## CHAPTER 2 ANALYZING TRANSACTIONS

### DISCUSSION QUESTIONS

1. An account is a form designed to record changes in a particular asset, liability, stockholders' equity, revenue, or expense. A ledger is a group of related accounts.
2. The terms *debit* and *credit* may signify either an increase or a decrease, depending upon the nature of the account. For example, debits signify an increase in asset, expense, and dividends accounts but a decrease in liability, common stock, retained earnings, and revenue accounts.
3.
  - a. Assuming no errors have occurred, the credit balance in the cash account resulted from writing checks for \$1,850 in excess of the amount of cash on deposit.
  - b. The \$1,850 credit balance in the cash account as of December 31 is a liability owed to the bank. It is usually referred to as an "overdraft" and should be classified on the balance sheet as a liability.
4.
  - a. The revenue was earned in October.
  - b. (1) Debit Accounts Receivable and credit Fees Earned or another appropriately titled revenue account in October.  
(2) Debit Cash and credit Accounts Receivable in November.
5. No. Errors may have been made that had the same erroneous effect on both debits and credits, such as failure to record and/or post a transaction, recording the same transaction more than once, and posting a transaction correctly but to the wrong account.
6. The listing of \$9,800 is a transposition; the listing of \$100 is a slide.
7.
  - a. No. Because the same error occurred on both the debit side and the credit side of the trial balance, the trial balance would not be out of balance.
  - b. Yes. The trial balance would not balance. The error would cause the debit total of the trial balance to exceed the credit total by \$90.
8.
  - a. The equality of the trial balance would not be affected.
  - b. On the income statement, total operating expenses (salary expense) would be overstated by \$7,500, and net income would be understated by \$7,500. On the statement of stockholders' equity, the beginning and ending retained earnings would be correct. However, net income and dividends would be understated by \$7,500. These understatements offset one another, and thus, ending retained earnings is correct. The balance sheet is not affected by the error.
9.
  - a. The equality of the trial balance would not be affected.
  - b. On the income statement, revenues (fees earned) would be overstated by \$300,000, and net income would be overstated by \$300,000. On the statement of stockholders' equity, the beginning retained earnings would be correct. However, net income and ending retained earnings would be overstated by \$300,000. The balance sheet total assets is correct. However, liabilities (notes payable) is understated by \$300,000, and stockholders' equity (retained earnings) is overstated by \$300,000. The understatement of liabilities is offset by the overstatement of stockholders' equity (retained earnings), and thus, total liabilities and stockholders' equity is correct.
10.
  - a. From the viewpoint of Surety Storage, the balance of the checking account represents an asset.
  - b. From the viewpoint of Ada Savings Bank, the balance of the checking account represents a liability.

**BE 2–1**

1. Debit and credit entries, normal credit balance
2. Debit and credit entries, normal debit balance
3. Debit entries only, normal debit balance
4. Debit entries only, normal debit balance
5. Debit entries only, normal debit balance
6. Credit entries only, normal credit balance

**BE 2–2**

Nov.	2	Office Supplies		1,600	
		Cash			500
		Accounts Payable			1,100

**BE 2–3**

Aug.	13	Cash	9,000	
		Fees Earned		9,000

**BE 2–4**

June	30	Dividends	11,500

**BE 2–5**

Using the following T account, solve for the amount of supplies expense (indicated by ? below).

Supplies			
Aug. 1 Bal.	1,025	?	Supplies expense
Supplies purchased	3,110	_____	
Aug. 31 Bal.	1,324		

$$\$1,324 = \$1,025 + \$3,110 - \text{Supplies expense}$$

$$\text{Supplies expense} = \$1,025 + \$3,110 - \$1,324 = \$2,811$$

CHAPTER 2     Analyzing Transactions

**BE 2–6**

- a.    The totals are equal because both the debit and credit entries were journalized and posted for \$12,900.
- b.    The totals are unequal. The credit total is higher by \$1,656 (\$1,840 – \$184).
- c.    The totals are unequal. The debit total is higher by \$4,500 (\$8,300 – \$3,800).

**BE 2–7**

a.	Cash	8,400	
	Accounts Receivable		8,400
b.	Supplies	2,500	
	Office Equipment		2,500
	Supplies	2,500	
	Accounts Payable		2,500

**Note:** The first entry in (b) reverses the incorrect entry, and the second entry records the correct entry. These two entries could also be combined into one entry as shown below; however, preparing two entries would make it easier for someone to understand later what happened and why the entries were necessary.

Supplies	5,000	
Office Equipment		2,500
Accounts Payable		2,500

**Ex. 2–10**

- a. The increase of \$270,800 (\$1,245,000 – \$974,200) in the cash account does not indicate net income of that amount. Net income is the net change in all assets and liabilities from operating (revenue and expense) transactions.

- Debit (negative) balance of \$16,000 (\$314,000 – \$10,000 – \$320,000). This negative balance means that the liabilities of the business exceed the assets.
- Yes. The balance sheet prepared at December 31 will balance, with Retained Earnings being reported in the stockholders' equity section as a debit (negative) balance of \$16,000.

