Test Bank

Fundamental Financial Accounting Concepts 11th Edition

by Edmonds CH01

ANSWERS ARE LOCATED AT THE END OF THIS DOCUMENT

SHORT ANSWER. Write the word or phrase that best completes each statement or answers the question.

1) Indicate how each event affects the financial statements. Use the following letters to record your answer in the box shown below. If an event increases one account and decreases another account equally within the same element, record I/D. If an event has no impact on the element, record NA. You do not need to enter dollar amounts.

Increase = I Decrease = D Not Affected = NA

Walker Company issued common stock for \$150,000 cash.

Balance Sheet		Income Statement		Statement
Assets	Liabilities + Stockholders' Equity	Revenue - Expense	Net Income	of Cash Flows

50) Rosemont Company began operations on January 1, Year 1, and on that date issued stock for \$60,000 cash. In addition, Rosemont borrowed \$50,000 cash from the local bank. The company provided services to its customers during Year 1 and received \$35,000. It purchased land for \$70,000. During the year, it paid \$10,000 cash for salaries and \$9,000 cash for supplies that were used up in its operations. Stockholders were paid cash dividends of \$8,000 during the year.

Required:

- a) List the transactions from the information above (for example, issued common stock for \$60,000) and indicate in which section of the statement of cash flows each transaction would be reported.
- b) What would the amount be for net cash flows from operating activities?
- c) What would be the end-of-year balance for the cash account?
- d) What would be the amount of the total assets for the Rosemont Company at the end of Year 1?
- e) What would be the end-of-year balance for the Retained Earnings account?

Fundamental Financial Accounting Concepts 11th Edition

by Edmonds CH01

Answer Key

Test name: CH01

1)

Balance Sheet			Income Statement			Statement
Assets	Liabilities	Stockholders' Equity	Revenue	Expense	Net Income	of Cash Flows
I	NA	I	NA	NA	NA	I

Issuing common stock is an asset source transaction that increases the business's assets (cash) and its stockholders' equity (common stock). It does not affect the income statement but is reported as a cash flow from financing activities in the statement of cash flows.

2)

Balance Sheet			Income Statement			Statement
Assets	Liabilities	Stockholders' Equity	Revenue	Expense	Net Income	of Cash Flows
I	I	NA	NA	NA	NA	I

Borrowing cash is an asset source transaction that increases a business's assets (cash) and its liabilities (notes payable). It does not affect the income statement but is reported as a cash flow from financing activities in the statement of cash flows.

3)

Balance Sheet			Income Statement			Statement
Assets	Liabilities	Stockholders' Equity	Revenue	Expense	Net Income	of Cash Flows
I	NA	I	I	NA	I	I

Fundamental Financial Accounting Concepts 11th Edition

by Edmonds CH01

This is an asset source transaction that increases the business's assets (cash). When a business provides services, it earns revenue. Revenue increases net income, which will increase stockholders' equity (retained earnings) at the end of the accounting period. This event is reported as a cash inflow from operating activities in the statement of cash flows.

4)

Balance Sheet			Income Statement		Statement of Cash Flows
Assets	Liabilities + Stockholders' Equity		Revenue	Expense = Net Income	
I/D	NA	NA	NA	NA	D

Purchasing land for cash is an asset exchange transaction that increases one asset (land) and decreases another asset (cash). It does not affect the income statement and is reported as an investing activity in the statement of cash flows.

5)

Balance Sheet			Income Statement		Statement of Cash Flows
Assets	Liabilities + Stockholders' Equity		Revenue	Expense = Net Income	
D	NA	D	NA	I	D

Paying expenses is an asset use transaction that decreases the business's assets (cash) and decreases its stockholders' equity (retained earnings). Note that the expense decreases net income and will decrease retained earnings at the end of the accounting period. It is reported as a cash outflow from operating activities in the statement of cash flows.

6)

Balance Sheet			Income Statement		Statement of Cash Flows
Assets	Liabilities + Stockholders' Equity		Revenue	Expense = Net Income	

Fundamental Financial Accounting Concepts 11th Edition

by Edmonds CH01

D NA D NA NA NA D

Paying a cash dividend is an asset use transaction that decreases a business's assets (cash) and its stockholders' equity (retained earnings). The dividends account will decrease retained earnings at the end of the accounting period. It does not affect net income and is reported as a cash outflow from financing activities in the statement of cash flows.

