- 73) Region
- 74) Absolute location and relative location; answer varies to second part.
- 75) The barrier of time and space separating places which must be overcome; answer varies to second part, possible answers might be the number of trips they take versus the distance, the frequency of interaction with relatives versus distance, etc.
- 76) Answer varies. Possible answers for technologies that reduce the friction of distance might include new highway construction, container ships, fiber optic cables, communications satellites, and the internet.

77) Perceptual regions persist in people's mind as they are the mental maps as perceived by their inhabitants. Formal and functional regions are constructs of geographers and researchers. The characteristics used in delimitating formal regions are uniform everywhere throughout the territory. Functional regions are defined on the basis of interactions and interdependence.
