# Test Bank for Nutrition Concepts and Controversies 14th Edition by Sizer
# Test Bank

## Chapter 02 - NUTRITION TOOLS – STANDARDS AND GUIDELINES

**True / False**

1. So far, the DRI Committee has published recommendations for the vitamins and minerals, along with those for carbohydrates, fiber, lipids, proteins, water, and energy.
    a. True
    b. False

| | |
|---|---|
| *ANSWER:* | True |
| *REFERENCES:* | Nutrient Recommendations |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.1 - State the significance of Dietary Reference Intakes (DRI) and Daily Values as nutrient standards. |
| *KEYWORDS:* | Bloom's: Understand |

2. On average, one should try to get 100% of the DRI for every nutrient to ensure an adequate intake over time.
    a. True
    b. False

| | |
|---|---|
| *ANSWER:* | True |
| *REFERENCES:* | Nutrient Recommendations |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.1 - State the significance of Dietary Reference Intakes (DRI) and Daily Values as nutrient standards. |
| *KEYWORDS:* | Bloom's: Understand |

3. The primary difference between recommendations for nutrient intakes and values set for energy intake is that the value for energy intake is not generous.
    a. True
    b. False

| | |
|---|---|
| *ANSWER:* | True |
| *REFERENCES:* | Nutrient Recommendations |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.1 - State the significance of Dietary Reference Intakes (DRI) and Daily Values as nutrient standards. |
| *KEYWORDS:* | Bloom's: Understand |

4. The DRI are international guidelines that are used around the world.
    a. True
    b. False

| | |
|---|---|
| *ANSWER:* | False |
| *REFERENCES:* | Nutrient Recommendations |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.1 - State the significance of Dietary Reference Intakes (DRI) and Daily Values as nutrient standards. |
| *KEYWORDS:* | Bloom's: Understand |

5. The Daily Values are nutrient standards used to compare the nutrient contents of packaged foods.
    a. True
    b. False

| | |
|---|---|
| *ANSWER:* | True |
| *REFERENCES:* | Nutrient Recommendations |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.1 - State the significance of Dietary Reference Intakes (DRI) and Daily |

Values as nutrient standards.

*KEYWORDS:*                Bloom's: Understand

6. The United States is among many countries that establish and publish guidelines for appropriate nutrient intakes.
    a. True
    b. False

*ANSWER:*                True
*REFERENCES:*                Dietary Guidelines for Americans
*LEARNING OBJECTIVES:*  NUCC.SIZR.17.2.2 - Specify how the Dietary Guidelines for Americans work as part of an overall U.S. dietary guidance system.
*KEYWORDS:*                Bloom's: Understand

7. One of the major disadvantages of the USDA Food Intake Patterns is that they cannot be adapted to other national and cultural cuisines.
    a. True
    b. False

*ANSWER:*                False
*REFERENCES:*                Diet Planning Application
*LEARNING OBJECTIVES:*  NUCC.SIZR.17.2.4 - Given the required number of calories, discuss a healthful diet plan by applying the USDA Food Intake Patterns.
*KEYWORDS:*                Bloom's: Understand

8. Users of the Food Lists for Diabetes (formerly the Exchange System) can make an informed approximation of the energy-yielding nutrients and calories in almost any food they might encounter.
    a. True
    b. False

*ANSWER:*                True
*REFERENCES:*                Diet Planning Application
*LEARNING OBJECTIVES:*  NUCC.SIZR.17.2.4 - Given the required number of calories, discuss a healthful diet plan by applying the USDA Food Intake Patterns.
*KEYWORDS:*                Bloom's: Understand

9. The absence of a Tolerable Upper Intake Level for a nutrient implies that it is safe to consume in any amount.
    a. True
    b. False

*ANSWER:*                False
*REFERENCES:*                Nutrient Recommendations
*LEARNING OBJECTIVES:*  NUCC.SIZR.17.2.1 - State the significance of Dietary Reference Intakes (DRI) and Daily Values as nutrient standards.
*KEYWORDS:*                Bloom's: Understand

10. The *Dietary Guidelines for Americans 2015* focus on specific nutrients, rather than recommended foods to eat.
    a. True
    b. False