7)

Balance Sheet			Income Statement			Statement
Assets = Liabilities + Stockholders' Equity			Revenue	Expense	= Net Income	of Cash Flows
I	I	NA	NA	NA	NA	NA

Issuing a note to purchase a building is an asset source transaction that increases a business's assets (building) and increases its liabilities (notes payable). It does not affect net income or the statement of cash flows.

8) The Financial Accounting Standards Board (FASB)

The Financial Accounting Standards Board (FASB) is a privately funded organization with the primary authority for establishing accounting standards in the United States.

9) Markets include consumers, businesses, and resource owners. Consumers use resources. Businesses convert resources to the form that consumers want. Resource owners control the distribution of resources to businesses.

10) Stakeholders are the parties that are interested in operations of an organization. Stakeholders often are users or potential users of accounting information. Stakeholders include resource providers, financial analysts, brokers, attorneys, government regulators and news reporters.

Fundamental Financial Accounting Concepts 11th Edition by Edmonds CH01

11) International Financial Reporting Standards (IFRS) have been adopted by most countries outside of the United States, and are becoming "global GAAP." Many believe that U.S. companies will be allowed to use either IFRS or U.S. GAAP in the future, and there is an ongoing process to reduce the differences between IFRS and GAAP. The International Accounting Standards Board (IASB), headquartered in London, is responsible for forming these standards.

12) Financial accounting is designed to satisfy the needs of external resource providers (external users) and must adhere to Generally Accepted Accounting Principles. Managerial accounting, however, provides information that is useful to managers within a business (internal users), and does not have to follow GAAP.

13) Similarities: Both types of organizations commonly use specific resources to satisfy consumer demand. These resources are financial resources, physical resources, and labor resources. Accounting systems are used by both types of organizations to measure the cost of the goods and services that are provided, the efficiency and effectiveness of the organizations' operations, and the ability of the organizations to continue to provide goods and services.

Differences: Not-for-profit organizations are established primarily for motives other than making a profit, while most other businesses are motivated by profit. As a result, factors other than profitability influence the resource allocation priorities of not-for-profit organizations.

14) A business's balance sheet shows the elements: assets, liabilities, and stockholders' equity.

15) A business obtains its assets from creditors, from investors, and from operations.

Fundamental Financial Accounting Concepts 11th Edition by Edmonds CH01

16) Providing services for cash increases assets and increases stockholders' equity. It is considered an asset source transaction.

Providing services for cash increases cash, an asset, and revenue increases equity (retained earnings).

17) Payment of cash dividends decreases assets and decreases stockholders' equity. It is considered an asset use transaction.

Paying dividends decreases assets (cash) and decreases equity (retained earnings).

18) \$225,000

Assets = Liabilities \$75,000 + Equity \$150,000; Assets = \$225,000

19) When a business acquires assets from investors, it commits to keep the assets safe and to use the assets in a manner that benefits the investors. The business also grants the investor an ownership interest in the business, thereby allowing the investor (owner) to share in the profits generated by the business. In accounting terms investors are called stockholders. A business's commitment to its stockholders is called stockholders' equity.

20) Paid loan, paid expense, and paid dividends to stockholders.

Asset use transactions involve a decrease in assets (for example, cash) and will also result in a decrease in either liabilities (paid loan) or equity (paid expense or dividends).

21) The statement of cash flows tells how a company obtained and used cash during the accounting period.

The statement of cash flows explains the change in cash from the beginning to the end of the period.

Fundamental Financial Accounting Concepts 11th Edition by Edmonds CH01

22) Issuing stock is reported in the financing activities section.

All cash exchanged between a company and its stockholders is considered a financing activity.

23) Revenues, expenses, and dividends are temporary accounts and are closed at the end of the accounting period.

These accounts are called temporary accounts. Note that dividends are not reported on the income statement or the balance sheet.

24) The balance sheet lists the assets of a business and corresponding claims (liabilities and stockholders' equity) on those assets. It draws its name from the accounting equation.

The income statement matches revenue (benefits) with the expenses (sacrifices) that were incurred to generate the revenue.

