Exercise 2-1B *Effect of collecting accounts receivable on the accounting equation and financial statements*

Burke Company earned \$12,000 of service revenue on account during Year 1. The company collected \$9,800 cash from accounts receivable during Year 1.

Required

Based on this information alone, determine the following for Burke Company. (*Hint: Record the events in general ledger accounts under an accounting equation before satisfying the requirements.*)

- The balance of the accounts receivable that would be reported on the December 31, Year 1, balance sheet.
- The amount of net income that would be reported on the Year 1 income statement.
- The amount of net cash flow from operating activities that would be reported on the Year 1 statement of cash flows.
- The amount of retained earnings that would be reported on the Year 1 balance sheet.
- Why are the answers to Requirements *b* and *c* different?

EXERCISE 2-1B Solution

Burke Company
Effect of Events on the Year 1 Accounting Equation

	Assets			=	Liabilities	+	Stockholders' Equity		
Event	Cash	+	Accounts Rec.	=		+	Common Stock	+	Retained Earnings
Earned Revenue		+	12,000	=		+		+	12,000
Coll. Acct. Rec.	9,800	+	(9,800)	=		+		+	
Ending Balance	9,800	+	2,200	=	-0-	+	-0-	+	12,000

- Accounts Receivable: $\$12,000 - \$9,800 = \$2,200$
- \$12,000
- \$9,800 cash collected from accounts receivable.
- \$12,000
- \$12,000 of revenue was earned but only \$9,800 of it was collected.

Exercise 2-2B *Effect of accrued expenses on the accounting equation and financial statements*

During Year 1, Crest Corporation earned \$5,000 of cash revenue and accrued \$3,000 of salaries expense.

Required

(*Hint:* Record the events in general ledger accounts under an accounting equation before satisfying the requirements.) Based on this information alone:

- Prepare the December 31, Year 1, balance sheet.
- Determine the amount of net income that Crest would report on the Year 1 income statement.
- Determine the amount of net cash flow from operating activities that Crest would report on the Year 1 statement of cash flows.
- Why are the answers to Requirements *b* and *c* different?

Exercise 2-3B *Effect of accruals on the financial statements*

Coates Inc. experienced the following events in Year 1, in its first year of operation:

1. Received \$20,000 cash from the issue of common stock.
2. Performed services on account for \$38,000.
3. Paid the utility expense of \$2,500.
4. Collected \$21,000 of the accounts receivable.
5. Recorded \$15,000 of accrued salaries at the end of the year.
6. Paid a \$2,000 cash dividend to the shareholders.

Required

- a. Record the events in general ledger accounts under an accounting equation. In the last column of the table, provide appropriate account titles for the Retained Earnings amounts. The first transaction has been recorded as an example.

Event	COATES INC. Accounting Equation						
	Assets		=	Liabilities	+	Stockholders' Equity	Acct. Titles for Ret. Earn.
	Cash	Accounts Receivable		Salaries Payable		Common Stock	Retained Earnings
	1.	20,000				20,000	

- b. Prepare the income statement, statement of changes in stockholders' equity, balance sheet, and statement of cash flows for the Year 1 accounting period.
- c. Why is the amount of net income different from the amount of net cash flow from operating activities?

- c. Net income is based on income earned of \$38,000 and expenses incurred of \$17,500 for a net income of \$20,500. Net cash flow from operating activities is based on cash collected from revenue, \$21,000 and expenses paid, \$2,500, for a net cash flow from operating activities of \$18,500. The difference of \$2,000 is reflected in the Accounts Receivable account (\$17,000), revenues accrued but not yet collected, and the Salaries Payable account (\$15,000), expenses incurred but not paid.

Exercise 2-4B *Effect of accounts receivable and accounts payable transactions on financial statements*

The following events apply to Brown and Birgin, a public accounting firm, for the Year 3 accounting period:

1. Performed \$96,000 of services for clients on account.
2. Performed \$65,000 of services for cash.
3. Incurred \$45,000 of other operating expenses on account.
4. Paid \$26,000 cash to an employee for salary.
5. Collected \$70,000 cash from accounts receivable.
6. Paid \$38,000 cash on accounts payable.
7. Paid a \$10,000 cash dividend to the stockholders.
8. Accrued salaries were \$3,000 at the end of Year 3.