*ANSWER:*                False
*REFERENCES:*                Dietary Guidelines for Americans

| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.2 - Specify how the Dietary Guidelines for Americans work as part of an overall U.S. dietary guidance system. |
| --- | --- |
| *KEYWORDS:* | Bloom's: Understand |

11. An important recommendation of the *Dietary Guidelines for Americans 2015* is to make physical activity a habit.
    a. True
    b. False

| *ANSWER:* | True |
| --- | --- |
| *REFERENCES:* | Dietary Guidelines for Americans |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.2 - Specify how the Dietary Guidelines for Americans work as part of an overall U.S. dietary guidance system. |
| *KEYWORDS:* | Bloom's: Understand |

12. By varying food choices among and within food groups in the USDA Food Intake Patterns, you will help to ensure adequate nutrient intakes and protect against large amounts of toxins or contaminants from any one food.
    a. True
    b. False

| *ANSWER:* | True |
| --- | --- |
| *REFERENCES:* | Diet Planning with the USDA Food Intake Patterns |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.3 - Explain the use of the USDA Food Intake Patterns to plan a nutritious diet. |
| *KEYWORDS:* | Bloom's: Understand |

13. "Diets low in sodium may reduce the risk of high blood pressure,"is an example of a health claim allowed on a food label and is reliable because the FDA had substantial scientific support for the claim.
    a. True
    b. False

| *ANSWER:* | True |
| --- | --- |
| *REFERENCES:* | Checking Out Food Labels |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.5 - Discuss the information included on food labels. |
| *KEYWORDS:* | Bloom's: Understand |

*Controversy 2 True/False Items*

14. There is strong scientific evidence that individual phytochemical supplements safely provide health benefits.
    a. True
    b. False

| *ANSWER:* | False |
| --- | --- |
| *REFERENCES:* | Are Some Foods Superfoods for Health? |
| *PREFACE NAME:* | Controversy T/F |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.7 - Summarize the potential health effects of phytochemicals from both food sources and supplements. |
| *KEYWORDS:* | Bloom's: Understand |

**Multiple Choice**

*Comprehension-Level Multiple-Choice Items*

15. Which statement is about the DRI is *FALSE*?
    a. The committee that publishes them is comprised of nutrition experts.
    b. They are minimum requirements, not recommendations.
    c. They are based on review of available scientific research.
    d. They are for individuals who are healthy.
    e. They assume that intakes will vary from day to day.

| | |
|---|---|
| *ANSWER:* | b |
| *REFERENCES:* | Nutrient Recommendations |
| *PREFACE NAME:* | Comprehension-Level MC |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.1 - State the significance of Dietary Reference Intakes (DRI) and Daily Values as nutrient standards. |
| *KEYWORDS:* | Bloom's: Understand |

16. If a nutrient does not have a Tolerable Upper Intake Level, this means that:
    a. it is safe to consume in any amount.
    b. insufficient data exist to establish a value.
    c. no caution is required when consuming supplements of that nutrient.
    d. it is safe when supplemental levels are added to foods.
    e. it is unsafe to consume in any amount.

| | |
|---|---|
| *ANSWER:* | b |
| *REFERENCES:* | Nutrient Recommendations |
| *PREFACE NAME:* | Comprehension-Level MC |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.1 - State the significance of Dietary Reference Intakes (DRI) and Daily Values as nutrient standards. |
| *KEYWORDS:* | Bloom's: Understand |

17. Which of the following establishes population-wide average requirements used by nutrition policymakers?
    a. Recommended Dietary Allowances
    b. Daily Values
    c. Recommended Daily Allowances
    d. Adequate Intakes
    e. Estimated Average Requirements

| | |
|---|---|
| *ANSWER:* | e |
| *REFERENCES:* | Nutrient Recommendations |
| *PREFACE NAME:* | Comprehension-Level MC |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.1 - State the significance of Dietary Reference Intakes (DRI) and Daily Values as nutrient standards. |
| *KEYWORDS:* | Bloom's: Understand |

18. The DRI Committee recommended a diet that provides _____% of its calories from carbohydrate.
    a. 10-35
    b. 20-35
    c. 45-65
    d. 50-70

 e. 75-80

| | |
|---|---|
| *ANSWER:* | c |
| *REFERENCES:* | Nutrient Recommendations |
| *PREFACE NAME:* | Comprehension-Level MC |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.1 - State the significance of Dietary Reference Intakes (DRI) and Daily Values as nutrient standards. |
| *KEYWORDS:* | Bloom's: Understand |