The statement of changes in stockholders' equity is used to explain the effects of transactions on stockholders' equity during an accounting period.

The statement of cash flows explains how a company obtained and used cash during the accounting period. The statement classifies cash receipts (inflows) and payments (outflows) into three categories: financing activities, investing activities, and operating activities.

25) An accounting period is the span of time covered by the financial statements, normally one year; the span of time for which income is measured. The practice of pairing together on the income statement revenues and expenses that were incurred in the same accounting period is known as the matching concept.

Fundamental Financial Accounting Concepts 11th Edition by Edmonds CH01

26) a) T b) F c) T d) T e) F

Financial resources are provided to a business by investors and creditors. Businesses, not resource owners, transform resources into products. Resource owners are the main providers of resources in any market.

27) a) F b) T c) T d) T e) F

Financial accounting is primarily intended for external, not internal, stakeholders. Managerial accounting information is usually more detailed than financial accounting information.

28) a) F b) T c) F d) T e) F

A net loss decreases a company's stockholders' equity, not its liabilities. The accounting equation requires that assets be equal to liabilities plus stockholders' equity. Liabilities are reported on the balance sheet, not on the statement of cash flows.

29) a) T b) F c) F d) F e) T

Issuing common stock for cash increases the common stock account, not retained earnings. Net income increases retained earnings but does not necessarily equal its total. The purchase of a truck increases one asset (truck) and decreases another asset (cash) or increases a liability (note payable). Retained earnings includes all net income that a company has earned in its existence that has not been paid out in dividends.

Fundamental Financial Accounting Concepts 11th Edition by Edmonds CH01

30) a) T b) F c) F d) T e) F

The issuance of stock to owners for cash is an example of an asset source, not asset exchange, transaction. Purchasing equipment for cash is an example of an asset exchange transaction in which one asset (cash) decreases and another asset (equipment) increases. Making a payment on a bank loan is an example of an asset use, not asset exchange, transaction.

31) a) F b) T c) F d) T e) F

A cash dividend paid to stockholders is reported in the financing activities section of the statement of cash flows. A cash dividend paid to stockholders is reported on the statement of changes in stockholders' equity, not on the income statement. Changes in retained earnings for the accounting period are reported on the statement of changes in stockholders' equity, not on the income statement.

32) a) T b) T c) F d) F e) T

Loans received from a bank increase assets and liabilities, but do not affect retained earnings. Dividends paid to stockholders decrease retained earnings, not common stock.

33) a) Liquidation is the process of dividing up assets and allocating them to resource providers (creditors and investors).

b) Amount of cash on hand = \$53,000

c) \$15,000

d) \$38,000

 - \$15,000 - \$46,600 - \$4,000 = \$64,900

Wilson Fitness Center

Fundamental Financial Accounting Concepts 11th Edition

by Edmonds CH01

Statement of Cash Flows

For the Year Ended December 31, Year 1

Cash flows from operating activities

Cash receipt from revenue	\$ 65,500
Cash payment for expense	(55,100)
Net cash flow from operating activities	<u>\$ 10,400</u>

Cash flows for investing activities

Cash payment for land	\$ (15,000)
-----------------------	-------------

Cash flows from financing activities

Cash receipt from loan	10,500
Cash receipt from stock issue	48,000
Cash dividend paid to owners	(4,000)
Net cash flow from financing activities	<u>\$ 54,500</u>
Net increase in cash	<u>49,900</u>
Plus: Beginning cash balance	<u>0</u>
Ending cash balance	<u><u>\$ 49,900</u></u>

47) a) \$9,700, b) \$3,500, c) \$3,500, d) \$14,500

Further breakdown of calculations below:

Revenue – Expenses of \$6,200 = \$3,500 net income

Revenue = \$9,700

Net income = Revenue of \$9,700 – \$6,200 = \$3,500

Beginning RE + Net income of \$3,500 = \$3,500 of Ending Retained Earnings

Ending Common Stock of \$11,000 + Ending Retained Earnings of \$3,500 = Total Stockholders' Equity of \$14,500

Fundamental Financial Accounting Concepts 11th Edition by Edmonds CH01

48) a = 16,000

b = 28,000

c = 28,000

d = 12,000
