Test Bank

MULTIPLE CHOICE - Choose the one alternative that best completes the statement or answers the question.

- 1) The general process of gathering, organizing, summarizing, analyzing, and interpreting data is called:
 - A) Statistics.
 - B) Descriptive statistics.
 - C) Inferential statistics.
 - D) Levels of measurement.

Question Details

Accessibility: Keyboard Navigation

Learning Objective: 01-01 Explain why knowledge of statistics is important.

Topic: 01-02 Why Study Statistics?

Difficulty: Easy

- 2) The general process of analyzing, and interpreting data to assist in making more effective decisions is called:
 - A) Statistics.
 - B) Descriptive statistics.
 - C) Inferential statistics.
 - D) Levels of measurement.

Question Details

Accessibility: Keyboard Navigation

Difficulty: Easy

Learning Objective: 01-03 Differentiate between descriptive and inferential statistics.

Topic: 01-06 Inferential Statistics

3) The general process of gathering, organizing, presenting, analyzing, and interpreting data to assist in making more effective decisions is called:

Version 1

- A) Statistics.
- B) Descriptive statistics.
- C) Inferential statistics.
- D) Levels of measurement.

Question Details

Accessibility: Keyboard Navigation

Learning Objective: 01-01 Explain why knowledge of statistics is important.

Difficulty: Easy

Topic: 01-05 Desriptive Statistics

- 4) The general process of organizing, summarizing, and presenting data in an informative way is called:
 - A) Statistics.
 - B) Descriptive statistics.
 - C) Inferential statistics.
 - D) Levels of measurement.

Question Details

Accessibility: Keyboard Navigation

Difficulty: Easy

Learning Objective: 01-03 Differentiate between descriptive and inferential statistics.

Topic: 01-05 Desriptive Statistics

- 5) (i) The general process of gathering, organizing, presenting, analyzing, and interpreting data to assist in making more effective decisions is called:
- (ii) The general process of analyzing, and interpreting data to assist in making more effective decisions is called:
- (iii) The entire set of individuals or objects of interest or the measurements obtained from all individuals or objects of interest is called:

- A) (i) statistics, (ii) descriptive statistics, and (iii) a population.
- B) (i) descriptive statistics, (ii) inferential statistics, and (iii) a sample.
- C) (i) inferential statistics, (ii) descriptive statistics, and (iii) a population.
- D) (i) statistics, (ii) descriptive statistics, and (iii) a sample.
- E) (i) statistics, (ii) inferential statistics, and (iii) a population.

60)	A variable that can have any value within a specific range is called:
	A) discrete B) continuous C) census D) population
Access Topic Difficu	ion Details sibility: Keyboard Navigation : 01-07 Types of Variables ulty: Medium ing Objective: 01-04 Classify variables as qualitative or quantitative, and discrete or contin
61)	Ranked data is an example of a(n) level of measurement.
	A) nominal

B) ordinalC) intervalD) ratio

Accessibility	:	Keyboard	N	lavigation
---------------	---	----------	---	------------

Difficulty: Medium

Learning Objective: 01-05 Distinguish between nominal, ordinal, interval, and ratio levels of measur

Topic: 01-10 Ordinal-Level Data

- 62) The prime rate of interest is an example of a(n) _____ level of measurement.
 - A) nominal
 - B) ordinal
 - C) interval
 - D) ratio

Question Details

Accessibility: Keyboard Navigation

Difficulty: Medium

Learning Objective: 01-05 Distinguish between nominal, ordinal, interval, and ratio levels of measur

Topic: 01-12 Ratio-Level Data

- **63**) The "lowest" level of measurement is:
 - A) nominal
 - B) ordinal
 - C) interval
 - D) ratio

Question Details

Accessibility: Keyboard Navigation

Difficulty: Medium

Learning Objective: 01-05 Distinguish between nominal, ordinal, interval, and ratio levels of measur

Topic: 01-09 Nominal-Level Data

64) The "highest" level of measurement is:

Λ	nominal
\rightarrow	пошил

- B) ordinal
- C) interval
- D) ratio

Question Details

Accessibility: Keyboard Navigation

Difficulty: Medium

Learning Objective: 01-05 Distinguish between nominal, ordinal, interval, and ratio levels of measur