Required

- a. Show the effects of the events on the financial statements using a horizontal statements model like the following one. In the Cash Flow column, use OA to designate operating activity, IA for investment activity, FA for financing activity, and NC for net change in cash. Use NA to indicate the element is not affected by the event. The first event is recorded as an example.

Event No.	Balance Sheet						Income Statement			Statement of Cash Flows

Exercise 2-5B *Missing information related to accruals*

Panoramic Inc. had a beginning balance of \$2,000 in its Accounts Receivable account. The ending balance of Accounts Receivable was \$2,400. During the period, Panoramic recognized \$40,000 of revenue on account. Panoramic's Salaries Payable account has a beginning balance of \$1,300 and an ending balance of \$900. During the period, the company recognized \$35,000 of accrued salaries expense.

Required

- Based on the information provided, determine the amount of net income.
- Based on the information provided, determine the amount of net cash flow from operating activities.

Exercise 2-6B *Effect of accruals on the financial statements*

Valmont Inc. experienced the following events in Year 1, its first year of operation:

1. Received \$50,000 cash from the issue of common stock.
2. Performed services on account for \$67,000.
3. Paid a \$5,000 cash dividend to the stockholders.
4. Collected \$45,000 of the accounts receivable.
5. Paid \$49,000 cash for other operating expenses.
6. Performed services for \$10,000 cash.
7. Recognized \$2,000 of accrued utilities expense at the end of the year.

Required

- a. Identify the events that result in revenue or expense recognition.
- b. Based on your response to Requirement *a*, determine the amount of net income reported on the Year 1 income statement.
- c. Identify the events that affect the statement of cash flows.
- d. Based on your response to Requirement *c*, determine the amount of cash flow from operating activities reported on the Year 1 statement of cash flows.
- e. What is the before- and after-closing balance in the service revenue account? What other accounts would be closed at the end of the accounting cycle?
- f. What is the balance of the retained earnings account that appears on the Year 1 balance sheet?

EXERCISE 2-6B SOLUTION

Exercise 2-7B *Net income versus changes in cash*

In Year 1, Zoe Inc. billed its customers \$105,000 for services performed. The company collected \$65,000 of the amount billed. Zoe incurred \$40,000 of other operating expenses on account. Zoe paid \$35,000 of the accounts payable. Zoe acquired \$50,000 cash from the issue of common stock. The company invested \$25,000 cash in the purchase of land.

Required

(Hint: Identify the six events described in the paragraph and record them in general ledger accounts under an accounting equation before attempting to answer the questions.) Use the preceding information to answer the following questions:

- What amount of revenue will Zoe report on the Year 1 income statement?
- What amount of cash flow from revenue will Zoe report on the statement of cash flows?
- What is the net income for the period?
- What is the net cash flow from operating activities for the period?
- Why is the amount of net income different from the net cash flow from operating activities for the period?
- What is the amount of net cash flow from investing activities?
- What is the amount of net cash flow from financing activities?
- What amounts of total assets, liabilities, and equity will Zoe report on the year-end balance sheet?

EXERCISE 2-7B (sol. cont.)

- a. Revenue recognized, \$105,000.
- b. Cash flow from revenue, \$65,000.
- c. Revenue, \$105,000, less operating expenses, \$40,000 = \$65,000 net income.
- d. Accounts receivable collected, \$65,000, less cash paid for expenses, \$35,000 = \$30,000 cash flow from operating activities.
- e. Income of \$105,000 was earned, but only \$65,000 was collected (a difference of \$40,000); operating expenses incurred were \$40,000 but only \$35,000 was paid during the period (a difference of \$5,000). Consequently, net income is \$35,000 more than cash flow from operating activities.
- f. \$25,000 cash outflow for the purchase of land.
- g. \$50,000 cash inflow from the issue of common stock.
- h.

Exercise 2-8B *Supplies and the financial statements model*

Copy Express Inc. began the Year 3 accounting period with \$9,000 cash, \$5,000 of common stock, and \$4,000 of retained earnings. Copy Express was affected by the following accounting events during Year 3:

1. Purchased \$9,500 of supplies on account.
2. Earned and collected \$32,500 of cash revenue.
3. Paid \$7,200 cash on accounts payable.
4. Adjusted the records to reflect the use of supplies. A physical count indicated that \$1,700 of supplies was still on hand on December 31, Year 3.

