Chapter 02 - Describing Data with Numerical Measures

1. Numerical descriptive measures computed from population measurements are called parameters.
   a. True
   b. False

ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

2. Numerical descriptive measures computed from sample measurements are called statistics.
   a. True
   b. False

ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

3. Two classes, one with 15 students and the other with 25 students, took the same test and averaged 85 points and 75 points, respectively. If the two classes were combined, the overall average score of the 40 students would be 80 points.
   a. True
   b. False

ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

4. The population mean, μ, is used to estimate the sample mean, $\bar{x}$.
   a. True
   b. False

ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

5. If the sample mean is much larger than the sample median, the data set is said to be skewed to the right.
   a. True

b. False

ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

6. When data have been grouped (as in a frequency table, a relative frequency histogram, etc.), the class with the highest frequency is called the modal class, and the midpoint of that class is taken to be the mode.

a. True
b. False

ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

7. The mode is generally used to describe large data sets.

a. True
b. False

ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

8. The mode of a data set or a distribution of measurements, if it exists, is unique.

a. True
b. False

ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

9. Mound-shaped data tend to cluster around a middle value.

a. True
b. False

ANSWER: True
POINTS: 1

Chapter 02 - Describing Data with Numerical Measures

QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

10. Jessica has been keeping track of what she spends to eat out. The last week's expenditures for meals eaten out were $15.69, $15.95, $16.19, $20.91, $17.49, $24.53, and $17.66. The mean amount Jessica spends on meals is $18.35.

a. True
b. False

ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

11. A data sample has a mean of 87, and a median of 117. The distribution of the data is skewed to the right.

a. True
b. False

ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 3/18/2019 2:22 AM

12. A student scores 89, 75, 94, and 88 on four exams during the semester and 97 on the final exam. If the final is weighted double and the four others weighted equally, the student's final average would be 90.

a. True
b. False

ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

13. In a mound-shaped distribution, there is no difference in the values of the mean, and median.

a. True
b. False

ANSWER: True
POINTS: 1
QUESTION TYPE: True / False

HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

14. *Measures of center* are values around which observations tend to cluster and that describe the location of what in some sense might be called the "center" of a data set.

a. True
b. False

ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

15. The median is a measure of center that divides an ordered array of data into two halves; if the data are arranged in ascending order from smallest to largest, all the observations below the median are smaller than or equal to it, while all the observations above the median are equal to it or larger.

a. True
b. False

ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

16. The mode is the sum of a data set's minimum and maximum values, divided by 2.

a. True
b. False

ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 3/18/2019 2:23 AM

17. If the variability of a set of data is very small, then the sample variance may be negative.

a. True
b. False

ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False

DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

18. When all the numbers in the data set are the same, the standard deviation must be zero.
    a. True
    b. False
ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 3/18/2019 2:24 AM

19. In all cases, the sum of the deviations of the measurements from their mean is 0.
    a. True
    b. False
ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

20. The sample variance is approximately the average of the squared deviations of the measurements from their mean.
    a. True
    b. False
ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

21. The sample variance calculated with a divisor of n gives a better estimate of the population variance, σ^2, than does the sample variance, s^2, with a divisor of $n - 1$.
    a. True
    b. False
ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 3/18/2019 2:40 AM

22. The larger the values of the sample variance s^2 and sample standard deviation *s*, the greater the variability in the data.

a. True

b. False

ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

23. In order to measure the variability in the same units as the original observations, we compute the sample variance.

a. True

b. False

ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

24. Measures of variability describe typical values in the data.

a. True

b. False

ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

25. The mean is one of the most frequently used measures of variability.

a. True

b. False

ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

26. The range is considered the weakest measure of variability.

a. True

b. False

ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

27. For large data sets, the range is not an adequate measure of variability.
a. True
b. False

ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 3/18/2019 2:31 AM

28. The value of the standard deviation will always exceed that of the variance.
a. True
b. False

ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

29. The standard deviation is expressed in terms of the original units of measurement but the variance is not.
a. True
b. False

ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

30. The value of the standard deviation may be either positive or negative, while the value of the variance will always be positive or zero.
a. True
b. False

ANSWER: False
POINTS: 1

QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

31. The standard deviation is the positive square root of the variance.
    a. True
    b. False
ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

32. A sample of 20 observations has a standard deviation of 4. The sum of the squared deviations from the sample mean is 76.
    a. True
    b. False
ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

33. The value of the mean times the number of observations equals the sum of all of the observations.
    a. True
    b. False
ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

34. In a histogram, the proportion of the total area which must be to the left of the median is less than 0.50 if the distribution is skewed to the left.
    a. True
    b. False
ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False

DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

35. In a histogram, the proportion of the total area which must be to the left of the median is more than 0.50 if the distribution is skewed to the right.

a. True
b. False

ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

36. If two data sets have the same range, the variances in both sets will be the same.

a. True
b. False

ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

37. The sum of the squared deviations from the mean is always zero.

a. True
b. False

ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 3/18/2019 2:35 AM

38. *Measures of variability* are numbers that indicate the spread or scatter of observations; they show the extent to which individual values in a data set differ from one another and, hence, differ from their central location.

a. True
b. False

ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM

39. A parameter and statistic can be used interchangeably.

a. True

b. False

ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

40. The median is one of the most commonly used measures of variability.

a. True

b. False

ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

41. For distributions of data that are skewed to the left or right, the median would likely be the best measure of center.

a. True

b. False

ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 3/18/2019 2:46 AM

42. You are given the data values 5, 10, 15, 20, and 25. If these data were considered to be a population, and you calculated the mean, you would get the same answer as if these data were considered to be a sample from another larger population.

