51) Short Answer

If a witness inadvertently answers a question before the judge can make the ruling and the objection is sustained, or if the sustained objection is made after the witness has already answered, the judge will order the answer stricken from the record and admonish the jury to disregard the answer. The law expects the jury to do so. However, it is practically impossible to erase a thought completely once it has been planted in the minds of jurors. Thus, if the information that the jury heard is too damaging or too prejudicial to the defendant, the judge may declare a mistrial.

TBEXAM.COM

52) Short Answer

After direct examination is completed, the opposing attorney may, as desired, cross-examine the witness. In most instances, the attorney will cross-examine for several reasons. First, the cross-examiner may hope to shake the witness's story and thereby cause the jury to give the testimony less weight. Second, the cross-examiner may try to show that the witness is prejudiced and consequently may have testified incorrectly or untruthfully. Third, the cross-examiner may try to show that the witness has made prior inconsistent statements and thus should not be believed by the jury.

53) Short Answer

Criminal Evidence Edition 9 by Garland

The duties include:

1. Deciding what law applies to the case
2. Interpreting the law of the case for the jury
3. Deciding what evidence is and is not admissible
4. Ruling on objections made by the attorneys
5. Determining the qualifications of witnesses
6. Protecting witnesses from overzealous cross-examinations
7. Ensuring that the trial proceeds efficiently and effectively
8. In most states, in most instances, imposing sentence upon the defendant

54) Short Answer

A trial allows competing sides to tell their stories of the facts as they perceive them to be in a way that can be followed by a judge and/or jury so that one side is victorious.

55) Short Answer

Although the qualifications of a trial juror may vary somewhat from state to state, the general qualifications are quite similar. The person must be an adult, meaning 18 years of age or over. The person must be a citizen of the United States and a resident within the jurisdiction of the court involved. The prospective juror must have a sufficient knowledge of the English language to understand the testimony and to be able to communicate during the deliberation. In most states, the person must have use of their natural faculties, meaning the ability to see, hear, and talk, although in some jurisdictions in recent years persons with disabilities have been permitted to sit on juries with assistance. A person with a past felony conviction will be disqualified from jury duty in most states. And, in most states, jurors are selected from lists of registered voters.

56) Short Answer

Voir dire is the process whereby judges and/or attorneys question potential jurors to determine which individuals may be able to act impartially and could serve as an unbiased juror.

57) Short Answer

1. Collect physical evidence
2. Interview witnesses
3. Discuss the case in detail with the prosecuting attorney

58) Short Answer

In a criminal trial, the prosecution must present enough evidence to convince the jury of the defendant's guilt beyond a reasonable doubt. Proof beyond a reasonable doubt is the highest level of proof demanded by American law. In a civil trial, the amount of proof necessary is only a preponderance of the evidence. A preponderance of the evidence is 50 percent plus a feather in one's favor.

Criminal Evidence Edition 9 by Garland

59) Short Answer

An alternate juror sits in the courtroom and hears all the evidence but does not participate in the deliberation process unless a primary juror is excused from jury duty during the trial.

60) Short Answer

An opening statement provides a road map of the case. The attorney and the prosecution in their respective opening statements will explain to the jury how they intend to prove either the guilt or innocence of the defendant and what evidence will be presented to achieve that end. An opening statement is often most effective in the form of a story or narrative. In contrast, a closing argument is a summary of the case and a final opportunity for the lawyers to persuade the jury to their view of the evidence.

61) Short Answer

For example, if a person is on trial for drug possession involving possession of marijuana for personal use, a jury might acquit the person because its members do not believe that possession of such drugs should be illegal even if the prosecution has presented evidence to support all of the elements of the crime.

62) Short Answer

In *Apprendi v. New Jersey*, the Court held that any fact that increases the penalty for a crime beyond the statutory maximum must be submitted to a jury and proved beyond a reasonable doubt. In *Ring v. Arizona*, the Court decided that if the defendant is subject to the death penalty, a jury must determine the presence or absence of aggravating factors required to impose the death penalty. In *Blakely v. Washington*, the Court declared that the sentencing guidelines allowing a trial judge to find the fact necessary to trigger a sentence above the statutory maximum violated the Sixth Amendment principle stated in *Apprendi*.

63) Short Answer

The Supreme Court's decisions indicate that mandatory sentencing systems contemplated by state and federal sentencing guidelines are now seriously impaired, and it remains to be seen how much discretion in sentencing will be restored to trial judges.