Required

- a. Show the effects of the events on the financial statements using a horizontal statements model like the following one. In the Cash Flows column, use OA to designate operating activity, IA for investing activity, FA for financing activity, and NC for net change in cash. Use NA to indicate accounts not affected by the event. The beginning balances are entered in the following example:

Event No.	Balance Sheet						Income Statement			Statement of Cash Flows
	Assets		=	Liab.	+	Stk. Equity				
	Cash	+ Supplies	=	Accts. Pay.	+ Com. Stk.	+ Ret. Earn.	Rev.	– Exp.	= Net Inc.	Cash Flows
Beg. bal.	9,000	+ 0	=	0	+ 5,000	+ 4,000	0	– 0	= 0	0

- b. Explain the difference between the amount of net income and amount of net cash flow from operating activities.

- b. The difference in net income and cash flow from operating activities of \$600 (\$24,700 – \$25,300) is attributed to recognizing supplies expense of \$7,800 in the income statement, whereas the cash payment on accounts payable (for supplies) was \$7,200.

Exercise 2-12B *Effect of an error on financial statements*

On June 1, Year 3, Cole Corporation paid \$8,400 to purchase a 24-month insurance policy. Assume that Cole records the purchase as an asset and that the books are closed on December 31.

Required

- Show the purchase of the insurance policy and the related adjusting entry to recognize insurance expense in the accounting equation.
- Assume that Cole Corporation failed to record the adjusting entry to reflect the expiration of insurance. How would the error affect the company's Year 3 income statement and balance sheet?

EXERCISE 2-12B SOLUTION

a.

Cole Corporation Accounting Equation Year 3					
	Assets		=	Stockholders' Equity	
Event	Cash	Prepaid Insurance	=	Com. Stock	+ Retained Earnings
Pur. Insurance	(8,400)	8,400			
Adj. Ins Exp.		(2,450)*			(2,450)
Totals	(8,400)	5,950	=	-0-	+ (2,450)

*\$8,400 x 7/24 = \$2,450

- The required entry would decrease assets by \$2,450 [(\$8,400 ÷ 24) x 7] and decrease stockholders' equity by \$2,450 (retained earnings). If this entry is not made, assets and stockholders' equity would both be overstated on the balance sheet by \$2,450. On the income statement, expenses would be understated causing net income to be overstated by \$2,450.

Exercise 2-14B *Unearned revenue defined as a liability*

Kim Wong received \$800 in advance for tutoring fees when she agreed to help Joe Pratt with his introductory accounting course. Upon receiving the cash, Kim mentioned that she would have to record the transaction as a liability on her books. Joe asked, "Why a liability? You don't owe me any money, do you?"

Required

Respond to Joe's question regarding Wong's liability.

EXERCISE 2-14B

Note: This exercise can be used to assess writing skills.

The tutoring fees of \$800 received in advance by Kim Wong from Joe Pratt should be reported as a liability. Although Kim Wong has received the cash, it has not yet been earned. Wong has an obligation to either perform the services or refund the cash advance. When the tutoring service is provided to Joe, the unearned revenue should be recognized as revenue earned by Wong.

Ross, Attorney at Law, experienced the following transactions in Year 1, the first year of operations:

1. Purchased \$1,500 of office supplies on account.
2. Accepted \$36,000 on February 1, Year 1, as a retainer for services to be performed evenly over the next 12 months.
3. Performed legal services for cash of \$84,000.
4. Paid cash for operating expense of \$32,000.
5. Paid a cash dividend to the stockholders of \$8,000.
6. Paid \$1,200 of the amount due on accounts payable.
7. Determined that at the end of the accounting period, \$150 of office supplies remained on hand.
8. On December 31, Year 1, recognized the revenue that had been earned for services performed in accordance with Transaction 2.

Exercise 2-20B *Closing entries*

Rollins Company's accounting records show an after-closing balance of \$19,400 in its Retained Earnings account on December 31, Year 3. During the Year 3 accounting cycle, Rollins earned \$15,100 of revenue, incurred \$9,200 of expense, and paid \$1,500 of dividends. Revenues and expenses were recognized evenly throughout the accounting period.

Required

- Determine the balance in the Retained Earnings account as of January 1, Year 4.
- Determine the balance in the temporary accounts as of January 1, Year 3.
- Determine the after-closing balance in the Retained Earnings account as of December 31, Year 2.
- Determine the balance in the Retained Earnings account as of June 30, Year 3.