19. The Dietary Reference Intakes (DRI) are appropriately used for all of the following **except**:
 a. estimating the nutrient needs of persons with medical problems.
 b. estimating the adequacy of an individual's nutrient intake.
 c. planning diets for military personnel.
 d. ensuring that minimum nutrient requirements are met.
 e. planning diets for school children.

| | |
|---|---|
| *ANSWER:* | a |
| *REFERENCES:* | Nutrient Recommendations |
| *PREFACE NAME:* | Comprehension-Level MC |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.1 - State the significance of Dietary Reference Intakes (DRI) and Daily Values as nutrient standards. |
| *KEYWORDS:* | Bloom's: Understand |

20. What are the DRI designed for?
 a. promotion of healing after injury
 b. restoration of health
 c. disease treatment
 d. nutrient deficiency reversal
 e. disease prevention

| | |
|---|---|
| *ANSWER:* | e |
| *REFERENCES:* | Nutrient Recommendations |
| *PREFACE NAME:* | Comprehension-Level MC |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.1 - State the significance of Dietary Reference Intakes (DRI) and Daily Values as nutrient standards. |
| *KEYWORDS:* | Bloom's: Understand |

21. The Daily Values reflect the needs of an "average person" consuming _____ calories a day.
 a. 1,500
 b. 2,000
 c. 2,500
 d. 3,000
 e. 1,000

| | |
|---|---|
| *ANSWER:* | b |
| *REFERENCES:* | Nutrient Recommendations |
| *PREFACE NAME:* | Comprehension-Level MC |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.1 - State the significance of Dietary Reference Intakes (DRI) and Daily Values as nutrient standards. |

## Chapter 02 - NUTRITION TOOLS – STANDARDS AND GUIDELINES

*KEYWORDS:*               Bloom's: Understand

22. The *Dietary Guidelines for Americans* are intended for healthy adults and children ages _____ and older.
    a. one
    b. two
    c. three
    d. four
    e. eight

*ANSWER:*               d
*REFERENCES:*        Dietary Guidelines for Americans
*PREFACE NAME:*      Comprehension-Level MC
*LEARNING OBJECTIVES:*  NUCC.SIZR.17.2.2 - Specify how the Dietary Guidelines for Americans work as part of an overall U.S. dietary guidance system.
*KEYWORDS:*               Bloom's: Understand

23. A major guideline for healthy people is to limit calorie intakes and obtain more and varied selections of _____.
    a. red meats
    b. refined grains
    c. full-fat milk or milk products
    d. naturally sweetened beverages
    e. fruits and vegetables

*ANSWER:*               e
*REFERENCES:*        Dietary Guidelines for Americans
*PREFACE NAME:*      Comprehension-Level MC
*LEARNING OBJECTIVES:*  NUCC.SIZR.17.2.2 - Specify how the Dietary Guidelines for Americans work as part of an overall U.S. dietary guidance system.
*KEYWORDS:*               Bloom's: Understand

24. Which of the following is characteristic of Daily Values?
    a. They provide nutrient values for different categories of people.
    b. They are ideal for allowing comparisons among foods.
    c. They are useful as nutrient intake goals for individuals.
    d. They provide information on all DRI nutrients.
    e. Daily Values are calculated based on a 1500-calorie diet.

*ANSWER:*               b
*REFERENCES:*        Nutrient Recommendations;Checking Out Food Labels
*PREFACE NAME:*      Comprehension-Level MC
*LEARNING OBJECTIVES:*  NUCC.SIZR.17.2.1 - State the significance of Dietary Reference Intakes (DRI) and Daily Values as nutrient standards.
NUCC.SIZR.17.2.5 - Discuss the information included on food labels.
*KEYWORDS:*               Bloom's: Understand

25. The *Dietary Guidelines for Americans* recommend all of the following *except*:
    a. consuming less than 10% of calories from saturated fatty acids.
    b. consuming less than 300 mg per day of dietary cholesterol.