**Ex. 2-17**

Inequality of trial balance totals would be caused by errors described in (c) and (e). For (c), the debit total would exceed the credit total by \$9,900 (\$4,950 + \$4,950). For (e), the credit total would exceed the debit total by \$17,100 (\$19,000 – \$1,900).

Errors (b), (c), (d), and (e) would require correcting entries. Although it is not a correcting entry, the entry that was not made in (a) should also be entered in the journal.

1. The Debit column total is added incorrectly. The sum is \$1,098,500 rather than \$1,801,500.
2. The trial balance should be dated “December 31, 20Y8,” not “For the Year Ending December 31, 20Y8.”
3. The Accounts Receivable balance should be in the Debit column.
4. The Accounts Payable balance should be in the Credit column.
5. The Dividends balance should be in the Debit column.
6. The Advertising Expense balance should be in the Debit column.

A corrected trial balance would be as follows:

Ensemble Co. Unadjusted Trial Balance December 31, 20Y8		
	Debit Balances	Credit Balances
Cash	42,900

5. Some supplies may have been used during November, but no supplies expense has been recorded.

As will be discussed in Chapter 3, adjustments are necessary at the end of the accounting period to bring the accounts up to date. For example, adjustments for supplies used, insurance expired, and depreciation would probably be required by Heritage Designs.

**Note to Instructors:** At this point, students have not been exposed to depreciation, but some insightful students might recognize the need for recording supplies used and insurance expired. You might use this as an opportunity to discuss what is coming in Chapter 3.

5. Some supplies may have been used during October, but no supplies expense has been recorded.

As will be discussed in Chapter 3, adjustments are necessary at the end of the accounting period to bring the accounts up to date. For example, adjustments for supplies used, insurance expired, and depreciation would probably be required by Pioneer Designs.

**Note to Instructors:** At this point, students have not been exposed to depreciation, but some insightful students might recognize the need for recording supplies used and insurance expired. You might use this as an opportunity to discuss what is coming in Chapter 3.

## MAKE A DECISION

MAD 2-1

a.

<b>Amazon.com, Inc.</b> <b>Income Statements</b> <b>For the Years Ended December 31</b> <b>(in millions)</b>				
	Year 2	Year 1	Increase/(Decrease)	
			Amount	Percent
<b>Revenues:</b>				
Product sales	\$ 94,665	\$ 79,268	\$15,397	19.4%
Service sales	41,322	27,738	13,584	49.0%
Total revenues	\$ 135,987	\$ 107,006	\$28,981	27.1%
<b>Operating expenses:</b>				
Cost of sales	\$ (88,265)	\$ (71,651)	16,614	23.2%
Fulfillment	(17,619)	(13,410)	4,209	31.4%
Marketing	(7,233)	(5,254)	1,979	37.7%
Technology and content	(16,085)	(12,540)	3,545	28.3%
General and administrative	(2,432)	(1,747)	685	39.2%
Other operating expense				
(income), net	(167)	(171)	(4)	(2.3)%
Total operating expenses	\$(131,801)	\$(104,773)	\$27,028	25.8%
Operating income	\$ 4,186	\$ 2,233	\$ 1,953	87.5%

- b. The horizontal analysis shows that total revenues increased by 27.1% between the two years, with a strong increase in service sales. Service sales are revenues earned from Amazon's Web hosting, Web design, and order fulfillment services provided for other businesses. This part of Amazon apparently has been growing rapidly. Total operating expenses have grown by 25.8% between the two years, indicating that expenses are growing slower than revenues. The expense growth appears to be occurring across all the major expense categories. The net result is a significant increase in operating income between the two years of 87.5%. Thus, Amazon demonstrates significant revenue and operating income growth from Year 1 to Year 2.

**MAD 2-2**

a.

<b>Chipotle Mexican Grill, Inc.</b> <b>Income Statements</b> <b>For the Years Ended December 31</b> <b>(in thousands)</b>				
	Year 2	Year 1	Increase/(Decrease)	
			Amount	Percent
Revenue	\$ 3,904,384	\$ 4,501,223	\$(596,839)	(13.3)%
Expenses:				
Food, beverage, packing	\$(1,365,580)	\$(1,503,835)	\$(138,255)	(9.2)%
Labor	(1,105,001)	(1,045,726)	59,275	5.7%
Rent (occupancy)	(293,636)	(262,412)	31,224	11.9%
General and administrative	(641,953)	(514,963)	126,990	24.7%
Other	(463,647)	(410,698)	52,949	12.9%
Total expenses	\$(3,869,817)	\$(3,737,634)	\$ 132,183	3.5%
Operating income	\$ 34,567	\$ 763,589	\$(729,022)	(95.5)%

- b. Revenue decreased by 13.3% in Year 2, while total expenses increased 3.5%. Food, beverage, packing expense decreased by 9.2%, while the other expenses increased from 5.7% (labor) to 24.7% (general and administrative). As a result, operating income decreased by 95.5%, a significant decrease and unfavorable result.
- c. The significant decrease in revenue and operating income in Year 2 was caused by food-borne illnesses (E. Coli) in as many as 15 states. As a result, customers avoided Chipotle's restaurants with a related decrease in revenue. The 9.2% decrease in food, beverage, packing expense is consistent with the decrease in customers and related revenue.

