# Test Bank

# Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01

CORRECT ANSWERS ARE LOCATED AT THE SECOND PART OF THIS DOCUMENT

**SHORT ANSWER. Write the word or phrase that best completes each statement or answers the question.**

1) Indicate how each event affects the elements of financial statements. Use the following letters to record your answer in the box shown below each element. You do not need to enter dollar amounts. If an event increases one account and decreases another account equally within the same element, record I/D. If an event has no impact on the element, record NA.

Increase = I Decrease = D Not Affected = NA

Walker Company issued common stock for \$150,000 cash.

# Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01

**35)** The following business events occurred for Ringgold Company during Year 1, its first year in operation:

- 1.1. Issued stock to investors for \$45,000 cash
- 2.2. Borrowed \$25,000 cash from the local bank
- 3.3. Provided services to its customers and received \$32,000 cash
- 4.4. Paid expenses of \$28,000
- 5.5. Paid \$22,000 cash for land
- 6.6. Paid dividend of \$12,000 to stockholders
- 7.7. Repaid \$10,000 of the loan listed in item 2

**Required:**

1.a) Show the effects of the above transactions on the accounting equation, below. Include dollar amounts of increases and decreases. Enter "NA" for elements of the accounting equation that are not affected by the transaction. If one element of the accounting equation is affected by an increase and also by a decrease, enter each part on a separate line (i.e. asset exchange transaction where one asset increases and another asset decreases). (The effects of the first transaction is shown below.)

2.b) After entering all the events, calculate the total amounts of assets, liabilities, and equity at the end of the year.

Event number	Assets	=	Liabilities	+ Equity
1.	45,000		NA	45,000

# Introductory Financial Accounting for Business 2nd Edition

## by Edmonds CH01

37) At the beginning of Year 2, the accounting records of Grace Company included the accounts and balances shown on the first row of the table below. During Year 2, the following transactions occurred:

1. Received \$95,000 cash for providing services to customers
2. Paid salaries expense, \$50,000
3. Purchased land for \$12,000 cash
4. Paid \$4,000 on note payable
5. Paid operating expenses, \$22,000
6. Paid cash dividend, \$2,500

**Required:**

1.a) Record the transactions in the appropriate accounts. Record the amounts of revenue, expense, and dividends in the retained earnings column. Enter 0 for items not affected. Provide appropriate titles for these accounts in the last column of the table. (The effects of the first event are shown below.)

Event	Assets		= Liabilities +	Stockholder's		Accounts Titles for RE
	Cash	Land	Notes Payable	Common Stock	+ Retained Earnings	
Beginning	29,000	32,000	18,000	33,000	10,000	
1						
2						
3						
4						
5						
6						

1.b) What is the amount of total assets as of December 31, Year 2?

2.c) What is the amount of total stockholders' equity as of December 31, Year 2?

## by Edmonds CH01

### Answer Key

Test name: CH01

1)

<b>Assets</b>	<b>=</b>	<b>Liabilities</b>	<b>+</b>	<b>Common Stock</b>	<b>+</b>	<b>Retained Earnings</b>
I		NA		I		NA

Issuing common stock is an asset source transaction that increases the business's assets (Cash) and its stockholders' equity (Common Stock).

2)

<b>Assets</b>	<b>=</b>	<b>Liabilities</b>	<b>+</b>	<b>Common Stock</b>	<b>+</b>	<b>Retained Earnings</b>
I		I		NA		NA

Borrowing cash is an asset source transaction that increases a business's assets (Cash) and its liabilities (Notes Payable).

3)

<b>Assets</b>	<b>=</b>	<b>Liabilities</b>	<b>+</b>	<b>Common Stock</b>	<b>+</b>	<b>Retained Earnings</b>
I		NA		NA		I

This is an asset source transaction that increases the business's assets (Cash) and stockholders' equity (Retained Earnings).

4)

<b>Assets</b>	<b>=</b>	<b>Liabilities</b>	<b>+</b>	<b>Common Stock</b>	<b>+</b>	<b>Retained Earnings</b>
I / D		NA		NA		NA

Purchasing land for cash is an asset exchange transaction that increases one asset (Land) and decreases another asset (Cash).

5)

## Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01

<b>Assets</b>	=	<b>Liabilities</b>	+	<b>Common Stock</b>	+	<b>Retained Earnings</b>
D		NA		NA		D

Paying expenses is an asset use transaction that decreases the business's assets (Cash) and decreases its stockholders' equity (Retained earnings).

6)

<b>Assets</b>	=	<b>Liabilities</b>	+	<b>Common Stock</b>	+	<b>Retained Earnings</b>
D		NA		NA		D

Paying a cash dividend is an asset use transaction that decreases a business's assets (Cash) and its stockholders' equity (Retained earnings).

7)

<b>Assets</b>	=	<b>Liabilities</b>	+	<b>Common Stock</b>	+	<b>Retained Earnings</b>
I		I		NA		NA

Issuing a note to purchase a building is an asset source transaction that increases a business's assets (Building) and increases its liabilities (Notes Payable).