    c. increasing *trans* fat consumption in the diet.

    d. using oils to replace solid fats when possible.

    e. keeping total fat consumption between 20 and 35% of total energy.

| | |
|---|---|
| *ANSWER:* | c |
| *REFERENCES:* | Dietary Guidelines for Americans |
| *PREFACE NAME:* | Comprehension-Level MC |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.2 - Specify how the Dietary Guidelines for Americans work as part of an overall U.S. dietary guidance system. |
| *KEYWORDS:* | Bloom's: Understand |

26. The *Dietary Guidelines* encourage Americans to consume less:

    a. fish and shellfish.

    b. fruits.

    c. nonfat dairy foods.

    d. vegetables.

    e. refined grains.

| | |
|---|---|
| *ANSWER:* | e |
| *REFERENCES:* | Dietary Guidelines for Americans |
| *PREFACE NAME:* | Comprehension-Level MC |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.2 - Specify how the Dietary Guidelines for Americans work as part of an overall U.S. dietary guidance system. |
| *KEYWORDS:* | Bloom's: Understand |

27. Characteristics of food groups plans include all of the following *except*:

    a. they sort foods into groups based on nutrient content.

    b. they specify that people should eat a certain minimum number of servings from each group.

    c. the USDA Food Intake Patterns are an example.

    d. they organize foods with respect to their calorie amounts.

    e. following such a plan will help ensure dietary adequacy, balance, and variety.

| | |
|---|---|
| *ANSWER:* | d |
| *REFERENCES:* | Diet Planning with the USDA Food Intake Patterns |
| *PREFACE NAME:* | Comprehension-Level MC |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.3 - Explain the use of the USDA Food Intake Patterns to plan a nutritious diet. |
| *KEYWORDS:* | Bloom's: Understand |

28. Food group plans primarily dictate:

    a. particular foods to choose each day.

    b. appropriate portion sizes for foods.

    c. estimates of the amounts of carbohydrate, protein, and fat in foods.

    d. numbers and sizes of servings to choose each day.

    e. the average calories provided by food from each group.

| | |
|---|---|
| *ANSWER:* | d |
| *REFERENCES:* | Diet Planning with the USDA Food Intake Patterns |
| *PREFACE NAME:* | Comprehension-Level MC |

**Chapter 02 - NUTRITION TOOLS – STANDARDS AND GUIDELINES**

*LEARNING OBJECTIVES:* NUCC.SIZR.17.2.3 - Explain the use of the USDA Food Intake Patterns to plan a nutritious
diet.

*KEYWORDS:* Bloom's: Understand

29. Based on the USDA MyPlate, at least _____ of the plate should be occupied by fruits and vegetables at each meal.
    a. $1/3$
    b. $1/4$
    c. $1/2$
    d. $2/3$
    e. $3/4$

*ANSWER:* c

*REFERENCES:* Diet Planning Application

*PREFACE NAME:* Comprehension-Level MC

*LEARNING OBJECTIVES:* NUCC.SIZR.17.2.4 - Given the required number of calories, discuss a healthful diet plan by
applying the USDA Food Intake Patterns.

*KEYWORDS:* Bloom's: Understand

30. Which of the following foods do **not** fit into any of the five major food groups in the USDA Food Intake Patterns?
    a. yogurt, legumes, and cheese
    b. peaches, peanuts, and ready-to-eat cereal
    c. margarine, gravy, and jelly
    d. eggs, frozen yogurt, and avocados
    e. white bread, whole-grain pasta, and rice

*ANSWER:* c

*REFERENCES:* Diet Planning with the USDA Food Intake Patterns

*PREFACE NAME:* Comprehension-Level MC

*LEARNING OBJECTIVES:* NUCC.SIZR.17.2.3 - Explain the use of the USDA Food Intake Patterns to plan a nutritious
diet.

*KEYWORDS:* Bloom's: Understand

31. Which of the following foods is de-emphasized in the USDA Food Intake Patterns?
    a. vegetables
    b. fruits
    c. meats
    d. grains
    e. dairy

*ANSWER:* c

*REFERENCES:* Diet Planning with the USDA Food Intake Patterns

*PREFACE NAME:* Comprehension-Level MC

*LEARNING OBJECTIVES:* NUCC.SIZR.17.2.3 - Explain the use of the USDA Food Intake Patterns to plan a nutritious
diet.