Topic: 01-12 Ratio-Level Data

- **65)** Categorizing students as freshmen, sophomores, juniors and seniors is an example of the level of measurement.
 - A) nominal
 - B) ordinal
 - C) interval
 - D) ratio

Question Details

Accessibility: Keyboard Navigation

Difficulty: Medium

Learning Objective: 01-05 Distinguish between nominal, ordinal, interval, and ratio levels of measur

Topic: 01-10 Ordinal-Level Data

- **66)** The lowest level of measurement that has some sort of ranking is:
 - A) nominal
 - B) ordinal
 - C) interval
 - D) ratio

Question Details

Accessibility: Keyboard Navigation

Difficulty: Medium

Learning Objective: 01-05 Distinguish between nominal, ordinal, interval, and ratio levels of measur

Topic: 01-10 Ordinal-Level Data

- 67) Environment Yukon tracks the changes in temperature in glaciers. Which answer best describes this variable?
 - A) Qualitative Nominal
 - B) Qualitative Ordinal
 - C) Quantitative Interval
 - D) Quantitative Ratio

Question Details

Accessibility : Keyboard Navigation Topic : 01-07 Types of Variables

Difficulty: Medium

Learning Objective: 01-04 Classify variables as qualitative or quantitative, and discrete or continu Learning Objective: 01-05 Distinguish between nominal, ordinal, interval, and ratio levels of measur

Topic: 01-11 Interval-Level Data

- **68)** Environment Yukon tracks the changes in temperature in glaciers. Which answer best describes this variable?
 - A) discrete
 - B) continuous
 - C) nominal
 - D) ordinal

Question Details

Accessibility: Keyboard Navigation

Difficulty: Medium

Learning Objective: 01-05 Distinguish between nominal, ordinal, interval, and ratio levels of measur

Topic: 01-10 Ordinal-Level Data

- **69)** A radio station conducts a survey to determine listener's favorite program. The choices are: Talk radio, Sports Radio, Adult soft, Adult pop. Which answer best describes this variable?
 - A) quantitative
 - B) continuous
 - C) nominal
 - D) ordinal

Question Details

Accessibility: Keyboard Navigation Topic: 01-07 Types of Variables

Difficulty: Medium

Learning Objective: 01-04 Classify variables as qualitative or quantitative, and discrete or continu Learning Objective: 01-05 Distinguish between nominal, ordinal, interval, and ratio levels of measur

Topic: 01-09 Nominal-Level Data

- **70**) Determine which answer best describes the new minimum wage amount of \$16.00.
 - A) Discrete ratio
 - B) Continuous ratio
 - C) Discrete interval
 - D) Continuous interval

Question Details

Accessibility : Keyboard Navigation Topic : 01-07 Types of Variables

Difficulty: Medium

Learning Objective: 01-04 Classify variables as qualitative or quantitative, and discrete or continu Learning Objective: 01-05 Distinguish between nominal, ordinal, interval, and ratio levels of measur

Topic: 01-08 Levels of Measurement

71) The number of cars parked at the hospital parking lot is?

- A) Nominal
- B) Ordinal
- C) Interval
- D) Ratio

Question Details

Accessibility: Keyboard Navigation

Difficulty: Medium

Learning Objective: 01-05 Distinguish between nominal, ordinal, interval, and ratio levels of measur

Topic: 01-08 Levels of Measurement Topic: 01-12 Ratio-Level Data

- **72)** A student receives the following grades: B+, C+, A, B+ and A+. What type of data has been collected?
 - A) Nominal
 - B) Ordinal
 - C) Interval
 - D) Ratio

Question Details

Accessibility: Keyboard Navigation

Difficulty: Medium

Learning Objective: 01-05 Distinguish between nominal, ordinal, interval, and ratio levels of measur

Topic: 01-08 Levels of Measurement Topic: 01-10 Ordinal-Level Data

- 73) What type of variable is the number of cars parked at the hospital parking lot?
 - A) Qualitative discrete
 - B) Qualitative continuous
 - C) Quantitative discrete
 - D) Quantitative continuous

Question Details

Accessibility : Keyboard Navigation Topic : 01-07 Types of Variables

Difficulty: Medium

Learning Objective: 01-04 Classify variables as qualitative or quantitative, and discrete or continu

- **74)** A telephone company asks you how many phones you have on your family plan. Which level of measurement is this classification?
 - A) Nominal
 - B) Ordinal
 - C) Interval
 - D) Ratio