8) The Financial Accounting Standards Board (FASB)

The Financial Accounting Standards Board (FASB) is a privately funded organization with the primary authority for establishing accounting standards in the United States.

9) Markets include consumers, businesses, and resource owners.

Consumers use resources. Business convert resources to the form that consumers want. Resource owners control the distribution of resources to conversion agents.

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01**

10) Stakeholders are the parties that are interested in operations of an organization. Stakeholders often are users or potential users of accounting information. Stakeholders include resource providers, financial analysts, brokers, attorneys, government regulators and news reporters.

11) International Financial Reporting Standards (IFRS) have been adopted by most countries outside of the United States, and are becoming "global GAAP." Many believe that U.S. companies will be allowed to use either IFRS or U.S. GAAP in the future, and there is an ongoing process to reduce the differences between IFRS and GAAP. The International Accounting Standards Board (IASB), headquartered in London, is responsible for forming these standards.

12) Financial accounting is designed to satisfy the needs of external resource providers (external users) and must adhere to Generally Accepted Accounting Principles. Managerial accounting, however, provides information that is useful to managers within a business (internal users), and does not have to follow GAAP.

13) Similarities: Both types of organizations commonly use specific resources to satisfy consumer demand. These resources are financial resources, physical resources, and labor resources. Accounting systems are used by both types of organizations to measure the cost of the goods and services that are provided, the efficiency and effectiveness of the organizations' operations, and the ability of the organizations to continue to provide goods and services.

Differences: Not-for-profit organizations are established primarily for motives other than making a profit, while most other businesses are motivated by profit. As a result, factors other than profitability influence the resource allocation priorities of not-for-profit organizations.

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01**

14) A business's balance sheet shows the elements: assets, liabilities, and stockholders' equity.

15) A business obtains its assets from creditors, from investors, and from operations.

16) Providing services for cash increases assets and increases stockholders' equity. It is considered an asset source transaction.

17) Paying dividends decreases assets (Cash) and decreases stockholders' equity (Retained Earnings). It is considered an asset use transaction.

18)  $\$225,000 \text{ Assets} = \text{Liabilities } \$75,000 + \text{Stockholders' Equity } \$150,000$ ;  $\text{Assets} = \$225,000$

19) When a business acquires assets from investors, it commits to keep the assets safe and to use the assets in a manner that benefits the investors. The business also grants the investor an ownership interest in the business, thereby allowing the investor (owner) to share in the profits generated by the business. In accounting terms investors are called *stockholders*. A business's commitment to its stockholders is called stockholders' equity.

20) Paid loan, paid expense, and paid dividends to stockholders.

Asset use transactions involve a decrease in assets (for example, Cash) and will also result in a decrease in either liabilities (Notes Payable) or stockholders' equity (Retained Earnings).

21) The statement of cash flows tells how a company obtained and used cash during the accounting period.

The statement of cash flows explains the change in cash from the beginning to the end of the period.

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01**

22) Issuing stock is reported in the financing activities section.

All cash exchanged between a company and its stockholders is considered a financing activity.

23) The Income Statement

The income statement reports on how a business performed during a specific accounting period. Business performance is defined as the benefits earned from customers (revenue) minus the sacrifices that were incurred (expenses) to earn those benefits (revenues).

24) The balance sheet lists the assets of a business and corresponding claims (liabilities and stockholders' equity) on those assets. It draws its name from the accounting equation.

The income statement matches revenue (benefits) with the expenses (sacrifices) that were incurred to generate the revenue.

The statement of changes in stockholders' equity is used to explain the effects of transactions on stockholders' equity during an accounting period.

The statement of cash flows explains how a company obtained and used cash during the accounting period. The statement of cash flows classifies cash receipts (inflows) and payments (outflows) into three categories: financing activities, investing activities, and operating activities.

25) An accounting period is the span of time covered by the financial statements, normally one year; the span of time for which income is measured. The practice of pairing together on the income statement revenues and expenses that were incurred in the same accounting period is known as the matching concept.

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01**

26) a) F b) F c) T d) T e) F

Financial resources are provided to a business by investors and creditors. Businesses, not resource owners, transform resources into products. Resource owners are the main providers of resources in any market.

27) a) F b) T c) T d) T e) F

Financial accounting is primarily intended for external, not internal, stakeholders. Managerial accounting information is usually more detailed than financial accounting information.

28) a) T b) T c) F d) T e) F

Liabilities are reported on the balance sheet. The accounting equation requires that assets be equal to liabilities plus stockholders' equity. Liabilities are reported on the balance sheet, not on the statement of cash flows.

29) a) T b) F c) F d) F e) T

Issuing common stock for cash increases the common stock account, not retained earnings. Net income increases retained earnings, but does not necessarily equal its total. The purchase of a truck increases one asset (Truck) and decreases another asset (Cash) or increases a liability (Note Payable). Retained earnings includes all net income that a company has earned in its existence that has not been paid out in dividends.

## Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01

30) a) T b) F c) F d) T e) F

The issuance of stock to owners for cash is an example of an asset source, not asset exchange, transaction. Purchasing equipment for cash is an example of an asset exchange transaction in which one asset (Cash) decreases and another asset (Equipment) increases. Making a payment on a bank loan is an example of an asset use, not asset exchange, transaction.

31) a) F b) T c) F d) T e) F

A cash dividend paid to stockholders is reported in the financing activities section of the statement of cash flows. A cash dividend paid to stockholders is reported on the statement of changes in stockholders' equity, not on the income statement. Changes in retained earnings for the accounting period are reported on the statement of changes in stockholders' equity, not on the income statement.

32) a) T b) T c) F d) F e) T

Loans received from a bank increase assets and liabilities, but do not affect retained earnings. Dividends paid to stockholders decrease retained earnings, not common stock.

33) Accounting Equation

(a) and (b)

	<b>Assets</b>	<b>=</b>	<b>Liabilities</b>	<b>+</b>	<b>Equity</b>
1.	25,000				25,000
2.	18,000		18,000		
3.	28,000				28,000
4.	(21,400)				(21,400)
5.	22,000				

# Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01

(22,000)

6. (15,000) (15,000)

7. (12,000) (12,000)

<b>Totals</b>	22,600	6,000	16,600
---------------	--------	-------	--------

34) 1.a) \$210,000

2.b) \$225,000

3.c) \$90,000

a) Assets = liabilities + stockholders' equity = \$95,000 + 115,000 = \$210,000

b) Assets – liabilities = stockholders' equity. Stockholders' equity = \$320,000 – 95,000 = \$225,000

c) Assets = claims. Total amount of claims = \$90,000

<b>Total liabilities and stockholders' equity</b>	<u>\$84,150</u>

45) a) Total assets = \$48,000 + \$65,500 + \$10,500 - \$8,500 + \$15,000 - \$15,000 - \$46,600 - \$4,000 = \$64,900

b)

Wilson Fitness Center

## Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01

### Statement of Cash Flows

For the Year Ended December 31, Year 2

#### Cash flows from operating activities

Cash receipt from revenue	\$ 65,500
Cash payment for expense	(55,100)
Net cash flow from operating activities	<u>\$ 10,400</u>

#### Cash flows for investing activities

Cash payment for land	<u>\$ (15,000)</u>
Cash flows from financing activities	

Cash receipt from loan	10,500
Cash receipt from stock issue	48,000
Cash dividend paid to owners	(4,000)
Net cash flow from financing activities	<u>\$ 54,500</u>
Net increase in cash	49,900
Plus: Beginning cash balance	<u>0</u>
Ending cash balance	<u><u>\$ 49,900</u></u>

46) a) \$9,700, b) \$3,500, c) \$3,500, d) \$14,500

## Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01

47) a = 16,000

b = 28,000

c = 28,000

d = 12,000

e = 96,000

f = 100,000

g = 24,000

h = 16,000

i = 96,000

j = (16,000)

k = 28,000

l = 24,000

Solve for "l" first:  $l + 80,000 - 12,000 = 92,000$ ;  $l = 24,000$

Next, solve for "k":  $k - 20,000 + 92,000 = 100,000$ ;  $k = 28,000$

Next, solve for "j":  $44,000 - j = 28,000$ ;  $j = 16,000$

Next, solve for "a":  $a = j$ ;  $a = 16,000$

Next, solve for "b":  $44,000 - 16,000 = b$ ;  $b = 28,000$

Next, solve for "c":  $c = b$ ;  $c = 28,000$

Next, solve for "d":  $0 + 28,000 - d = 8,000$ ;  $d = 12,000$  (can also be taken from statement of cash flows)

Next, solve for "e":  $80,000 + 16,000 = 96,000$

Next, solve for "f":  $f + 20,000 = 120,000$ ;  $f = 100,000$

Next, solve for "h":  $h = 16,000$  (taken from statement of changes in stockholders' equity)

Next, solve for "i":  $80,000 + 16,000 = i$ ;  $i = 96,000$

Last, solve for "g":  $g + 96,000 = 120,000$ ;  $g = 24,000$

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

**106)** Lexington Company engaged in the following transactions during Year 1, its first year in operation: (Assume all transactions are cash transactions.)

- 1.Acquired \$4,600 cash from issuing common stock.
- 2.Borrowed \$3,000 from a bank.
- 3.Earned \$3,900 of revenues.
- 4.Incurred \$2,560 in expenses.
- 5.Paid dividends of \$560.

Lexington Company engaged in the following transactions during Year 2: (Assume all transactions are cash transactions.)

- 1.Acquired an additional \$1,300 cash from the issue of common stock.
- 2.Repaid \$1,860 of its debt to the bank.
- 3.Earned revenues, \$5,300.
- 4.Incurred expenses of \$3,070.
- 5.Paid dividends of \$1,600.

What was the amount of retained earnings that will be reported on Lexington's balance sheet at the end of Year 1?

106) \_\_\_\_\_

- A) \$3,340.
- B) \$3,900.
- C) \$1,340.
- D) \$780.