*KEYWORDS:* Bloom's: Understand

32. Which of the following foods in the protein foods group of the USDA Food Intake Patterns has the highest nutrient

density?
   a. luncheon meats
   b. fried fish
   c. duck with skin
   d. chicken with no skin
   e. bacon

| | |
|---|---|
| *ANSWER:* | d |
| *REFERENCES:* | Diet Planning with the USDA Food Intake Patterns |
| *PREFACE NAME:* | Comprehension-Level MC |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.3 - Explain the use of the USDA Food Intake Patterns to plan a nutritious diet. |
| *KEYWORDS:* | Bloom's: Understand |

33. In the USDA Food Intake Patterns, one ounce of protein foods is equal to all of the following **except**:
   a. 1 oz. cooked fish.
   b. 1 egg.
   c. 1 tbs. peanut butter.
   d. 1 cup cooked legumes.
   e. ½ oz. nuts.

| | |
|---|---|
| *ANSWER:* | d |
| *REFERENCES:* | Diet Planning with the USDA Food Intake Patterns |
| *PREFACE NAME:* | Comprehension-Level MC |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.3 - Explain the use of the USDA Food Intake Patterns to plan a nutritious diet. |
| *KEYWORDS:* | Bloom's: Understand |

34. The best way for a person to get all the essential nutrients and keep energy intake low is to:
   a. limit consumption of foods from the grains group.
   b. follow the principle of adequacy in dietary intake.
   c. follow the principle of variety in dietary intake.
   d. choose foods with a high nutrient density from each food group.
   e. eat only natural, unprocessed foods.

| | |
|---|---|
| *ANSWER:* | d |
| *REFERENCES:* | Diet Planning with the USDA Food Intake Patterns |
| *PREFACE NAME:* | Comprehension-Level MC |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.3 - Explain the use of the USDA Food Intake Patterns to plan a nutritious diet. |
| *KEYWORDS:* | Bloom's: Understand |

35. When planning a healthful diet using the USDA Food Intake Patterns, vegetarians should remember that:
   a. they will have difficulty meeting their needs when using the USDA Food Intake Patterns.
   b. the vegetable group contains legumes, which can be counted as protein foods.
   c. all soy foods and soy milks contain the same nutrient contents as dairy milk.
   d. nuts and seeds are high in fat content and should be limited.
   e. modifications are prohibited so vegetarians must use another diet planning tool.

*ANSWER:*                             b
*REFERENCES:*             Diet Planning Application
*PREFACE NAME:*        Comprehension-Level MC
*LEARNING OBJECTIVES:*   NUCC.SIZR.17.2.4 - Given the required number of calories, discuss a healthful diet plan by applying the USDA Food Intake Patterns.
*KEYWORDS:*               Bloom's: Understand

36. The MyPlate educational tool has been designed to:

    a. help a diet-planning individual create a diet that more closely follows the USDA Food Intake Patterns.

    b. create an alternative diet plan for individuals not wanting to use the USDA Food Intake Patterns.

    c. help individuals who need to make major changes in their diet for chronic disease control.

    d. substitute for the recommendations of the *Dietary Guidelines for Americans* in diet planning.

    e. be used by professionals with nutrition training.

*ANSWER:*                             a
*REFERENCES:*             Diet Planning Application
*PREFACE NAME:*        Comprehension-Level MC
*LEARNING OBJECTIVES:*   NUCC.SIZR.17.2.4 - Given the required number of calories, discuss a healthful diet plan by applying the USDA Food Intake Patterns.
*KEYWORDS:*               Bloom's: Understand

37. For healthy people, the Food Lists for Diabetes help primarily with:

    a. balance.

    b. calorie control.

    c. adequacy.

    d. moderation.

    e. variety.

*ANSWER:*                             b
*REFERENCES:*             Diet Planning Application
*PREFACE NAME:*        Comprehension-Level MC
*LEARNING OBJECTIVES:*   NUCC.SIZR.17.2.4 - Given the required number of calories, discuss a healthful diet plan by applying the USDA Food Intake Patterns.
*KEYWORDS:*               Bloom's: Understand

38. In the Food Lists for Diabetes, foods are categorized by:

    a. their exact nutrient values in grams.

    b. their exact number of calories per serving.

    c. the average nutrient values in standardized food portions.

    d. the size of an average portion.

    e. theirapproximate proportion ofempty calories.