EXERCISE 2-20B

- Retained Earnings is a permanent account, meaning that one period's ending balance becomes the next period's beginning balance. Since the December 31, Year 3 after-closing balance is \$19,400, this will also be the balance on January 1, Year 4.**
- The temporary accounts (Revenue, Expense, and Dividends) are closed at the end of each accounting cycle. As a result, they will always have a zero balance at the beginning of each accounting period.**
- The relationship between the beginning and ending balances in the Retained Earnings accounts is:**

Beginning Retained Earnings Balance (January 1, Year 3)	?
+ Net Income (Revenue \$15,100 – Expenses 9,200)	5,900
– Dividends	<u>(1,500)</u>
Ending Retained Earnings Balance (December 31, Year 3)	19,400

Beg. Retained Earnings = End. Retained Earnings – Net Income + Dividends

Beg. Ret. Earn. Balance = \$19,400 – \$5,900 + \$1,500 = \$15,000

Since Retained Earnings is a permanent account, the January 1, Year 3 balance of \$15,000 is also the Dec. 31, Year 2 after-closing balance.

EXERCISE 2-20B (Sol. cont. on next page)

Survey 7e - Chapter 2 - Set B Exercises and Problems - Instructor Active Learning Worksheets

EXERCISE 2-20B (Sol. cont.)

- d. Since revenue and expense is recognized evenly through the Year 3 accounting cycle, approximately half would be recognized by June 30, Year 3. Even so, the revenue and expense data are recorded in Revenue and Expense accounts and do not affect retained earnings at the time of recognition. The balance in the Retained Earnings account on June 30, Year 3 is the same as it was on January 1, Year 3 which is \$15,000.

The first stage of the cycle must be recording accounting data in accounts to put it into usable form. Once the accounting data is summarized in the accounts, adjustments are made to reflect any unrecorded transactions. The account balances are then used to prepare the financial statements. After the financial statements are prepared, the temporary accounts (revenue, expenses, and dividends) must be closed to prepare these accounts for the next accounting period.

Exercise 2-24B *Matching concept*

Companies make sacrifices known as *expenses* to obtain benefits called *revenues*. The accurate measurement of net income requires that expenses be matched with revenues. In some circumstances, matching a particular expense directly with revenue is difficult or impossible. In these circumstances, the expense is matched with the period in which it is incurred.

Required

Distinguish the following items that could be matched directly with revenues from the items that would be classified as period expenses:

Exercise 2-27B *Identifying transaction type and effect on the financial statements*

Required

Identify whether each of the following transactions is an asset source (AS), asset use (AU), asset exchange (AE), or claims exchange (CE). Also show the effects of the events on the financial statements using the horizontal statements model. Indicate whether the event increases (I), decreases (D), or does not affect (NA) each element of the financial statements. In the Cash Flows column, designate the cash flows as operating activities (OA), investing activities (IA), or financing activities (FA). The first two transactions have been recorded as examples.

Required

Explain how each of the following events or series of events and the related adjusting entry will affect the amount of *net income* and the amount of *cash flow from operating activities* reported on the year-end financial statements. Identify the direction of change (increase, decrease, or NA) and the amount of the change. Organize your answers according to the following table. The first event is recorded as an example. If an event does not have a related adjusting entry, record only the effects of the event.

SOLUTIONS TO PROBLEMS - CHAPTER 2**Problem 2-32B** *Recording events in a horizontal statements model*

The following events pertain to James Cleaning Company:

1. Acquired \$15,000 cash from the issue of common stock.
2. Provided services for \$6,000 cash.
3. Provided \$18,000 of services on account.
4. Collected \$11,000 cash from the account receivable created in Event 3.
5. Paid \$1,400 cash to purchase supplies.
6. Had \$100 of supplies on hand at the end of the accounting period.
7. Received \$3,600 cash in advance for services to be performed in the future.
8. Performed one-half of the services agreed to in Event 7.
9. Paid \$6,500 for salaries expense.
10. Incurred \$2,800 of other operating expenses on account.
11. Paid \$2,100 cash on the account payable created in Event 10.
12. Paid a \$1,000 cash dividend to the stockholders.

Required

Show the effects of the events on the financial statements using a horizontal statements model like the following one. In the Cash Flows column, use the letters OA to designate operating activity, IA for investing activity, FA for financing activity, and NC for net change in cash. Use NA to indicate accounts not affected by the event. The first event is recorded as an example.

Problem 2-38B *Events for two complete accounting cycles*

Alabama Service Company was formed on January 1, Year 1.