# **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B Answer Key**

Test name: CH01B

1) TRUE

This is true. Resource providers include creditors and investors.

2) TRUE

This is true. Businesses transform resources into goods and services, such as cars, that are desirable to consumers.

3) FALSE

This is false. A business creates value by earning income, so earnings or income describe that value, not assets.

4) TRUE

This is true. The types of resources needed by a business are financial, physical, and labor resources.

5) TRUE

This is true. Financial accounting information is usually less detailed than managerial accounting information.

6) TRUE

This is true. The Financial Accounting Standards Board is charged with establishing accounting standards for US businesses. It is not an agency of the US government, but rather a privately funded organization.

7) TRUE

This is true. A business must report its income, assets, liabilities and equity separate from the owner of that business.

8) FALSE

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

This is false. Land is an account within the element assets. The elements of the financial statements include assets, liabilities, stockholders' equity. Stockholders' equity can be further broken down into two additional elements: common stock, and retained earnings.

9) TRUE

This is true. Liabilities represent the future obligations of a business entity.

10) FALSE

This is false. There are three sources of assets. First, a business can borrow assets from creditors. The second source of assets is investors. The third source of assets is operations.

11) FALSE

This is false. If a business retains the assets, it commits to use those assets for the benefit of the stockholders. This increase in the business's commitments to its stockholders is normally called retained earnings.

12) TRUE

This is true. Once an asset is recorded, it is not adjusted for increases in market value.

13) TRUE

This is true. An asset source transaction increases a business's assets and either liabilities or equity, which make up claims to assets.

14) TRUE

This is true. Borrowing money from the bank is an example of an asset source transaction because the asset cash increases as well as the liability notes payable.

15) FALSE

This is false. Because asset use transactions result in a decrease in total assets, total claims must decrease as well.

16) FALSE

This is false. All four financial statements are interconnected.

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

17) FALSE

This is false. Dividends are not expenses. Therefore, they are not reported on the income statement. Dividends are reported on the statement of changes in stockholders' equity and the statement of cash flows.

18) D

The Financial Accounting Standards Board is a privately funded group charged with establishing accounting standards for the U.S. It is not a branch of the U.S. government.

19) A

Businesses serve as conversion agents in the marketplace, transforming basic resources provided by resource owners into goods and services that consumers demand. Regulatory agencies set policies that affect the way that businesses operate.

20) B

Businesses borrow money from creditors, and repay the amount borrowed, plus an additional fee known as interest. Investors, in contrast, provide financial resources in exchange for ownership interest in the business. Consumers demand goods and services from businesses.

21) D

Financial accounting is intended to satisfy the needs of external users of accounting information. Managerial accounting, including cost accounting, is intended for the needs of internal users, or managers, of a business. Tax accounting is specifically intended for tax regulatory agencies.

22) A

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

Managerial accounting provides information primarily for internal users, or managers, of businesses. Managers require more detailed information about a business than do external users, and sometimes that information is nonfinancial in nature. Managerial accounting information focuses on divisional rather than overall profitability and is not typically made available to external users, such as investors.

23) A

Generally Accepted Accounting Principles are established by the Financial Accounting Standards Board.

24) B

The International Accounting Standards Board establishes accounting standards for most countries outside of the U.S.

25) C

The three reporting entities are Jack Henry, Walt Bank, and Wooden Wheels. A separate set of accounting records would be kept for each entity.

26) A

Jack Henry's cash increase of \$150,000 is calculated by subtracting the \$650,000 in cash he transferred to Wooden Wheels from the \$800,000 in cash he borrowed from Walt Bank. Wooden Wheels will report an increase in cash of \$650,000 from the transfer of cash from Jack Henry. Finally, Walt Bank will report a decrease in cash of \$800,000 due to the loan it provided Jack Henry.

27) D

The four reporting entities are Ellen Gatsby, Ben Gatsby, Sarah Gatsby and Gatsby Company.

28) C

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

Cash received from providing services to customers is an example of revenue and is an asset source transaction. Cash received from the result of a bank loan results in a liability, Notes Payable. Cash investments made by owners increase the stockholders' equity account Common Stock. Cash received from the sale of land for its original selling price is an asset exchange transaction that decreases one asset, Land, and increases another asset, Cash.

29) D

Cash is not an element of the financial statements. It is an account that is part of the element assets.

30) B

Assets are resources that a business uses to conduct its operations. Examples include cash, inventory, equipment, building, land, etc. In the process of conducting operations, a business uses some assets in order to produce greater quantities of other assets. For example, Walmart may use (sell) some of its inventory in order to receive cash from a customer. The cash received is revenue. In this case, the remaining inventory is a resource (asset) that will be used (sold) in the future to produce revenue.

31) D

Businesses obtain assets from three sources. Specifically, businesses can borrow assets from creditors, acquire them from investors (owners), or generate them through operations.