*ANSWER:*                             c
*REFERENCES:*             Diet Planning Application
*PREFACE NAME:*        Comprehension-Level MC
*LEARNING OBJECTIVES:*   NUCC.SIZR.17.2.4 - Given the required number of calories, discuss a healthful diet plan by applying the USDA Food Intake Patterns.
*KEYWORDS:*               Bloom's: Understand

## Chapter 02 - NUTRITION TOOLS – STANDARDS AND GUIDELINES

39. Which of the following foods is exempt from listing ingredients on the label?
    a. mayonnaise
    b. salad dressing
    c. ice cream
    d. pickles
    e. fresh bananas

*ANSWER:*                        e
*REFERENCES:*            Checking Out Food Labels
*PREFACE NAME:*         Comprehension-Level MC
*LEARNING OBJECTIVES:*  NUCC.SIZR.17.2.5 - Discuss the information included on food labels.
*KEYWORDS:*              Bloom's: Understand

40. Amounts of which type of lipids must be listed on food labels?
    a. monounsaturated fat
    b. polyunsaturated fat
    c. omega-3 fat
    d. phospholipids
    e. *trans* fat

*ANSWER:*                        e
*REFERENCES:*            Checking Out Food Labels
*PREFACE NAME:*         Comprehension-Level MC
*LEARNING OBJECTIVES:*  NUCC.SIZR.17.2.5 - Discuss the information included on food labels.
*KEYWORDS:*              Bloom's: Understand

41. The bottom portion of the Nutrition Facts panel on a food package:
    a. is different on every label.
    b. provides DRI information for comparison.
    c. conveys information specific to the food inside the package.
    d. lists the Daily Values reminder for selected nutrients.
    e. presents the Daily Values for vitamin D and potassium at four calorie levels.

*ANSWER:*                        d
*REFERENCES:*            Checking Out Food Labels
*PREFACE NAME:*         Comprehension-Level MC
*LEARNING OBJECTIVES:*  NUCC.SIZR.17.2.5 - Discuss the information included on food labels.
*KEYWORDS:*              Bloom's: Understand

42. The percentages of the Daily Values on food packages are given in terms of a person requiring _____ calories each day.
    a. 2,000
    b. 2,500
    c. 3,000
    d. 3,500
    e. 1,500

*ANSWER:*                        a

## Chapter 02 - NUTRITION TOOLS – STANDARDS AND GUIDELINES

| | |
|---|---|
| *REFERENCES:* | Checking Out Food Labels |
| *PREFACE NAME:* | Comprehension-Level MC |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.5 - Discuss the information included on food labels. |
| *KEYWORDS:* | Bloom's: Understand |

43. Any food providing 10%-19% of the Daily Value for a nutrient in one serving is considered to be a _____ source of the nutrient.
    a. poor
    b. reliable
    c. good
    d. excellent
    e. fair

| | |
|---|---|
| *ANSWER:* | c |
| *REFERENCES:* | Checking Out Food Labels |
| *PREFACE NAME:* | Comprehension-Level MC |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.5 - Discuss the information included on food labels. |
| *KEYWORDS:* | Bloom's: Understand |

### *Application-Level Multiple-Choice Items*

44. What is one difference between the Dietary Reference Intakes and the Daily Values?
    a. the Daily Values are used in the United States only.
    b. the Dietary Reference Intakes are to be used on food labels.
    c. the Daily Values are a better way of determining nutrient goals of individuals.
    d. the Dietary Reference Intakes do not account for age or gender.
    e. the Dietary Reference Intakes are expressed as a percent of total calories.

| | |
|---|---|
| *ANSWER:* | a |
| *REFERENCES:* | Nutrient Recommendations |
| *PREFACE NAME:* | Application-Level MC |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.1 - State the significance of Dietary Reference Intakes (DRI) and Daily Values as nutrient standards. |
| *KEYWORDS:* | Bloom's: Understand |