CHAPTER 2 Analyzing Transactions

MAD 2-3

a.

<b>Vera Bradley, Inc.</b> <b>Income Statements</b> <b>For the Years Ended January 31</b> <b>(in millions)</b>				
	Year 2	Year 1	Increase/(Decrease)	
			Amount	Percent
Revenue	\$ 502.6	\$ 509.0	\$ (6.4)	(1.3)%
Expenses:				
Cost of merchandise sold	\$(221.4)	\$(240.0)	\$(18.6)	(7.8)%
Selling, general, admin. expenses	(236.8)	(208.7)	28.1	13.5%
Other expenses	(16.8)	(21.9)	(5.1)	(23.3)%
Total expenses	\$(475.0)	\$(470.6)	\$ 4.4	0.9%
Operating income	\$ 27.6	\$ 38.4	\$(10.8)	(28.1)%

- b. Operating income decreased \$10.8 million or 28.1% in Year 2. This is a significant decrease and would be viewed unfavorably by stockholders. Revenue decreased by 1.3% (\$6.4 million), which was accompanied by a 7.8% (\$18.6 million) decrease in cost of merchandise sold. However, selling, general, admin. expenses increased by 13.5% (\$28.1 million), which was partially offset by a 23.3% (\$5.1 million) decrease in other expenses.

MAD 2-4

- a. 1. Revenue: \$73,785 – \$72,618 = \$1,167

$$\frac{\$1,167}{\$72,618} = 1.6\%$$

2. Operating expenses: \$68,875 – \$68,083 = \$792

$$\frac{\$792}{\$68,083} = 1.2\%$$

3. Operating income: \$4,910 – \$4,535 = \$375

$$\frac{\$375}{\$4,535} = 8.3\%$$

- b. The revenue increased by 1.6% between the two years, while the operating expenses grew by 1.2%. Thus, expenses grew less than revenues. As a result, operating income increased 8.3% in Year 2.

CHAPTER 2 Analyzing Transactions

**MAD 2-5**

- a. 1. Revenue:  $\$482,130 - \$485,651 = \$(3,521)$

$$\frac{\$(3,521)}{\$485,651} = (0.7)\%$$

2. Operating expenses:  $\$458,025 - \$458,504 = \$(479)$

$$\frac{\$(479)}{\$458,504} = (0.1)\%$$

3. Operating income:  $\$24,105 - \$27,147 = \$(3,042)$

$$\frac{\$(3,042)}{\$27,147} = (11.2)\%$$

- b. Revenue decreased by 0.7%, while operating expenses decreased only 0.1%. As a result, operating income decreased by 11.2%, which is an unfavorable change in Year 2.

**MAD 2-6**

Target's operating results improved from Year 1 to Year 2, while Wal-Mart's operating results declined. Specifically, Target's revenue and operating income increased by 1.6% and 8.3%. In contrast, Wal-Mart's revenue and operating income decreased by 0.7% and 11.2%.

### TIF 2–1

1. **No. For financial accounting information to be useful, it must accurately reflect an entity's business transactions and economic activity. For this to happen, each account must reflect the increases or decreases that result from each transaction. If the trial balance does not balance, it means that a transaction has not been accurately recorded in the accounts. By knowingly submitting a trial balance that does not accurately reflect the transactions in the accounts, Buddy is demonstrating a failure of individual character and is acting unethically.**
2. **The users of the financial information who rely upon this information will be affected, as the information will not be a faithful representation of the entity's economic activity.**
3. **Buddy should have discussed the issue with his supervisor and asked for more time to find the error.**

CHAPTER 2 Analyzing Transactions

**TIF 2–4**

The following general journal entry should be used to record the receipt of tuition payments received in advance of classes:

Cash.....	XXX	
Unearned Tuition Deposits.....		XXX

Cash is an asset account, and Unearned Tuition Deposits is a liability account. As the classes are taught throughout the term, the unearned tuition deposits become earned revenue.

**TIF 2–5**

The journal is called the book of original entry. It provides a time-ordered history of the transactions that have occurred for the firm. This time-ordered history is very important because it allows one to trace ledger account balances back to the original transactions that created those balances. This is called an “audit trail.” If the firm recorded transactions by posting to ledgers directly, it would be nearly impossible to reconstruct actual transactions. The debits and credits would all be separated and accumulated into the ledger balances. Once the transactions become part of the ledger balances, the original transactions would be lost. That is, there would be no audit trail, and any errors that might occur in recording transactions would be almost impossible to trace. Thus, firms first record transaction debits and credits in a journal. These transactions are then posted to the ledger to update the account balances. The journal and ledger are linked using posting references. This allows an analyst to trace the transaction flow forward or backward, depending on the need.