Events Affecting the Year 1 Accounting Period

1. Acquired \$60,000 cash from the issue of common stock.
2. Purchased \$1,200 of supplies on account.
3. Purchased land that cost \$18,000 cash.
4. Paid \$800 cash to settle accounts payable created in Event 2.
5. Recognized revenue on account of \$42,000.
6. Paid \$21,000 cash for other operating expenses.
7. Collected \$38,000 cash from accounts receivable.

Information for Year 1 Adjusting Entries

8. Recognized accrued salaries of \$3,200 on December 31, Year 1.
9. Had \$200 of supplies on hand at the end of the accounting period.

Events Affecting the Year 2 Accounting Period

1. Acquired \$20,000 cash from the issue of common stock.
2. Paid \$3,200 cash to settle the salaries payable obligation.
3. Paid \$3,600 cash in advance for a lease on office facilities.
4. Sold land that had cost \$15,000 for \$15,000 cash.
5. Received \$4,800 cash in advance for services to be performed in the future.
6. Purchased \$1,000 of supplies on account during the year.
7. Provided services on account of \$32,000.
8. Collected \$33,000 cash from accounts receivable.
9. Paid a cash dividend of \$5,000 to the stockholders.
10. Paid other operating expenses of \$19,500.

Information for Year 2 Adjusting Entries

11. The advance payment for rental of the office space (see Event 3) was made on March 1 for a one-year term.
12. The cash advance for services to be provided in the future was collected on October 1 (see Event 5). The one-year contract started October 1.

SOLUTIONS TO QUESTIONS - CHAPTER 2

- 1. Accrual accounting attempts to record the effects of accounting events in the period when such events occur, regardless of when cash is received or paid. The goal is to match expenses with the revenues that they produce.**
- 2. Recognition is the act of recording an event in the financial statements. When accruals are used, events are recognized before the associated cash is paid or collected.**
- 3. Deferral is the recognition of revenue or expenses in a period after the cash consequences are realized, i.e., cash is collected in advance of performing the service.**
- 4. If cash is collected in advance for services, the revenue is recognized when the services are rendered.**
- 5. An asset source transaction increases assets and increases either liabilities or equity.** [TBEXAM.COM](https://www.tbexam.com)
- 6. The issue of common stock, which is capital acquired from owners, increases business assets (usually cash) and equity (common stock).**
- 7. The recognition of revenue on account increases the corresponding revenue account on the income statement, but does not affect the statement of cash flows. The cash flow statement is affected when the account is collected.**

- | | | |
|-----------|--|---|
| 8. | <u>Asset Source Transaction</u> | <u>Effect on Accounting Equation</u> |
| | Issue of Common Stock | Increases Assets
Increases Common Stock |
| | Revenue Earned | Increases Assets
Increases Retained Earnings |
| | Borrowed Funds | Increases Assets
Increases Liabilities |
-
9. Revenue is recognized under accrual accounting when a revenue-producing event occurs, i.e., when the revenue is *earned*, even if no cash is collected at the time of the transaction.
 10. The collection of cash for accounts receivable is an asset exchange transaction. Only the asset side of the accounting equation is affected because one asset account increases (cash), and another asset account decreases (accounts receivable). Total assets are unchanged. TBEXAM.COM
 11. If cash is collected in advance for services, a liability is created (unearned revenue), increasing the claims side of the accounting equation.
 12. Unearned revenue is cash that has been collected for services that have not yet been performed.
 13. The recognition of expenses affects the accounting equation by either decreasing assets or increasing liabilities (payables) and by decreasing stockholders' equity (retained earnings).
 14. A claims exchange transaction is one where the claims of creditors (liabilities) increase and the claims of stockholders (retained earnings) decrease, or vice versa. The total amount of claims is unchanged.

Survey 7e – Chapter 2 – Solutions Manual

15. Cash payments to creditors are asset use transactions. These transactions result in the reduction of an asset account (cash) and the reduction of the corresponding liability account (payables).
16. Expenses are recognized under accrual accounting at the time the expense is incurred or resources are consumed, regardless of when cash payment is made.
17. Net cash flows from operations on the cash flow statement may be different from net income because of the application of accrual accounting. Revenues and expenses reported on the income statement may be recognized before or after the actual collection or payment of cash that is reported on the cash flow statement.
18. The income statement reflects the change in net assets associated with operating a business, as shown by revenues and expenses. Expenses may result from a decrease in assets or an increase in liabilities. Revenues may result from an increase in assets or a decrease in liabilities.
19. Net income increases stockholders' claims on business assets by increasing retained earnings.
20. A cost can be either an asset or an expense. If the item acquired has already been used in the process of earning revenue, its cost represents an expense. If the item will be used in the future to generate revenue, its cost represents an asset.
21. A cost is held in the asset account until the item is used to produce revenue. When the revenue is generated, the asset is converted into an expense in order to match revenues with related expenses. Not all costs become expenses. If the value of an asset will not expire in the revenue-generating process, the asset will not become an expense. For example, the cost of land will not become an expense because land does not depreciate.