32) C

If total assets decrease, then assets were used. Since the accounting equation must balance (i.e. assets must equal claims), the decrease on the asset (left) side of the accounting equation must be offset by a decrease on the claims (right) side of the equation. Since liabilities, common stock, and retained earnings appear on the right side of the equation, a decrease in an asset account must be offset by a decrease in one of these right side accounts.

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

33) D

When a business borrows money from a creditor it accepts an obligation (liability) to repay the money to the creditor in the future. Borrowing money causes the business' assets and its liabilities to increase. In the accounting equation, assets must equal claims. Liabilities and stockholders' equity represent the claims on assets.

34) D

When a company has an increase in assets from operations and chooses to reinvest the profits into the business it is referred to as retained earnings. If the business chooses to distribute the increase in assets from operations to the owners of the business it is called a dividend. A liability would represent an obligation to repay debt to an external party. Common stock represents the proportionate share of ownership each stockholder has in the business.

35) A

The accounting equation shows the equality between a company's assets and the sources of those assets. The sources include liabilities, common stock and retained earnings. Therefore,  $\text{Assets} = \text{Liabilities} + \text{Common Stock} + \text{Retained Earnings}$ .

36) B

When a company redistributes its assets back to the owners of the business it is referred to as a dividend. A liability would represent an obligation to repay debt to an external party. Retained earnings are the profits that have been retained within the company rather than distributed to the owners. Common stock represents the proportionate share of ownership each stockholder has in the company.

37) A

In the accounting equation, assets equal claims (liabilities + stockholders' equity). If assets are \$1,000, total claims must also be \$1,000. Therefore, liabilities must be  $\$1,000 - \$600$ , or \$400.

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

38) C

Assets = Liabilities + Stockholders' Equity; Stockholders' Equity includes common stock and retained earnings.  $\$50,000 = \$22,000 + \$15,000 + \text{Retained earnings}$ ; Retained earnings =  $\$13,000$

39) B

If assets on December 31, Year 1 totaled \$112,000, total claims (including liabilities, common stock, and retained earnings) on that date must have also been \$112,000. If liabilities were \$29,000 and common stock was \$26,000, retained earnings on December 31, Year 1 must have been \$57,000. At the end of Year 2, the company reported \$74,000 in retained earnings, a \$17,000 increase. During Year 2, Stosch paid a \$28,000 cash dividend, which reduced retained earnings. Therefore, Year 2 net income must have been \$17,000 greater than the dividend paid.  $\$28,000 + \$17,000 = \$45,000$ .

40) B

If assets on December 31, Year 1 totaled \$40,000, total claims (including liabilities, common stock, and retained earnings) on that date must have also been \$40,000. If liabilities were \$15,000 and common stock was \$12,000, retained earnings on December 31, Year 1 must have been \$13,000. At the end of Year 2, the company reported \$18,000 in retained earnings, a \$5,000 increase. During Year 2, Stosch paid a \$14,000 cash dividend, which reduced retained earnings. Therefore, Year 2 net income must have been \$5,000 greater than the dividend paid.  $\$14,000 + \$5,000 = \$19,000$ .

41) D

Issuing common stock increases both assets (Cash) and stockholders' equity (Common Stock). Stockholders' equity and liabilities collectively make up claims in the accounting equation.

42) A

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

In the accounting equation, assets equal claims (liabilities + stockholders' equity). If assets are \$500, total claims must also be \$500. Therefore, stockholders' equity must be \$500 – \$200, or \$300.

43) A

Assets = Liabilities + Stockholders' Equity

Assets = Liabilities + Common stock + Retained earnings

If a company's total assets increased while liabilities and common stock were unchanged, retained earnings must have increased. In order for retained earnings to increase, the company must have reported net income. In other words, its revenues must have been greater than its expenses.

44) B

Paying cash for land is an asset exchange transaction that increases one asset (Land) and decreases another asset (Cash). The result is no overall change in total assets.

45) D

Retained earnings of \$5,000 is equal to 25% of the company's assets, indicating that 25% of Turner's assets are from prior earnings. \$8,000, or 40%, of Turner's assets are liabilities, indicating that those assets are the result of borrowed resources. A company can pay out no more in dividends than it has in its Retained Earnings account.

46) D

If assets total \$100,000, claims must also total \$100,000. Claims include liabilities, common stock and retained earnings. Because liabilities and retained earnings equal \$65,000, common stock must be \$35,000. The common stock account represents the assets that were obtained through investors. \$35,000 is 35% of \$100,000.

47) A

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

On January 1, Year 2:

Assets = Liabilities + Common Stock + Retained Earnings

\$12,500 = \$4,500 + \$3,000 + Retained Earnings

Retained Earnings = \$5,000

During Year 2:

Beginning retained earnings + Net income – Dividends = Ending retained earnings

\$5,000 + Net Income – \$2,000 = \$6,000

Net Income = \$3,000

48) B

Providing services for cash increases a company's assets (Cash) and stockholders' equity (Retained Earnings).

49) B

Cash, an asset, increased by \$1,500 (calculated as receipts of \$6,500 – payment of \$1,000 – payment of \$4,000). Stockholders' equity also increased by \$1,500 (calculated as revenue of \$6,500 – dividends of \$1,000 – expenses of \$4,000).