a. True

b. False

ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

43. The value $(n + 1) / 2$ indicates the value of the median in an ordered data set, where n is the number of data values.

a. True
b. False

ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

44. For any distribution, if the mean is equal to the standard deviation, you can infer that the distribution is symmetric.

a. True
b. False

ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

45. A distribution is said to be skewed to the right if the population mean is larger than the sample mean.

a. True
b. False

ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

46. One advantage of using the median as a measure of center is that its value is not affected by extreme values.

a. True
b. False

ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

47. A data set in which the mean and median are equal is said to be bimodal data.

a. True
b. False

ANSWER: False

POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

48. If the mean value of a distribution is 85 and the median is 67, the distribution must be skewed to the right.
    a. True
    b. False
ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

49. One of the advantages of the standard deviation over the variance as a measure of variability is that the standard deviation is measured in the original units.
    a. True
    b. False
ANSWER: True
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

50. For any distribution, the standard deviation is a measure of variability of the data around the median.
    a. True
    b. False
ANSWER: False
POINTS: 1
QUESTION TYPE: True / False
HAS VARIABLES: False
DATE CREATED: 2/4/2019 3:13 AM
DATE MODIFIED: 2/4/2019 3:13 AM

51. Suppose the standard deviation for a given sample is known to be 12. If each data value in the sample is multiplied by 3, the standard deviation will be 36.
    a. True
    b. False
ANSWER: False
POINTS: 1

67. Which of the following represents a disadvantage of using the sample range to measure spread or dispersion?

a. It produces spreads that are too large.
b. The sample range is not measured in the same units as the data.
c. The largest or smallest observation (or both) may be an outlier.
d. All of the above.
e. None of the above.

ANSWER: c

68. The following ten scores were obtained on a 20-point quiz: 4, 5, 8, 9, 11, 13, 15, 18, 18, and 20. The teacher computed the usual descriptive measures of center (central tendency) and variability (dispersion) for these data and then discovered an error was made. One of the 18's should have been a 16. Which one of the following measures, calculated on the corrected data, would change from the original computation?

a. mean and standard deviation
b. mean and median
c. range and median
d. mean and range.
e. mean, standard deviation, range and median

ANSWER: a

86. The following data represent scores on a 15-point aptitude test: 8, 10, 15, 12, 14, and 13.

a. Compute the **sample mean** for the *original* data.

_____

Subtract 5 from every observation and complete the **sample mean** for the *new* data.

_____

b. Compute the **sample variance** for the *original* data. Round your answer to one decimal place.

_____

Subtract 5 from every observation and complete the **sample variance** for the *new* data.

_____

c. What effect, if any, does subtracting 5 from every observation have on the sample mean and sample variance?

_____

ANSWER: 12; 7; 6.8; 6.8; The sample mean is shifted to the left (decreased by 5), but the sample variance remains unchanged.
POINTS: 1

90. Suppose you are given the following set of sample measurements:

–1, 0, 2, 6, 5, 6

a. Calculate the sample mean. Round your answer to one decimal place.

_____

b. Find the median. Round your answer to one decimal place.

_____

c. Find the mode. Round your answer to one decimal place.

_____

d. Calculate the sample variance. Round your answer to one decimal place.

_____

e. Calculate the sample standard deviation. Round your answer to one decimal place.

_____

f. Calculate the range. Round your answer to one decimal place.

_____

g. Is this data symmetric, skewed to the right or skewed to the left?

_____

Justify your answer.

_____

ANSWER:	3; 3.5; 6; 9.6; 3.1; 7; Skewed to the left; The data is skewed to the left since the mean is less than the median.

116. From a sample of size 100, the following descriptive measures were calculated: median = 23, mean = 20, standard deviation = 5, range = 35; seventy-five sample values are between 10 and 30; and ninety-nine sample values are between 5 and 35. If you knew the sample mean, median, and standard deviation were correct, which one of the following conclusions might you draw?

a. The distribution is skewed to the right because the median exceeds the mean.
b. The range must have been calculated incorrectly because it should not be seven times the standard deviation value.
c. The number of sample values between 10 and 30 was miscounted.
d. The number of sample values between 5 and 35 must have been miscounted because all 100 values must be in this interval.
e. All of these.

Chapter 02 - Describing Data with Numerical Measures

DATE MODIFIED: 4/9/2019 7:53 AM

167. A student took a chemistry exam where the exam scores were mound-shaped with a mean score of 90 and a standard deviation of 64. She also took a statistics exam where the scores were mound-shaped, the mean score was 70 and the standard deviation was 16. If the student's grades were 102 on the chemistry exam and 77 on the statistics exam, then:

a. the student did relatively better on the chemistry exam than on the statistics exam, compared to the other students in each class.
b. the student did relatively better on the statistics exam than on the chemistry exam, compared to the other students in the two classes.
c. the student's scores on both exams are comparable, when accounting for the scores of the other students in the two classes.
d. it is impossible to say which of the student's exam scores indicates the better performance.
e. the student did relatively the same on both exams.

180. Attendance at London Symphony concerts for the past two years showed an average of 3,000 people per performance with a standard deviation of 100 people per performance. Attendance at a randomly selected concert was found to be 3,290. If attendance data is mound-shaped, does the attendance at the selected concert appear to be unusual?

_____

Justify your conclusion.

_____

ANSWER: Yes; The z-score associated with 3,290 is 2.90, indicating that 3,290 is 2.90 standard deviations above the mean. Although the z-score does not exceed 3, it is close enough for one to suspect that 3,290 is an outlier.