- 22. Supplies used during the accounting period are recognized in a single adjusting entry at the end of the period. The amount of supplies used is determined by subtracting the amount of supplies on hand at the end of the period from the amount of supplies that were available for use (beginning supplies balance plus supplies purchased).**
- 23. An expense is a decrease in assets or an increase in liabilities that occurs in the process of generating revenue.**
- 24. Revenue is an increase in assets or a decrease in liabilities that results from the operating activities of the business.**
- 25. The purpose of the statement of changes in stockholders' equity is to display the effects of business operations and stock issued to owners and dividends paid to stockholders. It identifies the ways that an entity's equity increased and decreased as a result of its operations and transactions with its stockholders.**
- 26. The purpose of the balance sheet is to provide information about an entity's assets, liabilities, and stockholders' equity and their relationships to each other at a particular point in time. It provides a list of the economic resources that the enterprise has available for its operating activities and the claims to those resources.**
- 27. The balance sheet is dated as of a specific date because it shows information about an entity's assets, liabilities, and stockholders' equity as of that date, not measured over a time period. The statement of changes in stockholders' equity, the income statement, and the statement of cash flows reflect transactions that occur over a period of time.**
- 28. Assets are listed on the balance sheet in accordance with their respective levels of liquidity (how rapidly they can be converted to cash).**

- 29. The statement of cash flows explains the change in cash from one accounting period to the next. It is prepared by analyzing the cash account and summarizing where cash came from and how it was used.**
- 30. An adjusting entry is an entry that updates account balances prior to preparation of the financial statements. The entry means that there is an item that needs proper measurement on the income statement and an adjustment will reflect the correct time period of earning or usage. Example: entry to recognize accrued interest revenue where the revenue has been earned but not yet collected and therefore revenue had not yet been recorded for the time period.**
- 31. Temporary accounts (revenue, expense, and dividends) are closed at the end of the accounting period. It is necessary to close these accounts so that revenue, expense, and dividends can be accumulated from a beginning balance of zero for the next period.**
- 32. Period costs are costs that are recognized in an accounting period. Examples of period costs include rent expense, utilities expense, and salaries expense.**
- 33. Salary of the tax return preparer could be directly matched with the revenue that it produces.**
- 34. The four stages of the accounting cycle: Record transactions; adjust the accounts; prepare statements; and close the temporary accounts. The adjustment and closing processes have been added to the cycle in this chapter. It is necessary to adjust accounts so that the accounts will reflect the correct balances under the accrual basis of accounting. The closing process (transferring the balances of the temporary accounts to retained earnings) is necessary so that the temporary accounts have a zero balance at the beginning of the next accounting cycle.**

TBEXAM.COM

EXERCISE 2-20A

- a. Retained Earnings is a permanent account, meaning that one period's ending balance becomes the next period's beginning balance. Since the December 31, Year 5 balance is \$42,100, this was also the balance on January 1, Year 6.
- b. The balance in the temporary accounts will be zero on January 1, Year 5. The temporary accounts would have been closed to Retained Earnings on December 31, Year 4, thus leaving a zero balance.
- c. The December 31, Year 4 balance in the Retained Earnings account is the same balance as the January 1, Year 5 balance, computed as follows:

Beginning Retained Earnings Balance, January 1, Year 5	\$?
+ Net Income, Year 5 (Revenue \$19,400 – Expenses \$9,800)		9,600
– Dividends paid Year 5		<u>(500)</u>
= Ending Retained Earnings Balance, December 31, Year 5		\$42,100

TBEXAM.COM

Working backwards:

End. Retained Earnings + Dividends – Net Income = Beg. Retained Earnings; and January 1, Year 5 = December 31, Year 4
 = \$42,100 + \$500 – \$9,600 = \$33,000 = January 1, Year 5 Retained Earnings

Therefore:

December 31, Year 4 Retained Earnings = \$33,000

- d. The revenue and expense data are recorded in Revenue and Expense accounts and do not affect retained earnings at the time of recognition. The balance in the Retained Earnings account on June 30, Year 5 is the same as it was on January 1, Year 5 which is \$33,000 (see answer (c) for calculation).