50) B

Beginning Retained Earnings + Revenue – Expenses – Dividends = Ending Retained Earnings

Beginning Retained Earnings + \$2,400 – \$1,300 – \$700 = \$2,150

Beginning Retained Earnings = \$1,750

51) A

Beginning Retained Earnings + Revenue – Expenses – Dividends = Ending Retained Earnings

Beginning Retained Earnings + \$1,500 – \$800 – \$500 = \$3,500

Beginning Retained Earnings = \$3,300

52) D

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

Paying cash to purchase land is an asset exchange transaction. The asset account, Cash, decreases and the asset account, Land, increases. Total assets are not affected.

53) A

Borrowing cash is an asset source transaction that increases a business's assets (Cash) and increases its liabilities (Notes Payable).

54) D

Borrowing cash increases assets (Cash) and increases liabilities (Notes Payable).

55) A

An asset exchange transaction is one that increases one asset account and decreases another, resulting in no net change in assets. There are no changes to the company's liabilities and stockholders' equity either.

Buying land for cash is an example of an asset exchange transaction.

56) B

An asset use transaction is one that decreases a business's assets and decreases either liabilities or stockholders' equity. In this asset use transaction, assets and stockholders' equity decreased. An example of an asset use transaction with this effect would be paying cash for salary expense.

57) C

Purchasing land for cash is an asset exchange transaction that does not affect total assets. Issuing stock to owners is an asset source transaction that increases assets. Borrowing cash from a bank is an asset source transaction that increases assets. Providing services for cash is an asset source transaction that increases assets.

58) C

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

Net income is \$3,600 (Revenue of \$8,000 – Expenses of \$4,400).

Expenses are economic sacrifices incurred to produce revenue. In this case, the company's sacrifice was a decrease in assets (Cash). Note that dividends are not expenses. Dividends are not paid in order to produce revenue. Instead they are transfers of wealth from the business to its owners. Purchasing land is not an expense because it is not an economic sacrifice incurred to produce revenue.

59) D

A cash dividend decreases the asset account Cash and decreases the stockholders' equity account Retained Earnings.

60) B

Providing services for cash increases assets (Cash) and increases stockholders' equity (Retained Earnings).

61) C

Stockholders' equity is made up of: Common Stock and Retained Earnings. The statement of changes in stockholders' equity shows changes in those two accounts over the period.

62) B

Dividends are reported as a deduction from retained earnings on the Statement of Changes in Stockholders' Equity. The other transactions listed (borrowing cash from the bank, purchasing land for cash and paying off a portion of a note payable) do not affect stockholders' equity.

63) D

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

The total stockholder's equity equals Ending Common Stock + Ending Retained Earnings. First, ending common stock is calculated as:

beginning common stock + stock Issued or  $\$300,000 + \$90,000 = \$390,000$  ending common stock. Next, ending retained earnings is calculated as: beginning retained earnings + Net income – Dividends or  $\$15,000 + \$50,000 - \$8,000 = \$57,000$  ending retained earnings.

Finally, ending common stock of  $\$390,000 +$  ending retained earnings of  $\$57,000 =$  total stockholders' equity of  $\$447,000$ . Paying back a portion of a note payable does not affect stockholders' equity and therefore it is not included in the calculation.

64) D

Purchasing land (a long-lived asset) for cash is an investing activity. Issuing common stock and paying dividends are both financing activities. Cash inflow from interest revenue is an operating activity.

65) C

Beginning cash balance + Increase from operating activities – Decrease from financing activities +/- Increase or decrease from investing activities = Ending cash balance

$\$4,800 + \$9,800 - \$3,700 +/-$  Increase or decrease from investing activities =  $\$14,600$

$\$3,700 =$  Increase in investing activities

66) A

Beginning cash balance + Increase from operating activities – Decrease from financing activities +/- Increase or decrease from investing activities = Ending cash balance

$\$4,000 + \$10,000 - \$2,000 +/-$  Increase or decrease from investing activities =  $\$11,000$

$\$1,000 =$  Decrease from investing activities

67) B

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

Beginning retained earnings + Revenue – Expenses – Dividends =  
Ending retained earnings

$$\$4,000 + \$12,000 - \text{Expenses} - \$1,000 = \$7,500$$

$$\text{Expenses} = \$7,500$$

68) C

Beginning retained earnings + Revenue – Expenses – Dividends =  
Ending retained earnings

$$\$3,500 + \$22,000 - \text{Expenses} - \$1,500 = \$7,500$$

$$\text{Expenses} = \$16,500$$

69) A

Assets = Liabilities + Common Stock + Ending Retained Earnings

$$\$50,000 = \text{Liabilities} + \$15,000 + \$7,500$$

$$\text{Liabilities} = \$27,500$$

70) B

The balance sheet provides information about a company as of a specific point in time, the other three statements provide information about a period of time such as a month, a quarter, or a year.

71) C

Paying cash dividends, and any cash exchanged between a company and its stockholders, is a financing activity.