**TIF 2–6**

1. The rules of debit and credit must be memorized. Dot is correct in that the rules of debit and credit could be reversed as long as everyone accepted and abided by the rules. However, the important point is that everyone accepts the rules as the way in which transactions should be recorded. This generates uniformity across the accounting profession and reduces errors and confusion. Because the current rules of debit and credit have been used for centuries, Dot should adapt to the current rules of debit and credit, rather than devise her own.

The primary reason that all accounts do not have the same rules for increases and decreases is for control of the recording process. The double-entry accounting system, which includes both (1) the rules of debit and credit and (2) the accounting equation, guarantees that (1) debits always equal credits and (2) assets always equal liabilities plus owner's equity. If all increases in the account were recorded by debits, then the control that debits always equal credits would be removed. In addition, the control that the normal balance of assets is a debit would also be removed. The accounting equation would still hold, but the control over recording transactions would be weakened.

Dot is correct that we could call the left and right sides of an account different terms, such as "LE" or "RE." Again, centuries of tradition dictate the current terminology used. One might note, however, that in Latin, *debere* (debit) means left and *credere* (credit) means right.

2. The accounting system may be designed to capture information about the buying habits of various customers or vendors, such as the quantity normally ordered, average amount ordered, number of returns, etc. Thus, in a sense, there can be other "sides" of (information about) a transaction that are recorded by the accounting system. Such information would be viewed as supplemental to the basic double-entry accounting system.

# Corporate Financial Accounting

Fifteenth Edition

## Chapter 2 Analyzing Transactions

# Learning Objectives

- **Obj. 1:** Describe the characteristics of an account and a chart of accounts.
- **Obj. 2:** Describe and illustrate journalizing transactions using the double-entry accounting system.
- **Obj. 3:** Describe and illustrate the journalizing and posting of transactions to accounts.
- **Obj. 4:** Prepare an unadjusted trial balance and explain how it can be used to discover errors.
- **Obj. 5:** Describe and illustrate the use of horizontal analysis in evaluating a company's performance and financial condition.

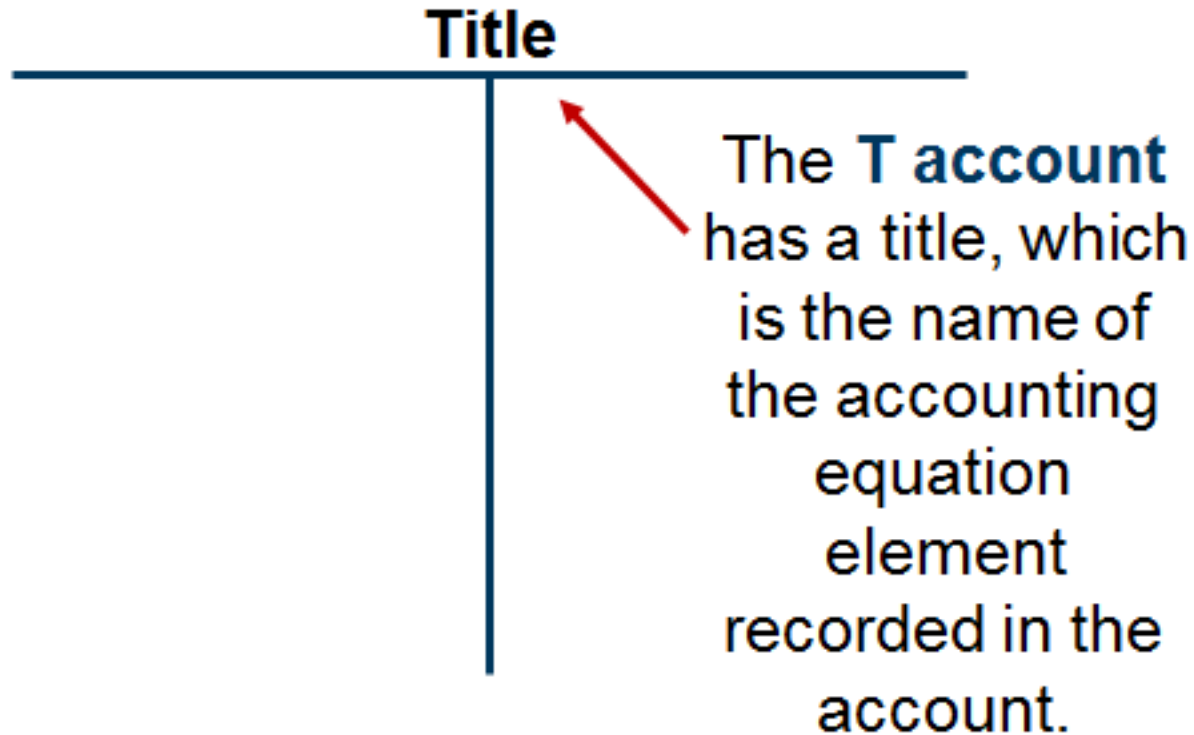

# Using Accounts to Record Transactions

- Accounting systems are designed to show the increases and decreases in each accounting equation element as a separate record.
  - This record is called an **account**.

