MULTIPLE CHOICE BANK

Chapter 2: Strategy, Competitive Forces and Positioning

Below are a number of multiple choice questions relevant to this chapter. There are two to three variations on the same questions. Each question has four options; the correct answer is written in the final column. Some questions are very simple, while others are much more difficult; this should be taken into account when setting quizzes or exams.

Example of possible instruction to students:

For each of the following questions, read each question carefully and then choose the answer you believe is *most* correct:

Question and options	#	Ans.

d.	Differentiation		

Chapter 2 ESSAY QUESTIONS

This section comprises five essay questions. The answers should reflect the students' knowledge of the topic area learned in class, through their readings and through other sources. Good students will demonstrate their ability to reflect on, and critique, key ideas or issues. These questions can be incorporated into a mid-term or end-of-semester exam. Conversely, the questions can be assigned as a take-home essay assignment. The length of the expected answer will vary accordingly, but typically expect 2–3 pages in an exam setting, and request 2,000 words or more in a take-home essay assignment.

- a. Discuss the foundations and developments of the SCP paradigm.
- b. What are the factors that might explain variations in organization performance in an industry?
- c. Describe the role and characteristics of the forces described in Porter's five forces model.
- d. Critically evaluate the value of Porter's generic strategies for understanding strategy.
- e. What are the characteristics of the value chain and how does the chain help us to understand strategy?