72) C

The income statement matches asset increases from operations (revenues) with asset decreases from operations (expenses).

73) A

Cash revenue and cash expenses are operating activities. Paying dividends is a financing activity.  $\$3,700 \text{ revenue} - \$2,100 \text{ expense} = \$1,600 \text{ cash inflow from operating activities.}$

74) C

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

Cash revenue and cash expenses are operating activities. Paying dividends is a financing activity.  $\$1,500 \text{ revenue} - \$1,200 \text{ expense} = \$300 \text{ cash inflow from operating activities.}$

75) D

Providing services to a customer for cash increases assets and stockholders' equity on the balance sheet. It also increases revenue, and therefore, net income on the income statement.

76) D

Revenue minus expenses equal net income of  $\$2,150$  (calculated as  $\$3,650 - \$1,500$ ). Total assets increased by  $\$1,150$  (calculated as  $\$3,650 - \$1,500 - \$1,000$ ). Cash from operating activities increased by  $\$2,150$  (calculated as  $\$3,650 - \$1,500$ ).

77) D

Revenue minus expenses equal net income of  $\$350$  (calculated as  $\$1,950 - \$1,600$ ). Total assets increased by  $\$200$  (calculated as  $\$1,950 - \$1,600 - \$150$ ). Cash from operating activities increased by  $\$350$  (calculated as  $\$1,950 - \$1,600$ ).

78) B

Repaying a bank loan is a cash outflow for financing activities that decreases assets (Cash) and decreases liabilities (Notes Payable).

79) A

Beginning retained earnings + Revenues – Expenses – Dividends =  
Ending retained earnings

$$\$400 + \$1,500 - \text{Expenses} - \$300 = \$900$$

$$\text{Expenses} = \$700$$

80) B

Beginning retained earnings + Revenues – Expenses – Dividends =  
Ending retained earnings

$$\$300 + \$1,100 - \text{Expenses} - \$200 = \$800$$

$$\text{Expenses} = \$400$$

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

81) A

$\$40,000 \text{ inflow from consulting services} - \$9,500 \text{ outflow for rent expense} - \$22,000 \text{ outflow for salaries expense} = \$8,500 \text{ inflow}$

82) B

$\$39,000 \text{ inflow from consulting services} - \$9,000 \text{ outflow for rent expense} - \$21,000 \text{ outflow for salaries expense} = \$9,000 \text{ inflow}$

83) B

$\text{Beginning notes payable balance } \$0 + \$43,000 \text{ loan} - \$24,000 \text{ repayment} = \$19,000 \text{ ending balance}$

84) D

$\text{Beginning notes payable balance } \$0 + \$25,000 \text{ loan} - \$15,000 \text{ repayment} = \$10,000 \text{ ending balance}$

85) B

$\$62,000 \text{ revenue} - \$15,000 \text{ rent expense} - \$33,000 \text{ salaries expense} = \$14,000 \text{ net income}$

86) A

$\$39,000 \text{ revenue} - \$9,000 \text{ rent expense} - \$21,000 \text{ salaries expense} = \$9,000 \text{ net income}$

87) A

$\text{Net cash flow from financing activities} = \$625 \text{ inflow from stock} - \$430 \text{ outflow for loan repayment} - \$160 \text{ outflow for dividends} = \$35.$

88) C

$\text{Net cash flow from financing activities} = \$325 \text{ inflow from stock} - \$220 \text{ outflow for loan repayment} - \$100 \text{ outflow for dividends} = \$5$

89) C

$\$0 \text{ beginning balance} + \$970 \text{ borrowed from the bank} = \$970 \text{ total liabilities}$

90) C

$\$0 \text{ beginning balance} + \$420 \text{ borrowed from the bank} = \$420 \text{ total liabilities}$

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

91) B

Stockholders' equity = Common stock + Retained earnings

At end of Year 1:

Stockholders' equity = \$1,400 common stock issued + (\$0 beginning balance + \$1,100 revenue – \$340 expenses – \$140 dividend) = \$2,020

92) D

Stockholders' equity = Common stock + Retained earnings

At end of Year 1:

Stockholders' equity = \$950 common stock issued + (\$0 beginning balance + \$650 revenue – \$250 expenses – \$50 dividend) = \$1,300

93) C

Total assets at end of Year 1 = \$1,050 + \$520 + \$750 – \$270 – \$70 = \$1,980

Total assets at end of Year 1 becomes the beginning balance of total assets for Year 2.

\$1,980 beginning balance + \$425 – \$290 + \$850 – \$400 – \$120 = \$2,445

94) A

Total assets at end of Year 1 = \$950 + \$420 + \$650 – \$250 – \$50 = \$1,720

Total assets at end of Year 1 becomes the beginning balance of total assets for Year 2.

\$1,720 beginning balance + \$325 – \$220 + \$750 – \$360 – \$100 = \$2,115

95) D

\$850 inflow from revenue – \$290 outflow for expenses = \$560 inflow

96) A

\$650 inflow from revenue – \$250 outflow for expenses = \$400 inflow

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

97) D

Paying cash for dividends and receiving cash for common stock are financing activities. Selling land for cash is an investing activity.