 **Balance of the Account**  
(the excess of the debits  
of an asset account over  
its credits)

# Chart of Accounts

- A group of accounts for a business entity is called a **ledger**.
- A list of the accounts in the ledger is called a **chart of accounts**.
- The accounts are normally listed in the order in which they appear in the financial statements.
  - The balance sheet accounts are listed first, in the order of assets, liabilities, and stockholders' equity.
  - The income statement accounts are then listed in the order of revenues and expenses.

# Assets

- **Assets** are resources owned by the business entity.
  - Examples of assets include:
    - Cash
    - Supplies
    - Intangible assets (patent rights, copyrights, trademarks)
    - Accounts receivable
    - Prepaid expenses
    - Buildings
    - Equipment

# Liabilities

- **Liabilities** are debts owed to outsiders (creditors).
  - Examples of liabilities include:
    - Accounts payable
    - Notes payable
    - Wages payable
    - Unearned revenues (cash received from customers before services are delivered)

# Stockholders' Equity

- **Stockholders' equity** is the stockholders' right to the assets of the business.
- Stockholders' equity is represented by the balance of the **common stock** and **retained earnings** accounts.
- A **dividends** account represents distributions of earnings to stockholders.

# Revenues

- **Revenues** are increases in assets and stockholders' equity as a result of selling services or products to customers.
  - Examples of revenues include:
    - Fees earned
    - Fares earned
    - Commissions revenue
    - Rent revenue

# Expenses

- **Expenses** result from using up assets or consuming services in the process of generating revenues.
  - Examples of expenses include:
    - Wages expense
    - Rent expense
    - Utilities expense
    - Supplies expense
    - Miscellaneous expense

# Account Numbering System

- Accounts are grouped by account type (assets, liabilities, stockholders' equity, revenue, and expenses).
- Each type of account is numbered using the same first digit, for example:
  - Assets begins with 1
  - Liabilities begins with 2
  - Stockholders' equity begins with 3
  - Revenue begins with 4
  - Expenses begins with 5

# Double-Entry Accounting System

- All businesses use what is called the **double-entry accounting system**.
- This system is based on the accounting equation and requires:
  - Every business transaction to be recorded in at least two accounts.
  - The total debits recorded for each transaction to be equal to the total credits recorded.
- This system has specific rules of debit and credit for recording transactions.

# Balance Sheet Accounts

- The debit and credit rules for balance sheet accounts are as follows:

Balance Sheet Accounts							
ASSETS Asset Accounts		=	LIABILITIES Liability Accounts		+	STOCKHOLDERS' EQUITY Stockholders' Equity Accounts	
Debit for increases (+)	Credit for decreases (–)		Debit for decreases (–)	Credit for increases (+)		Debit for decreases (–)	Credit for increases (+)

# Income Statement Accounts

- The debit and credit rules for income statement accounts are based on their relationship with stockholders' equity.
- The rules of debit and credit for revenue and expense accounts are as follows:

Income Statement Accounts			
Revenue Accounts		Expense Accounts	
Debit for decreases (–)	Credit for increases (+)	Debit for increases (+)	Credit for decreases (–)

# Dividends

- The debit and credit rules for recording dividends are based on the effect of dividends on stockholders' equity (retained earnings).
- The rules of debit and credit for the dividends account are as follows:

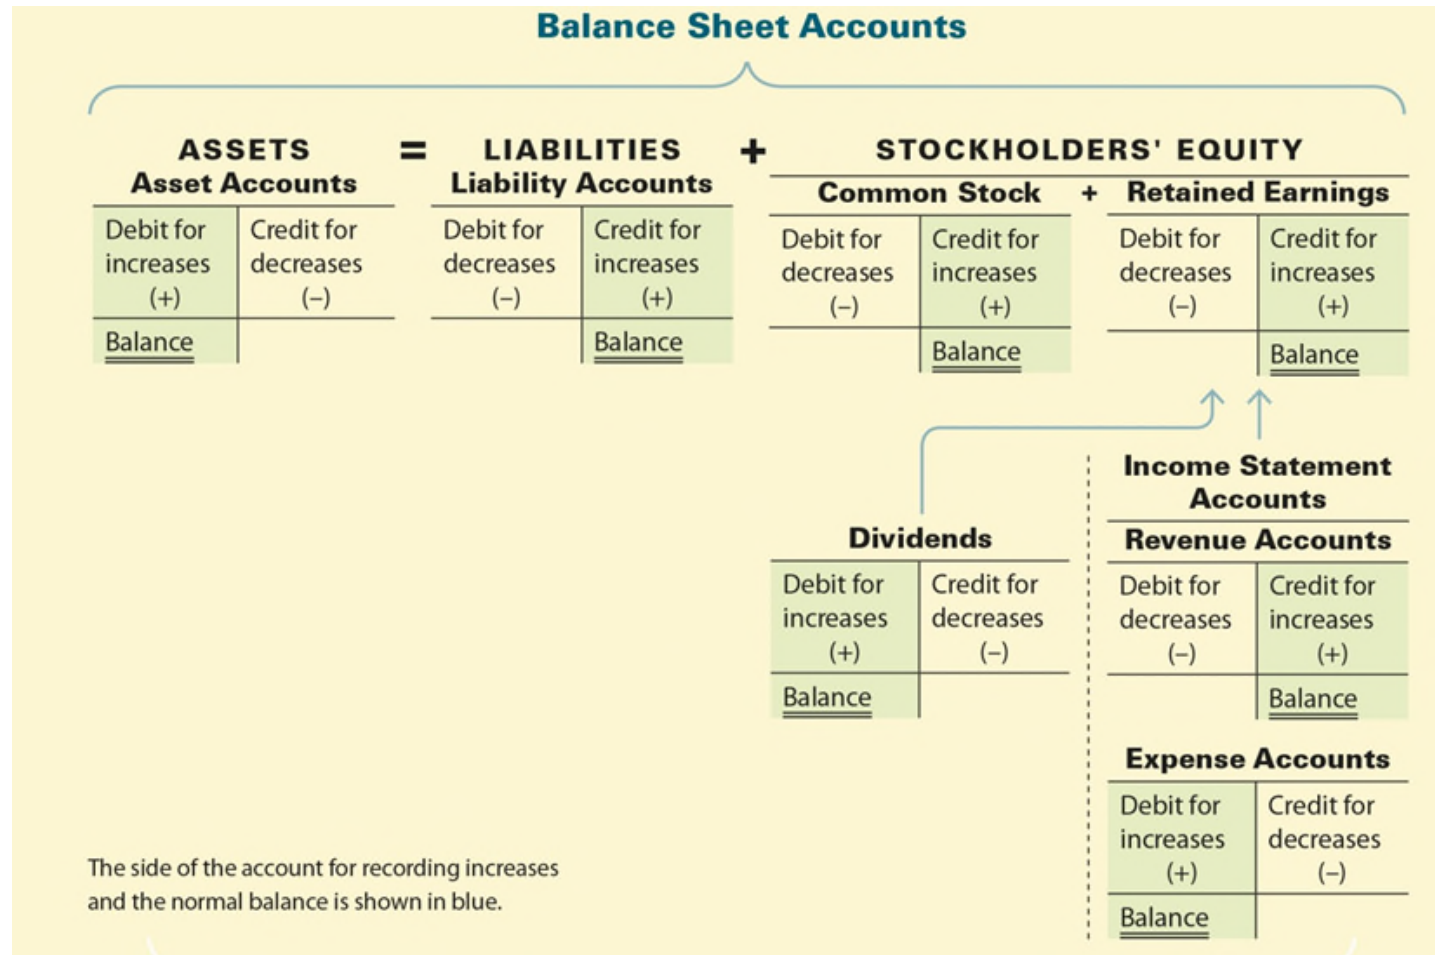

<b>Dividends Account</b>	
Debit for increases (+)	Credit for decreases (–)

# Normal Balances

- The sum of the increases in an account is usually equal to or greater than the sum of the decreases in the account. Thus, the **normal balance of an account** is either a debit or a credit, depending on whether increases in the account are recorded as debits or credits.

David Simmons, M.D., recently organized Simmons Urgent Care Inc. as a walk-in clinic. The clinic has purchased medical supplies and office equipment on account. In addition, David has invested cash in the business in exchange for common stock.

Identify the balance sheet accounts that Simmons Urgent Care will use to record these transactions, indicating whether each is an asset, a liability, or a stockholders' equity account and whether the normal balance is a debit or a credit.

# Check Up Corner Balance Sheet Accounts (2 of 2)

## Solution:

Assets are the resources owned by a business.

### Assets

Cash	debit
Supplies	debit
Equipment	debit

↑  
Asset accounts have normal debit balances.

### Liabilities

Accounts Payable	credit
<b>Stockholders' Equity</b>	
Common Stock	credit

↑  
Liability and stockholders' equity accounts have normal credit balances.

← Liabilities are debts owed to outsiders (creditors).

← Stockholders' equity is the stockholders' rights to the assets of the business.

# Journalizing (1 of 4)

- Using the rules of debit and credit, transactions are initially entered in a record called a **journal**.

# Journalizing (2 of 4)

- Transactions are recorded in the journal using the following steps:
  - Step 1. The date of the transaction is entered in the Date column.
  - Step 2. The title of the account to be debited is recorded to the left in the Description column, and the amount to be debited is entered in the Debit column.
  - Step 3. The title of the account to be credited is listed below and indented to the debited account title, and the amount to be credited is entered in the Credit column.

