionnaire are both outcome measures used for pain.

3) A

Athletic training as we know it came into existence during the late nineteenth century with the firm establishment of intercollegiate and interscholastic athletes in the United States.

4) D

Dr. S. E. Bilik, a physician who wrote the first major text in 1917 on athletic training and the care of athletic injuries called *The Trainer's Bible*, was a major influence in developing the athletic trainer as a specialist in preventing and managing athletic injuries.

5) E

The *Journal of Athletic Training* is a research-based journal published monthly.

6) B

The National Academy of Sports Medicine is dedicated to transforming lives and revolutionizing the health and fitness industry through its unwavering commitment to deliver innovative education, solutions, and tools that produce remarkable results.

Principles of Athletic Training 17th Edition by Prentice

CH01

7) D

Today, more than 40 percent of certified athletic trainers are employed in clinics and hospitals—more than any other employment setting.

8) A

The American Medical Association has “called for certified athletic trainers to be employed in all secondary-school athletic programs be used as part of a high school’s medical team.”

9) B

The athletic trainer working in an industrial or occupational setting must have a sound understanding of the principles and concepts of workplace ergonomics, including inspecting, measuring, and observing dimensions of the work space, as well as specific tasks that are performed at the work station.

10) D

Athletic training requires abundant energy, vitality, and physical and emotional stability.

11) B

In 2005, the NATA revised code of ethics. “Members shall accept responsibility for the exercise of sound judgment” was removed.

12) C

The major concern of the athletic trainer should always be in the injured patient. It is essential to realize that decisions made by the physician, coach, and athletic trainer ultimately affect the athlete.

13) E

In reference to Focus Box 1-5, serving as the medical director for an accredited athletic training program is not a listed duty for the team physician or a requirement for a CAATE-accredited athletic training program.

Principles of Athletic Training 17th Edition by Prentice

CH01

14) A

The coach is directly responsible for preventing injuries by seeing that athletes have undergone a preventive injury conditioning program. They must also ensure that sports equipment, especially protective equipment, is of the highest quality and is properly fitted.

15) C

As of 2020 California is the only state with no regulation for athletic trainers.

16) A

The Board of Certification's purpose is to provide a certification program for entry-level athletic trainers and recertification standards for certified athletic trainers.

17) A

Evidence-based practice is making decisions about the clinical care of individual patients based on the current best available evidence in the professional literature.

18) E

Among the different types of research, randomized controlled trials (meta-analyses and systematic reviews) are the most rigorous.

19) B

C stands for Comparison. When developing a PICO a comparison of the alternatives that might be used in the intervention should be completed.

20) C

The Cochrane Database of Systematic Reviews currently contains the largest database and is recommended that athletic trainers begin their search of systematic reviews here.
