117) Sales tax is proportional, federal income tax is progressive, social security is regressive, flat tax is proportional, Medicare tax is proportional.

118) A proportional tax is a tax where the tax rate remains the same regardless of the tax base.

119) A regressive tax is one in which the tax rate decreases as the tax base increases.

120) The average tax rate is the proportion of tax that is assessed, on average, on the total taxable income of a taxpayer. It is determined by dividing the total tax liability by the total taxable income (or tax base).

121) The marginal tax rate is the tax rate that is applied to the next dollar of income that a taxpayer earns. It is determined with reference to the tax rate schedules published by the IRS.

122) Their marginal tax rate is 22%. Their average tax rate is 12.21%.
 $(\$10,506 / \$86,025) = 12.21\%$ average rate.

Fundamentals of Taxation 2021 14th Edition by Cruz CH01

123) In many respects, a tax return is the document that represents the "settling up" between the taxpayer and the government. The taxpayer lists all appropriate income and deductions, calculates tax liability and subtracts amounts already paid. At that point, the taxpayer may owe additional tax (total tax liability is greater than amounts paid) or may be entitled to a refund (amounts paid exceed the total tax liability). The liability of your friend is actually equal to the \$2,592 she paid with her tax return plus the amount she paid as withholding taxes from her paycheck.

124) Alex's taxable income is $\$63,411 + \$254 - \$12,400 = \$51,265$.

125) Answers are derived from the Tax Tables.

a. \$8,545.

b. \$6,652.

c. \$12,736.

For item c, remember to subtract the \$12,400 standard deduction before going to the Tax Tables.

- 126) a.smaller
b.the same
c.larger
d.larger
e.smaller

For the taxable income amounts in this problem, the Tax Tables determine tax liability using the midpoint of income in \$50 ranges. Thus, tax is determined using taxable income ending in \$25 (for example, \$42,025) or ending in \$75 (for example, \$38,575). If the actual taxable income is less than the respective midpoint, the Tax Tables will give a larger tax than the Tax Rate Schedules. If taxable income exceeds the midpoint, the Tax Tables will give a smaller tax than the Tax Rate Schedules. If taxable income is exactly equal to the midpoint, there will be no difference between the two methods.

127) Typically, federal tax legislation is introduced in the House of Representatives Ways and Means Committee (although bills can be introduced in the Senate Finance Committee). The House bill is then voted on by the House of Representatives. Then the Senate Finance Committee generates its own bill which is voted on by the U.S. Senate. The Joint Conference Committee resolves differences between the House and Senate versions (if differences exist). The common Joint Conference Bill is voted on by the House of Representatives and the U.S. Senate. If the Joint Conference Bill passes the House and Senate it is signed or vetoed by the President of the United States. If signed, the legislation is incorporated into the Internal Revenue Code.

128) Revenue Rulings (Rev. Rul.) and Revenue Procedures (Rev. Proc.) are issued by the IRS and are excellent sources of information for taxpayers and tax preparers. With Revenue Rulings, the IRS is reacting to an area of the tax law that is confusing to many taxpayers and/or has material tax implications to many taxpayers. The Rev. Rul. lists a fact situation, the relevant tax authority, and the IRS's conclusion on the manner in which the item should be treated.

A Rev. Proc. is a proactive document and is issued by the IRS to illustrate the manner in which it wants something reported.

129) The IRS issues a PLR when a taxpayer requests a ruling on a certain tax situation. The PLR is tax authority only to the taxpayer to whom it is issued.

130) Three different trial courts hear tax cases: (1) the U.S. Tax Court; (2) U.S. District Courts; and (3) the U.S. Court of Federal Claims. Decisions by the Tax Court and the District Courts may be appealed to the U.S. Court of Appeals and then to the Supreme Court. U.S. Court of Federal Claims cases can be appealed to the U.S. Court of Appeals - Federal Claims and then to the Supreme Court.

131) Students can pick any five of the following in each category.

MUST DO:

- Sign all tax returns they prepare
- Provide a copy of the returns to clients
- Return records to clients
- Exercise due diligence
- Exercise best practices in preparing submissions to the IRS
- Disclose all non-frivolous tax positions when such disclosure is required to avoid penalties
- Promptly notify clients of any error or omission on a client tax return
- Provide records and information requested by the IRS unless the records or information are privileged
- Inform a client if the client has made an error or omission in a document submitted to the IRS

MUST NOT DO: ● Take a tax position on a return unless there is a "realistic possibility" of the position being sustained

- Charge a fee contingent on the outcome of the return or any position, except in certain limited situations
- Charge an "unconscionable fee"
- Unreasonably delay the prompt disposition of any matter before the IRS
- Cash an IRS check for a client for whom the return was prepared
- Represent a client before the IRS if the representation involves a conflict of interest
- Make false, fraudulent or coercive statements or claims or make misleading or deceptive statements or claims