- b. Adjusting entries are required to update accounting records for income that has been earned or expenses that have been incurred. Revenue and expenses are recognized in the period that they are earned or incurred, not necessarily when the cash is received or paid. After the adjusting entries are made at the end of the accounting period, the revenue, expense, and dividends accounts are closed to Retained Earnings.**

c.

Computation of Net Income	
Revenue	\$7,500
Less: Expenses	(3,400)

- d. Net income is only the current year's net income. Retained Earnings is an accumulation of net income over the life of the business less any dividends that have been paid over the years.
- e. All revenue, expense, and dividend accounts will have a zero balance because they have been closed to retained earnings.

b. The four stages of the accounting cycle are:**recording transactions****adjusting the accounts****preparing financial statements****closing temporary accounts.**

The first stage of the cycle must be recording accounting data in accounts to put it into usable form. Once the accounting data is summarized in the accounts, adjustments are made to reflect any unrecorded transactions. The account balances are then used to prepare the financial statements. After the financial statements are prepared, the temporary accounts (revenue, expenses, and dividends) must be closed to prepare these accounts for the next accounting period.

TBEXAM.COM

- Revenue recognized, \$105,000.
- Cash flow from revenue, \$65,000.
- Revenue, \$105,000, less operating expenses, \$40,000 = \$65,000 net income.
- Accounts receivable collected, \$65,000, less cash paid for expenses, \$35,000 = \$30,000 cash flow from operating activities.
- Income of \$105,000 was earned, but only \$65,000 was collected (a difference of \$40,000); operating expenses incurred were \$40,000 but only \$35,000 was paid during the period (a difference of \$5,000). Consequently, net income is \$35,000 more than cash flow from operating activities.
- \$25,000 cash outflow for the purchase of land.
- \$50,000 cash inflow from the issue of common stock.
- Total assets = \$120,000 (\$55,000 + \$40,000 + \$25,000)

Total liabilities = \$5,000

Note: There are many examples of events that illustrate the required effects. An example is given of each event.

- a. Recognized revenue on account. The asset is either Cash or Accounts Receivable.**
- b. Recognized revenue where the cash had been received in advance. The liability is Unearned Revenue**
- c. Recognized an expense on account. The liability includes the word "Payable" or "Accrued" in the title.**
- d. Paid utilities expense. The asset is Cash or an account that includes the word "Prepaid" or a long-lived asset that is depreciated or amortized.**

TBEXAM.COM

EXERCISE 2-20B

- a. Retained Earnings is a permanent account, meaning that one period's ending balance becomes the next period's beginning balance. Since the December 31, Year 3 after-closing balance is \$19,400, this will also be the balance on January 1, Year 4.
- b. The temporary accounts (Revenue, Expense, and Dividends) are closed at the end of each accounting cycle. As a result, they will always have a zero balance at the beginning of each accounting period.
- c. The relationship between the beginning and ending balances in the Retained Earnings accounts is:

Beginning Retained Earnings Balance (January 1, Year 3)	?
+ Net Income (Revenue \$15,100 – Expenses 9,200)	5,900
– Dividends	<u>(1,500)</u>
Ending Retained Earnings Balance (December 31, Year 3)	19,400

Beg. Retained Earnings = End. Retained Earnings – Net Income + Dividends

Beg. Ret. Earn. Balance = \$19,400 – \$5,900 + \$1,500 = \$15,000

Since Retained Earnings is a permanent account, the January 1, Year 3 balance of \$15,000 is also the December 31, Year 2 after-closing balance.

- d. Since revenue and expense is recognized evenly through the Year 3 accounting cycle, approximately half would be recognized by June 30, Year 3. Even so, the revenue and expense data are recorded in Revenue and Expense accounts and do not affect retained earnings at the time of recognition. The balance in the Retained Earnings account on June 30, Year 3 is the same as it was on January 1, Year 3 which is \$15,000.