# Journalizing (3 of 4)

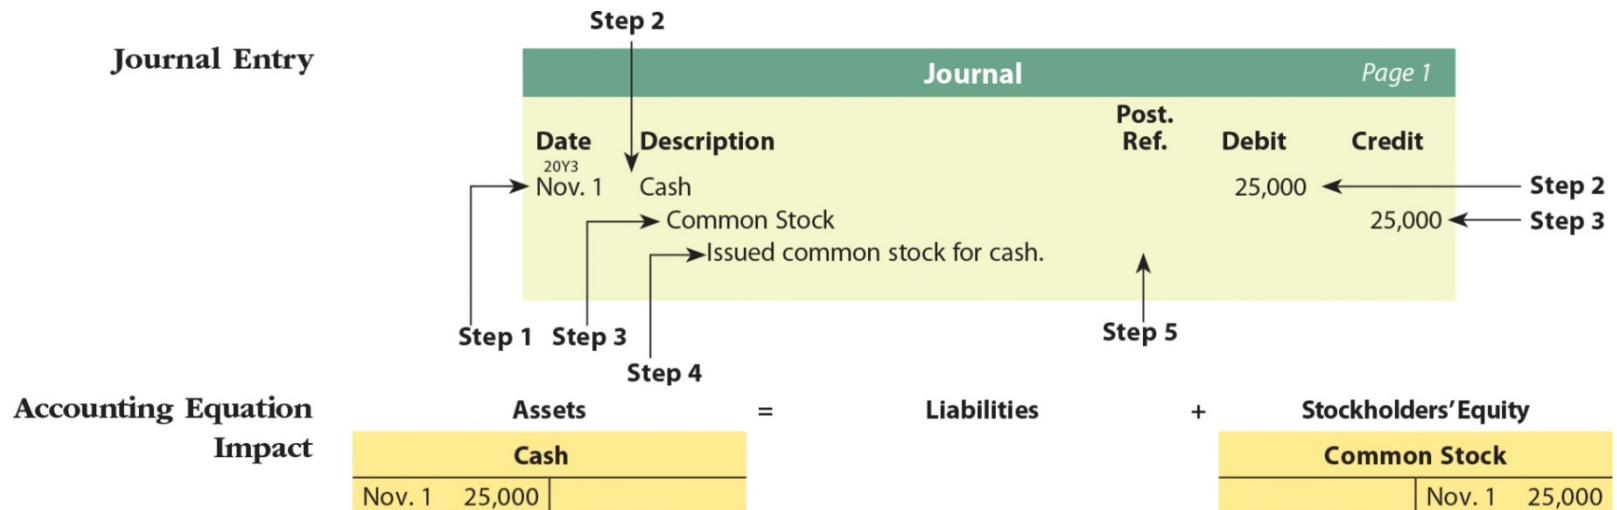

- Step 4. A brief description may be entered below the credited account.
- Step 5. The Post. Ref. (Posting Reference) column is left blank when the journal entry is initially recorded. This column is used later when the journal entry amounts are transferred to the accounts in the ledger.

# Journalizing (4 of 4)

- The process of recording a transaction in the journal is called **journalizing**.
- The entry in the journal is called a **journal entry**.
- The form of the journal illustrated in Transaction A is called the **two-column journal**.

# Transaction A

- On November 1, Chris Clark deposited \$25,000 in a bank account in the name of NetSolutions in exchange for common stock.

# Check Up Corner: Journal Entries (1 of 2)

Selected transactions from Simmons Urgent Care Inc.'s first month of operations are as follows:

- Jan. 1 David Simmons deposited \$30,000 in a bank account in the name of Simmons Urgent Care Inc. in exchange for common stock.
- 2 Purchased medical supplies on account, \$6,000.
- 6 Paid cash to creditors on account, \$3,200.
- 7 Purchased office equipment on account, \$62,500.

Prepare the journal entries to record these transactions, and illustrate their impact on the accounting equation using T accounts.

# Check Up Corner: Journal Entries (2 of 2)

## Solution:

The title of the account to be debited is recorded flush left in the Description column.

The amount to be debited is recorded in the Debit column.

The amount to be credited is recorded in the Credit column.

Date	Description	Debit	Credit
2017 Jan. 1	Cash	30,000	
	Common Stock		30,000
2	Supplies	6,000	
	Accounts Payable		6,000
6	Accounts Payable	3,200	
	Cash		3,200
7	Office Equipment	62,500	
	Accounts Payable		62,500

The title of the account to be credited is recorded below the debit in the Description column and indented slightly.

Increases in asset accounts are recorded on the debit (left) side of the account.

Assets			
Cash			
Jan. 1	30,000	Jan. 6	3,200

Supplies			
Jan. 2	6,000		

Office Equipment			
Jan. 7	62,500		

Increases in liability and stockholders' equity accounts are recorded on the credit (right) side of the account.