98) B

\$9,200 cash inflow from issuing stock – \$900 cash outflow for dividends = \$8,300 net cash inflow from financing activities

99) D

\$9,000 cash inflow from issuing stock – \$250 cash outflow for dividends = \$8,750 net cash inflow from financing activities.

100) D

Paying cash for rent expense decreases assets (Cash) and decreases stockholders' equity (Retained Earnings). Liabilities are not affected. It is reported as a cash outflow for operating activities on the statement of cash flows.

101) D

Paying cash to purchase land is an asset exchange transaction that decreases one asset (Cash) and increases another asset (Land); therefore, there is no overall effect on total assets, total liabilities, or total stockholders' equity. It is reported as a cash outflow from investing activities on the statement of cash flows.

102) A

\$1,300 cash inflow from issuing stock – \$1,860 cash outflow for loan repayment – \$1,600 cash outflow for dividends = \$2,160 cash outflow for financing activities

103) A

\$1,000 cash inflow from issuing stock – \$2,600 cash outflow for loan repayment – \$1,280 cash outflow for dividends = \$2,880 cash outflow for financing activities

104) D

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

$\$0 \text{ beginning balance} + \$4,500 \text{ (cash)} + \$2,950 \text{ (cash)} + \$3,850 \text{ (cash)} - \$2,550 \text{ (cash)} - \$550 \text{ (cash)} = \$8,200$

105) A

$\$0 \text{ beginning balance} + \$6,000 \text{ (cash)} + \$4,400 \text{ (cash)} + \$6,200 \text{ (cash)} - \$4,800 \text{ (cash)} - \$800 \text{ (cash)} = \$11,000$

106) D

$\$0 \text{ beginning balance} + \$3,900 \text{ revenue} - \$2,560 \text{ expense} - \$560 \text{ dividends} = \$780$

107) D

$\$0 \text{ beginning balance} + \$6,200 \text{ revenue} - \$4,800 \text{ expense} - \$800 \text{ dividends} = \$600$

108) C

$\$2,650 \text{ beginning balance} - \$1,615 \text{ loan repayment} = \$1,035$

109) B

$\$4,400 \text{ beginning balance} - \$2,600 \text{ loan repayment} = \$1,800$

110) A

$\$500 \text{ beginning balance} + \$1,200 \text{ revenue} - \$800 \text{ expenses} = \$900$

111) A

Expenses and revenues are reported on the income statement. Net income is reported on the statement of stockholders' equity, but expenses are not.

112) D

Dividends are not included on the income statement. They are, however, reported as a deduction from retained earnings on the statement of changes in stockholders' equity and as a cash outflow from financing activities on the statement of cash flows.

113) B

Liabilities are an element on the balance sheet. As such, liabilities do not appear on the income statement, statement of cash flows, or the statement of changes in stockholders' equity.

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

114) C

Earning cash revenue increases assets (Cash) and stockholders' equity (Retained Earnings).

115) B

Paying cash for expenses decreases assets (Cash) and decreases stockholders' equity (Retained Earnings).

116) C

Paying cash dividends decreases assets (Cash) and decreases stockholders' equity (Retained Earnings).

117) A

Issuing common stock increases assets (Cash) and stockholders' equity (Common Stock).

118) A

An asset source transaction increases assets and can either increase liabilities (in the case of borrowing cash) or stockholders' equity (in the case of issuing stock or earning revenue).

119) B

Earning cash revenue must have been the event that affected the financial statements as indicated because earning cash revenue increases assets (Cash) and increases stockholders' equity (Retained Earnings).

120) A

Issuing common stock would increase assets (Cash) and increase stockholders' equity (Common Stock).

121) B

Incurring a cash expense would decrease assets (Cash) and decrease stockholders' equity (Retained Earnings).

122) D

## **Introductory Financial Accounting for Business 2nd Edition by Edmonds CH01B**

An asset source transaction is any transaction that results in a net increase in assets. It could be accompanied by an increase in liabilities (as in the case of borrowing cash), an increase in common stock (as in the case of issuing common stock), or an increase in retained earnings (as in the case of earning revenue).

123) A

The income statement compares the benefits and sacrifices the company experiences from its operations. The statement of cash flows shows the cash inflows and outflows in categories such as operating, investing, and financing activities. The balance sheet shows the company's assets and the sources of those assets.

124) E

GAAP requires all four financial statements.

125) D

Net income is shown on the Income Statement. It is also shown as an addition to Retained Earnings on the Statement of Changes in Stockholders' Equity.

126) A

The balance sheet lists a company's assets, liabilities and stockholders' equity. From the information given, total assets, land, common stock, notes payable, retained earnings, and total liabilities and stockholders' equity would be listed on the balance sheet.

127) B

The Income Statement lists a company's Revenue, Expenses and Net Income for the period.

128) A

When expenses are greater than revenues there is a net loss. When revenues are greater than expenses there is net income.
