02. Perception of Self and Others

1. We choose to pay attention to information that is relevant to us.

a. True

b. False

ANSWER: True RATIONALE: Correct

We choose to pay attention to information that meets our biological and psychological needs. When you go to class, how well you pay attention usually depends on whether

you believe the information is relevant. See 2-1: The Perception Process The

3. A person's culture has very little influence on his or her self-perception.

a. True

Name: Class:	Date:
--------------	-------

02. Perception of Self and Others

b. False

ANSWER: False RATIONALE: Correct

Cultural norms play a critical role in both self-concept and self-esteem. Two important ways they do so are in terms of independence and masculinity/femininity. See 2-2:

performed exceptionally well in he	candidates for a position in his company, Ben was er aptitude test for the job. During the interview, late made a few mistakes, Ben passed them off. I	Ben saw the candidate in a very

candidate was based on his _____.

Name:	Class:	Date:
nalie.	Class.	Date.

02. Perception of Self and Others

a. patterns

b. interests

c. needs

d. expectations

ANSWER: d

RATIONALE: Correct. In this scenario, Ben's perception of the candidate was based on his

expectations. We cannot focus on everything we see and hear all the time. Hence, we choose what stimuli to concentrate on based on our needs, interests, and expectations. We are likely to see what we expect to see and miss what violates our expectations.

See 2-1: The Perception Process The Perception Process

9. When stimuli are organized by simplicity, _____.

- a. the stimuli we attend to are interpreted as familiar patterns
- b. the brain is involved in conscious processing
- c. the brain is involved in filtering the messages
- d. the stimuli we attend to are organized into a commonly recognized form

ANSWER: d

RATIONALE: Correct. If the stimuli we attend to are complex, the brain simplifies them into some

commonly recognized form. Based on a quick look at what someone is wearing, how she is standing, and the expression on her face, we may perceive her as a business executive, a doctor, or a soccer mom. See 2-1: The Perception Process The Perception

Process

POINTS: 1

- 10. A karate instructor looked at his new batch of students and automatically recognized that there were three girls and six boys. In this case, the karate instructor is involved in the act of:
 - a. organizing the stimuli by simplicity.
 - b. organizing the stimuli by pattern.
 - c. interpreting the stimuli.
 - d. conscious processing.

ANSWER: b

RATIONALE: Correct. In this case, the karate instructor is involved in the act of organizing the

stimuli by pattern. The brain makes sense of complex stimuli by relating them to things it already recognizes. For example, when we see a crowd of people, instead of perceiving each individual, we may focus on sex and "see" men and women or on age and "see" children, teens, and adults. 32. Selective perception

Incorrect

Self-perception

Correct

Situational attribution

Incorrect

Self-disposition

Incorrect

is the overall view we have of ourselves, which includes both self-concept and self-esteem.

- a. Selective perception
- b. Self-perception
- c. Situational attribution
- d. Self-disposition

ANSWER: b

RATIONALE: Self-perception is the overall view we have of ourselves, which includes both self-

concept and self-esteem. Self-concept is the perception we have of our skills, abilities,

knowledge, competencies, and personality traits. See 2-2: Perception of Self

Interdependent self-perceptions

Incorrect

are based on the belief that traits and abilities are internal to the person and are universally applicable to all situations.

- a. Attributions
- b. Independent self-perceptions
- c. Prejudices
- d. Interdependent self-perceptions

ANSWER:

RATIONALE: Independent self-perceptions are based on the belief that traits and abilities are internal

to the person and are universally applicable to all situations. The goal for people with

independent self-perceptions is to demonstrate their abilities, competencies,

characteristics, and personalities during interactions with others. See 2-2: Perception of

02. Perception of Self and Others

36. Illustrate three different ways of improving your perception of others and their messages.

ANSWER:

Answers will vary. You can improve your perceptions by questioning their accuracy. It begins by saying "I know what I think I saw, heard, tasted, smelled, or felt, but I could be wrong. What other information should I be aware of?" By accepting the possibility that you have overlooked something, you will stop automatic processing and begin to consciously search out information that should increase your accuracy.

Choosing to use conscious processing as you get to know people. When you mindfully pay attention to someone, you are more likely to understand that person's uniqueness. Doing so can increase the accuracy of your perceptions.

Seeking more information is vital to verify perceptions. If your perception is based on only one or two pieces of information, try to collect additional information. Perception is tentative, that is, subject to change. The best way to get additional information about people is to talk with them.

Realize that your perceptions of a person will change over time. People often base their opinions, assumptions, and behaviors on perceptions that are outdated. When you encounter someone you haven't seen for a while, let the person's current behavior rather than their past actions or reputation inform your perceptions.

Seeking clarification respectfully by perception checking. One way to access the accuracy of a perception is to verbalize it and see whether others agree with what you see, hear and interpret. A perception check is a message that reflects your understanding of the meaning of another person's behavior. It is a process of describing what you have seen and heard and then asking for feedback from the other

person. A perception check consists of three parts. First, describe what you observe.

Second, offer two possible interpretations. Third, ask for clarification.

38. Discuss the use of conscious processing as a way to get to know people better.

ANSWER: Answers will vary. Conscious processing is a slow, deliberative approach where we

examine and reflect about the stimuli. It is used when we encounter things out of the

realm of our normal experiences or expectations.

Using conscious processing as a way to get to know people helps improve your perception of them and their messages. When you mindfully pay attention to someone,

you are more likely to understand that person's uniqueness.
