19) X Inc. and Y Inc. are virtually identical companies with identical cost structures and very similar business practices operating in the same lines of business. X Inc. and Y Inc. are both public companies based in Canada and follow IFRS. The following are the condensed income statements for both companies:

| | X Inc. | Y Inc. |
|-------------------------|------------------|------------------|
| Sales: | \$1,000,000 | \$2,000,000 |
| Less: | | |
| Cost of Goods Sold | <u>500,000</u> | <u>1,600,000</u> |
| Gross Margin | \$500,000 | \$400,000 |
| Administrative Expenses | <u>200,000</u> | <u>300,000</u> |
| Net Income | <u>\$300,000</u> | <u>\$100,000</u> |

Required:

Given the information provided, what are some possible causes for the differing results of these companies?

Modern Advanced Accounting In Canada 10th Edition by Herauf Ch01 Answer Key

Test name: Ch01

- 1) TRUE
- 2) TRUE
- 3) FALSE

Although the titles balance sheet or income statement is recommended in IAS 1, it is not mandatory. Titles such as the statement of financial position or statement of profit or loss are permitted.

- 4) D
- 5) C
- 6) C
- 7) C
- 8) C
- 9) D
- 10) C
- 11) D
- 12) C
- 13) A
- 14) B
- 15) B
- 16) A
- 17) D

The final report would not have a discussion of alternatives for each issue unless the issue was very contentious. Furthermore, if an alternative was dismissed or determined to be inappropriate, it would be redundant to provide arguments to the users in the final report.

Modern Advanced Accounting In Canada 10th Edition by Herauf Ch01

18) In 2006, CPA Canada decided to harmonize the CPA Canada Handbook with IFRS for publicly accountable enterprises. In most cases, the IFRS Standards were similar to Canadian GAAP prior to the adoption of the international standards; however, in some cases, there were differences because the IFRS were not based on the *Conceptual Framework*. These IFRS were not accepted.

The *Conceptual Framework* is referenced to assist the International Accounting Standards Board (IASB) to develop IFRS to ensure they are based on consistent concepts and so that similar transactions are treated the same way to provide useful information for investors, lenders and other creditors.

In addition, if no IFRS Standards apply to a particular transaction, the *Conceptual Framework* is used by companies to develop an accounting policy. Furthermore, on a broader basis, helps stakeholders to understand and interpret the Standards.

Modern Advanced Accounting In Canada 10th Edition by Herauf Ch01

19) There could be many possible explanations for these differing results.

Y Inc.'s net income is \$100,000, compared to X Inc.'s \$300,000.

Conversely, Y Inc.'s sales are twice those of X Inc. What is particularly noteworthy is Y Inc.'s 20% gross margin compared to X Inc.'s 50% gross margin. This could be due to the accelerated depreciation (double-declining versus straight-line) on Y Inc.'s depreciable properties. Y Inc. could have also accelerated revenue recognition.

Smoothing practices may have been applied to reduce Y Inc.'s income, and of course, its tax liability. Y Inc.'s income may have been further reduced by higher estimates (for example, bad debt expense, warranty costs, etc.) which are not necessarily be indicative of economic conditions.

If Y Inc. has attempted to distort the real situation, it is possible that Y Inc. may have reported sales that never occurred or reported inventory that does not exist.

Note: The above analysis is not exhaustive. Students may be able to identify other valid differences.

Modern Advanced Accounting In Canada 10th Edition by Herauf Ch01

20) External users require high-quality financial information to enable them to assess the likelihood of making a reasonable return with an acceptable level of risk. It is important that the quality of the financial statements provide useful and reliable information to assess the prospects of future cash flows or future earnings.

The users want the information to accurately represent what has happened during the past period. Distorting the real situation is not a faithful representation of the actual situation. The result is the external users are not able to make appropriate decisions as to whether to increase, decrease or maintain their level of participation with the reporting entity in their capacity as investor, creditor, supplier and/or customer.

21) Management can represent the financial situation of a company by

- using an accounting method that does not match the actual situation,
- managing earnings by increasing profits by recognizing revenue earlier than usual or delaying the recognition of an expense to a later period,
- not following GAAP for certain transactions or
- reporting fictitious transactions.

Note: Students may be able to provide other methods not listed above.

Modern Advanced Accounting In Canada 10th Edition by Herauf Ch01

22) Procedures to analyze a company's financial statements:

Perform common-size analysis and interpret the results.

Review the accounting policies and estimates used by the company to ensure that they are appropriate.

Adjust the financial statements, as necessary, to use appropriate accounting policies and estimates.

Calculate the ratios for one or more periods.

Compare the ratios to relevant benchmarks.

Interpret the results of the analysis to determine whether they are better, worse or the same as the benchmark.

Decide whether to increase, decrease or maintain the level of participation with the reporting entity.