- b. Adjusting entries are recorded before closing entries. Adjusting entries are required to update the accounts so that the correct amounts of income and expenses are recognized. After the adjusting entries have been made, the adjusted balances of the revenue and expense accounts are closed to retained earnings.

e. Net income is only the current year's net income. Retained Earnings is an accumulation of net income over the life of the business less any dividends that have been paid over the years.

e. All revenue, expense and dividends accounts will have a zero balance because they have been closed to retained earnings.

c. The four stages of the accounting cycle are:**recording transactions****adjusting the accounts****preparing financial statements****closing temporary accounts.**

The first stage of the cycle must be recording accounting data in accounts to put it into usable form. Once the accounting data is summarized in the accounts, adjustments are made to reflect any unrecorded transactions. The account balances are then used to prepare the financial statements. After the financial statements are prepared, the temporary accounts (revenue, expenses, and dividends) must be closed to prepare these accounts for the next accounting period.

SOLUTIONS TO CRITICAL THINKING – CHAPTER 2**CT 2-1 (All dollar amounts are in millions.)**

1. **Target's accrual accounts are: Accounts payable, Accrued and other current liabilities. Note 13 discloses that Accrued and other current liabilities included several specific accounts, including Wages and benefits, Real estate, sales and other taxes payable, Gift card liability, and Dividends payable.**

The Deferred income taxes account shown under Liabilities is probably best classified as an accrual account, but students will probably think it is a deferral account.

2. **Target's deferral accounts are: Inventories, Buildings and improvements, Fixtures and equipment, Computer hardware and software, and Construction in progress. Note 9 discloses that Other current assets include: Income tax and other receivables, Vendor income receivable, Prepaid expenses, and Other.**

Students might also list the Deferred income taxes account shown that is shown under Liabilities, but as noted above, this is more of an accrual account.

3.

Net income for 2019 was	\$3,281
Cash provided by operating activities for 2019 was	\$7,117

Thus, cash flow from operating activities exceeded net income by \$3,836.

4. **Net income increased by \$344 from 2018 to 2019 (\$3,281 - \$2,937). Cash provided by operating activities increased by \$1,144 from 2018 to 2019 (\$7,117- \$5,973). Therefore, the change in cash flows was greater.**

a.

	ExxonMobil	%	Apple	%
Computation of Expenses				
Revenue (in billions)	\$244.4	100.0	\$265.6	100.0
Less, Net Income	19.7	8.1	59.5	22.4
Expenses (in billions)	\$224.7	91.9	\$206.1	77.6

The conservatism principle guides accountants to select the alternative that produces the lowest amount of net income. The conservatism principle holds that it is better to understate income than to overstate it. If this holds true, Exxon Mobil may be expensing more of its cost than Apple.

b.

Investors may believe there is more growth opportunity in the technology sector, where Apple operates than there is in the petroleum sector, where Exxon Mobil operates. Additionally, Apple's net income, as a percentage of sales, is higher.

CT 2-3

This solution is based on Netflix's 2018 financial report.

a. Netflix's accrual accounts are:

Current content liabilities (though students will probably not list this account)

Accounts payable

Accrued expenses

b. Netflix's deferral accounts are:

Content library, net (short-term and long-term) {shown under assets]

Property, plant, and equipment, net

Other current assets

Other noncurrent assets (possibly, depending on the nature of the asset)

Deferred revenues

Income Statement		Balance Sheet	
Service Revenue	\$120,000	Assets:	\$167,000
Operating Exp.	(40,000)		
Net Income	\$ 80,000	Liabilities:	\$ 5,000
		Stockholders' Equity:	
		Common Stock	82,000
		Retained Earnings	80,000
		Total Stk. Equity	162,000
		Total Liab. and Stk. Equity	\$167,000

Computations for Income Statement Items:

Revenue: $\$38,000 + \$82,000 = \$120,000$

Operating Expense: $\$70,000 - \$30,000 = \$40,000$

Computations for Balance Sheet Items:

Assets: $\$85,000 + \$82,000 = \$167,000$

Liabilities: $\$35,000 - \$30,000 = \$5,000$

Retained Earnings: $\$(32,000) + \$82,000 + \$30,000 = \$80,000$

- b. The conservatism principal requires that revenue not be recognized before it is actually earned. Glenn actually recorded an amount that not only had not been earned, but the contract had not been finalized. Glenn has overstated his income by the \$82,000.
- c. The accrued salaries are an expense that has already been accrued and is owed and these salary expense should be matched against the respective year's revenue. By removing these expenses from net income computation, Glenn is overstating net income.