Liabilities			
Accounts Payable			
Jan. 6	3,200	Jan. 2	6,000
		7	62,500

Stockholders' Equity			
Common Stock			
		Jan. 1	30,000

Decreases in liability accounts are recorded on the debit (left) side of the account.

Decreases in asset accounts are recorded on the credit (right) side of the account.

# Posting Journal Entries to Accounts (1 of 6)

- The process of transferring the debits and credits from the journal entries to the accounts is called **posting**.

- The T account has been replaced by a **standard four-column account** in the next slide.
- In addition to Debit and Credit columns for recording transactions, the standard account form also has Balance (Debit and Credit) columns.
- These Balance columns are used to indicate the account balance after each transaction, sometimes called a *running balance*.

# Posting Journal Entries to Accounts (5 of 6)

- The debits and credits for each journal entry are posted to the accounts in the order in which they occur in the journal.
- The debit portion of the December 1 journal entry on the previous slide is posted to the prepaid account using the following four steps:
  - Step 1. The date (Dec. 1) of the journal entry is entered in the Date column of Prepaid Insurance and Cash.
  - Step 2. The amount (\$2,400) is entered into the Debit column of Prepaid Insurance and the amount (\$2,400) is entered into the Credit column of Cash.

# Posting Journal Entries to Accounts (6 of 6)

- Step 3. The journal page number (2) is entered in the Posting Reference (Post. Ref.) column of Prepaid Insurance and Cash.
- Step 4. The account numbers (15) and (11) are entered in the Posting Reference (Post. Ref.) column in the journal.

# Transaction—Paid Rent

# Trial Balance (1 of 4)

- The equality of debits and credits in the ledger should be proven at the end of each accounting period by preparing a **trial balance**.

# Trial Balance (2 of 4)

- The steps in preparing a trial balance are as follows:
  - Step 1. List the name of the company, the title of the trial balance, and the date the trial balance is prepared.
  - Step 2. List the accounts from the ledger, and enter their debit or credit balance in the Debit or Credit column of the trial balance.
  - Step 3. Total the Debit and Credit columns of the trial balance.
  - Step 4. Verify that the total of the Debit column equals the total of the Credit column.

# Trial Balance (3 of 4)

- An **unadjusted trial balance** is distinguished from an adjusted trial balance and a post-closing trial balance. (The latter two are prepared in later chapters and include additional information.)

# Trial Balance (4 of 4)

### Steps 3–4

# Errors Affecting the Trial Balance

- A **transposition** occurs when the order of the digits is copied incorrectly, such as writing \$542 as \$452 or \$524.
- In a **slide**, the entire number is copied incorrectly one or more spaces to the right or the left, such as writing \$542.00 as \$54.20 or \$5,420.00.

# Errors Not Affecting the Trial Balance (1 of 3)

- Errors that do not cause the trial balance totals to be unequal may be discovered when preparing the trial balance or may be indicated by an unusual account balance. For example, since a business cannot have “negative” supplies, a credit balance in the supplies account indicates an error has occurred.
- If an error has already been journalized and posted to the ledger, a **correcting journal entry** is normally prepared.

- Assume that on May 5, a \$12,500 purchase of office equipment on account was incorrectly journalized and posted as a debit to Supplies and a credit to Cash for \$12,500.
- The error was discovered on May 31.
- Before making the correcting journal entry, the journal entry that was made in error is compared to the entry that should have been made.
- By comparing these two journal entries, the correcting journal entry can be determined.

Journal Entry That Was Made in Error				Journal Entry That Should Have Been Made			
May 5	<b>Supplies</b>	14	12,500	May 5	<b>Office Equipment</b>	18	12,500
	Cash	11	12,500		Cash	11	12,500
				<b>Comparison</b>			
				<b>Office Equipment instead of Supplies should have been debited.</b>			
				<b>Cash is correctly credited for \$12,500.</b>			
Correcting Journal Entry							
May 31	Office Equipment	18	12,500				
	Supplies	14	12,500				
				To correct entry of May 5 erroneously debiting			
				Supplies instead of Office Equipment.

# Check Up Corner: Trial Balance (2 of 3)

Prepare an unadjusted trial balance, listing the accounts in their normal order.

# Check Up Corner: Trial Balance (3 of 3)

## Solution:

Balances from accounts with a normal debit balance are shown in the left column.

Balances from accounts with a normal credit balance are shown in the right column.

Accounts from the general ledger are presented in the order in which they appear in the ledger.

Simmons Urgent Care Inc. Unadjusted Trial Balance December 31, 20Y7			
	Account No.	Debit Balances	Credit Balances
Cash .....	11	21,000

- In **horizontal analysis**, the amount of each item on a current financial statement is compared with the same item on an earlier statement.
- The increase or decrease in the *amount* of the item is computed together with the *percent* of increase or decrease.
- When two statements are being compared, the earlier statement is used as the base for computing the amount and the percent of change.