45. When public health officials were determining the amount of folate to add to grain products in the food supply for fortification, they most likely reviewed which of the following values for that particular vitamin for women of child-bearing age?
    a. Adequate Intakes (AI)
    b. Estimated Average Requirements (EAR)
    c. Acceptable Macronutrient Distribution Ranges (AMDR)
    d. Daily Values (DV)
    e. Tolerable Upper Limits (TUL)

| | |
|---|---|
| *ANSWER:* | b |
| *REFERENCES:* | Nutrient Recommendations |
| *PREFACE NAME:* | Application-Level MC |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.1 - State the significance of Dietary Reference Intakes (DRI) and Daily Values as nutrient standards. |

*KEYWORDS:*            Bloom's: Understand

46. Concerned about the toxic effects of added nutrients in fortified foods and supplements, when eaten in addition to staple foods, scientists established the _____ category of the Dietary Reference Intakes (DRI).

   a. Recommended Dietary Allowances (RDA)

   b. Adequate Intakes (AI)

   c. Estimated Average Requirements (EAR)

   d. Tolerable Upper Intake Levels (UL)

   e. Acceptable Micronutrient Distribution Ranges (AMDR)

*ANSWER:*              a

*REFERENCES:*          Nutrient Recommendations

*PREFACE NAME:*        Application-Level MC

70. Blueberries have been leading the way in research on the effectiveness of antioxidants against aging effects on the brain. What would be your comments about including more blueberries in your diet?
 a. Blueberries are only one of many flavonoid-rich foods that may slow cognitive decline, but can contribute to an overall healthy diet high in plant foods.
 b. Blueberries contain a high level of antioxidants so they should be an excellent food to consume to protect against aging effects on the brain.
 c. The antioxidant content of blueberries is much higher than most other foods so they should be selected first to add to the diet.
 d. Studies done on laboratory rats showed fewer age-related declines in brain function, so those findings can be translated to benefits for humans.
 e. Controlled human trials <u>are not needed</u> to confirm whether adding the berries to a person's diet actually does protect the human brain in aging.

**Essay**

75. Describe how the DRI Committee establishes DRI values.

| | |
|---|---|
| *ANSWER:* | A committee of nutrition experts develops, publishes, and updates the DRI. This is a committee of the Food and Nutrition Board of the National Academy of Sciences' Institute of Medicine, working in association with Health Canada. The DRI committee has set values for all of the vitamins and minerals, as well as for carbohydrates, fiber, lipids, protein, water, and energy.For the DRI committee members to set an RDA,ideally, the first step of the DRI committee will be to find out how much of a specific nutrient various healthy individuals need. To do so, the committee reviews studies of deficiency states, nutrient stores and their depletion, and the factors influencing them.The committee selects the most valid data for use in this work.For the committee to set the value, they decide the value high enough so that 97 to 98 percent of the population will be covered but not so high as to be excessive. The committee makes judgments of this kind when setting the DRI recommended intakes for many nutrients. Relatively few healthy people have requirements that are not covered by the DRI recommended intakes. |
| *REFERENCES:* | Nutrient Recommendations |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.1 - State the significance of Dietary Reference Intakes (DRI) and Daily Values as nutrient standards. |
| *KEYWORDS:* | Bloom's: Understand |

76. What changes to the average American diet are necessary for the population to meet the *Dietary Guidelines*?

| | |
|---|---|
| *ANSWER:* | The Dietary Guidelines committee compared average U.S. nutrient intakes with DRI recommendations and identified two categories of nutrients that pose a public health risk due to their under- or overconsumption, indicating a need for change in U.S. eating habits. Important needed nutrients are undersupplied by the current U.S. diet (vitamins A, D, E, and C, folate, calcium, magnesium, potassium, iron, and fiber) while other, less healthful nutrients are oversupplied (sodium and saturated fat). The U.S. diet is too high in calories and red and processed meat, refined grains, added sugars, sodium, and saturated fat. Improvements are needed in the average U.S. diet—more whole grains, far fewer refined grains, more vegetables and fruit, and more milk—to meet intake goals. |
| *REFERENCES:* | Dietary Guidelines for Americans |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.2 - Specify how the Dietary Guidelines for Americans work as part of an overall U.S. dietary guidance system. |
| *KEYWORDS:* | Bloom's: Understand |

