- C. Emergency management
- D. Public health preparedness

Answer: D

Complexity: Easy

Ahead: Definitions

Subject: Chapter 1

Title: Introduction to Public Health Preparedness

2. Which of the following is an essential component of public health, yet it is not coordinated or delivered in Washington, DC, but in every doctor's office, hospital, and clinic across the country?

- A. Clinical care
- B. Disease surveillance
- C. Outbreak containment
- D. Emergency management

Answer: A

Complexity: Easy

Ahead: Public Health Preparedness and Federalism

Subject: Chapter 1

Title: Introduction to Public Health Preparedness

## True/False

3. True or False? Defense is the protection of U.S. sovereignty, territory, domestic population, and critical defense infrastructure against external threats or aggression.

Answer: True

Complexity: Easy

Ahead: Definitions

Subject: Chapter 1

Title: Introduction to Public Health Preparedness

4. True or False? The reoccurring theme within all discussions of national security is the balance between security and liberty.

Answer: True

Complexity: Easy

Ahead: Definitions

Subject: Chapter 1

Title: Introduction to Public Health Preparedness

Essay

5. Provide a definition for “national security.”

Answer: Correct answers include policies and power enacted by governments to ensure survival of the state, safeguarding territorial integrity, ability to pursue internal life without interference, and the balance between security and liberty.

Complexity: Difficult

Ahead: Definitions

Subject: Chapter 1

Title: Introduction to Public Health Preparedness

6. How is “national security” different from “homeland security”?

Answer: Homeland security is about preventing and responding to disasters or attacks on the United States whereas national security is more focused on the extent to which an individual is willing to sacrifice freedom in exchange for security.

Complexity: Moderate

Ahead: Definitions

Subject: Chapter 1

Title: Introduction to Public Health Preparedness

7. What is a public health emergency?

Answer: It is an event that can overwhelm routine capabilities because of its scale, timing, or unpredictability.

Complexity: Moderate

Ahead: Definitions

Subject: Chapter 1

Title: Introduction to Public Health Preparedness

8. How many categories of public health emergencies are there?

Answer: There are four: natural disasters, manmade disasters, natural epidemics, and intentional or accidental release of CBRN agents.

Complexity: Easy

Ahead: Definitions

Subject: Chapter 1

Title: Introduction to Public Health Preparedness

9. Name at least three components of public health and community preparedness?

Answer: Correct answers include health risk assessment, legal climate, roles and responsibilities, incident command system, public engagement, epidemiology functions, laboratory functions, mass health care, countermeasures and mitigation strategies, public information and communication, and workforce.
