Fundamentals Of Financial Accounting 6ce Edition by Phillips Ch01

116) B

117) B

118) C

119) D

120) B

121) D

An asset is an economic resource presently controlled by the company; it has measurable value and is expected to benefit the company by producing cash inflows or reducing cash outflows in the future. The building supplies on hand that cost \$327,000 would be reported as an asset on the balance sheet.

122) C

Shareholder's equity = Assets – Liabilities

Beginning shareholder's equity = \$867,000 – \$743,500 = \$123,500

Change in shareholder's equity = Change in assets – Change in liabilities

= \$58,700 – \$24,350 = \$34,350

Ending shareholder's equity = Beginning shareholder's equity + Change in shareholder's equity

= \$123,500 + \$34,350 = \$157,850

123) C

Total assets = Total liabilities + Total shareholder's equity

\$179,000 = (\$64,300 + Notes Payable) + (\$12,300 + \$28,300)

Notes Payable = \$179,000 – \$64,300 – \$12,300 – \$28,300 = \$74,100

124) B

Assets = Liabilities + Shareholders' equity

Liabilities = Assets – Shareholders' equity

Change in liabilities = Change in assets – Change in shareholders' equity

= \$56,200 – \$22,400 = \$33,800

Fundamentals Of Financial Accounting 6ce Edition by Phillips Ch01

125) B

Of the \$387,500 of Sales Revenue, customers have paid the company only \$304,500, which leaves a balance of Accounts Receivable of \$83,000.

126) B

Net income = Revenues – Expenses

Expenses = Net income – Revenues

\$16 million – \$11 million = \$5 million

127) B

The income statement would report the Sales Revenue earned of \$25 million. The amount still owed by customers of \$10.50 million (or \$25 million – \$14.50 million) would be reported as Accounts Receivable, an asset, on the balance sheet.

128) B

Revenue is reported on the income statement when it is earned and expenses are reported when they are incurred.

Net Income = Revenue – Expenses

= \$103,000 – \$70,300 = \$32,700

129) A

Ending Cash = Beginning cash + Cash provided by (used in) operating activities + Cash provided by (used in) investing activities + Cash provided by (used in) financing activities

= \$17,300 + \$18,300 – \$6,600 – \$1,100 = \$27,900

130) B

Change in Cash = Cash provided by (used in) operating activities + Cash provided by (used in) investing activities + Cash provided by (used in) financing activities

= \$29,400 + \$30,400 – \$44,600 = \$15,200.

131) D

Fundamentals Of Financial Accounting 6ce Edition by Phillips Ch01

Net Income = Revenue – Expenses

$$= \$6,500 - \$3,750$$

$$= \$2,750$$

132) D

Net Income = Revenue – Expenses

$$= \$6,700 - \$3,850$$

$$= \$2,850$$

Ending retained earnings = Beginning retained earnings + Net income – Dividends

$$= \$11,000 + \$2,850 - \$2,700 = \$11,150$$

133) B

Ending liabilities = Beginning liabilities + Increase (Decrease) in liabilities

$$= \$30,000 + \$3,000 = \$33,000$$

134) C

Assets increased during the year by \$5,300 (revenues paid in cash) and decreased by \$1,300 (dividends paid in cash).

Ending assets = Beginning assets + Increase (Decrease) in assets

$$= \$103,000 + \$5,300 - \$1,300 = \$107,000$$

135) A

Expenses are comprised of Wages Expense, Advertising Expense, and Rent Expense

Net income = Revenue – Expenses

$$= \$46,500 - (\$9,000 + \$6,000 + \$11,000) = \$20,500$$

136) B

Total Assets = Cash + Accounts Receivable + Supplies

$$= \$71,900 + \$29,900 + \$5,900 = \$107,700$$

137) C

Fundamentals Of Financial Accounting 6ce Edition by Phillips Ch01

Expenses are comprised of Wages Expense, Advertising Expense, and Rent Expense

Net income = Revenue – Expenses

$$= \$51,700 - (\$8,200 + \$5,200 + \$10,200) = \$28,100$$

Ending retained earnings = Beginning retained earnings + Net income –

Dividends

$$= \$17,200 + \$28,100 - \$0 = \$45,300$$

Ending shareholder's equity = Common shares + Ending retained earnings

$$= \$42,000 + \$45,300 = \$87,300$$

138) B

Assets = Liabilities + Shareholder's Equity

Shareholder's Equity = Assets – Liabilities

$$= \$108,000 - \$79,000 = \$29,000$$

139) B

Beginning of year:

Change in Assets = Change in Liabilities + Change in Shareholder's Equity

Change in Shareholder's Equity = Change in Assets – Change in Liabilities

$$= \$13,800 - (\$9,900) = \$13,800 + \$9,900 = \$23,700$$

140) C

Ending retained earnings = Beginning retained earnings + Net income – Dividends

$$= \$0 + \$21,700 - \$12,850 = \$8,850$$

141) A

Fundamentals Of Financial Accounting 6ce Edition by Phillips Ch01

Ending retained earnings = Beginning retained earnings + Net income – Dividends

Year 1:

$$= \$0 + \$20,200 - \$12,100 = \$8,100$$

Year 2:

$$= \$8,100 + \$34,200 - \$5,100 = \$37,200$$

142) A

Assets = Liabilities + Shareholder's Equity

Shareholder's Equity = Assets – Liabilities

$$= \$708,000 - \$354,000 = \$354,000$$

Shareholder's Equity = Common Shares + Retained earnings.

Retained Earnings = Shareholder's Equity – Common Shares

$$= \$354,000 - \$208,000 = \$146,000$$

143) D

Change in Assets = Change in Liabilities + Change in Shareholder's Equity

Change in Shareholder's Equity = Change in Assets – Change in Liabilities

$$= \$402,000 - (\$51,000)$$

$$= \$402,000 + \$51,000 = \$453,000$$

144) D

Fundamentals Of Financial Accounting 6ce Edition by Phillips Ch01

Change in Assets = Change in Liabilities + Change in Shareholder's Equity

Change in Shareholder's Equity = Change in Assets – Change in Liabilities

$$= \$418,000 - (\$59,000) = \$418,000 + \$59,000 = \$477,000$$

Change in Shareholder's Equity = Change in Common Shares + Change in Retained Earnings

Change in Retained Earnings = Change in Shareholder's Equity – Change in Common Shares

$$= \$477,000 - \$293,000 = \$184,000$$

Change in Retained Earnings = Net income – Dividends

Net income = Change in Retained Earnings + Dividends

$$= \$184,000 - \$0 = \$184,000$$