Question Details

Accessibility: Keyboard Navigation

Difficulty: Medium

Learning Objective: 01-05 Distinguish between nominal, ordinal, interval, and ratio levels of measur

Topic: 01-08 Levels of Measurement Topic: 01-12 Ratio-Level Data

- **75)** Today's weather report indicates an 80% chance of precipitation. Which level of measurement is this classification?
 - A) Nominal
 - B) Ordinal
 - C) Interval
 - D) Ratio

Question Details

Accessibility: Keyboard Navigation

Difficulty: Medium

Learning Objective: 01-05 Distinguish between nominal, ordinal, interval, and ratio levels of measur

Topic: 01-08 Levels of Measurement Topic: 01-12 Ratio-Level Data

- **76)** Today's weather report indicates a high of 28 degrees. Which level of measurement is this classification?
 - A) Nominal
 - B) Ordinal
 - C) Interval
 - D) Ratio

Question Details

Difficulty: Medium

Learning Objective: 01-05 Distinguish between nominal, ordinal, interval, and ratio levels of measur

Topic: 01-08 Levels of Measurement Topic: 01-11 Interval-Level Data

- 77) (i) Comparing temperatures from one period to another is looking at continuous ratio level data.
- (ii) Comparing temperatures form one period to another is looking at continuous, interval level data.
- (iii) Comparing temperatures from one period to another is interval level data because a temperature still exists when the temperature is zero degrees.
 - A) (i), (ii) and (iii) are all correct statements.
 - B) (i) and (ii) are correct statements but not (iii).
 - C) (i) and (iii) are correct statements but not (ii).
 - D) (ii) and (iii) are correct statements but not (i).

SECTION BREAK. Answer all the part questions.

78) A company was studying the demographics of their customers. As part of the study they collected the following variables: gender, marital status, credit rating (low, medium, high), annual income, and age.

Question Details

- **78.1**) Label the variable gender as qualitative or quantitative, discrete or continuous, and nominal, ordinal, interval, or ratio.
 - A) qualitative, discrete, nominal
 - B) qualitative, continuous, ordinal
 - C) quantitative, discrete, nominal
 - D) quantitative, continuous, ratio

Question Details

Difficulty: Medium

Learning Objective: 01-04 Classify variables as qualitative or quantitative, and discrete or continu

79) PlayTime Toys Inc. employs 50 people in the Assembly Department. Forty of the employees belong to a union and 10 do not. Five employees are selected at random to form a committee to meet with management regarding shift starting times.

Question Details

- **79.1**) Would the 50 employees be considered a population or a sample?
 - A) population
 - B) sample

Question Details

Accessibility: Keyboard Navigation

Learning Objective: 01-03 Differentiate between descriptive and inferential statistics.

Topic: 01-06 Inferential Statistics

Difficulty: Medium

- **79.2**) Would the 5 selected employees be considered a population or a sample?
 - A) population
 - B) sample

Question Details

Accessibility: Keyboard Navigation

Learning Objective: 01-03 Differentiate between descriptive and inferential statistics.

Topic: 01-06 Inferential Statistics

Difficulty: Medium

80) The Shell station on Portage Ave in Winnipeg is studying the number of litres of fuel that are sold on each day of the week. Records are available for the past year.

Question Details

- **80.1**) How can the variable 'number of litres' be best described?
 - A) Discrete
 - B) Quantitative
 - C) Qualitative
 - D) Census
 - E) Nominal

Question Details

Accessibility: Keyboard Navigation Topic: 01-07 Types of Variables

Difficulty: Medium

Learning Objective: 01-04 Classify variables as qualitative or quantitative, and discrete or continu

- **80.2)** How can the variable 'number of litres' be best described?
 - A) Discrete
 - B) Continuous
 - C) Qualitative
 - D) Census
 - E) Nominal

Question Details

Accessibility: Keyboard Navigation Topic: 01-07 Types of Variables

Difficulty: Medium

Learning Objective: 01-04 Classify variables as qualitative or quantitative, and discrete or continu

- **80.3**) Is the variable 'number of litres' discrete or continuous?
 - A) Discrete
 - B) Continuous

Question Details

Accessibility : Keyboard Navigation Topic : 01-07 Types of Variables

Difficulty : Medium

Learning Objective: 01-04 Classify variables as qualitative or quantitative, and discrete or continu