77. Identify the USDA recommendations for daily physical activity.

| | |
|---|---|
| *ANSWER:* | The USDA's Physical Activity Guidelines for Americans suggest that to maintain good health, adults should engage in about 2.5 hours of moderate physical activity each week. A |

|  |  |
|---|---|
|  | brisk walk at a pace of about 100 steps per minute (1,000 steps over 10 minutes) constitutes "moderate" activity. For weight control and additional health benefit, more than this minimum amount of physical activity is required. |
| *REFERENCES:* | Dietary Guidelines for Americans |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.2 - Specify how the Dietary Guidelines for Americans work as part of an overall U.S. dietary guidance system. |
| *KEYWORDS:* | Bloom's: Understand |

78. List the major groups and subgroups of the USDA Food Intake Patterns and give an example of a nutrient-dense food from each.

|  |  |
|---|---|
| *ANSWER:* | Fruits -Choose whole or cut-up fruits (apples) more often than fruit juice. |
|  | Vegetables - **Vegetables subgroups:** Dark green vegetables (broccoli and leafy greens), red and orange vegetables (carrots, pumpkin), legumes (black beans, soybeans, and soy products such as tofu), starchy vegetables (cassava, corn), other vegetables (artichokes, snow peas) |
|  | Grains - **Grains subgroups:** Whole grains (barley, brown rice), enriched refined products (cereals, pastas) |
|  | Protein foods - **Protein foods subgroups:** Seafood (fish, shellfish);meats, poultry, and eggs (lean or low-fat meats; e.g., poultry without skin); nuts, seeds, and soy products (unsalted almonds,flaxseeds, textured vegetable protein, tofu, peanut butter) |
|  | Milk and milk products –Choose fat-free or 1% low-fat milk products. |
| *REFERENCES:* | Diet Planning with the USDA Food Intake Patterns |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.3 - Explain the use of the USDA Food Intake Patterns to plan a nutritious diet. |
| *KEYWORDS:* | Bloom's: Understand |

79. Identify the specific advantages of the Food Lists for Diabetes (formerly the Exchange System).

|  |  |
|---|---|
| *ANSWER:* | The Food Lists for Diabetes were developed for use by people with diabetes but can be useful to anyone wishing to control calories. The lists provide estimated grams of carbohydrate, fat, saturated fat, and protein in standardized food portions, as well as their calorie values. These are average gram values for whole groups of foods, so they often differ from the exacting values given for individual foods. With the calorie estimates committed to memory, people can make an informed approximation of the energy-yielding nutrients and calories in almost any food they might encounter. |
| *REFERENCES:* | Diet Planning Application |
| *LEARNING OBJECTIVES:* | NUCC.SIZR.17.2.4 - Given the required number of calories, discuss a healthful diet plan by applying the USDA Food Intake Patterns. |
| *KEYWORDS:* | Bloom's: Understand |

80. Name and briefly describe the three types of claims that may appear on food labels. How reliable is each of these types of claims?

| *ANSWER:* | Nutrient claims—for example, that a food is "low" in cholesterol or a "good source" of vitamin A—are based on the Daily Values and represent reliable information.<br>A health claim describes a relationship between a food or its components and a disease or health condition. Many health claims are based on strong scientific evidence and are thus reliable; however the FDA also allows health claims that are backed by weak evidence. These are "qualified" claims in the sense that labels bearing them must also state the strength of the scientific evidence backing them up. Unfortunately, consumers cannot distinguish between scientifically reliable claims and those that are less so. |

Structure-function claims are the least reliable. A label-reading consumer is much more likely to encounter this kind of claim on a food or supplement label than the more regulated health claims just described. For the food manufacturer, printing a *health claim* involves acquiring FDA permission, a time-consuming and expensive process. Instead, the manufacturer can print a similar-looking structure-function claim that requires only FDA notification and no prior approval.A problem is that, to a reasonable consumer, the two kinds of claims may appear identical; for example, "Lowers cholesterol" is an FDA-approved health claim, whereas"Helps maintain normal cholesterol levels" is a less-regulated structure-function claim. Such valid-appearing but unreliable structure-function claims diminish the credibility of all health-related claims on labels.
