Essay (11)

Q73. [Essay]

What is a crime?

Suggested answer: Sample response: A crime is an action or failure to act that has been defined by the state as a criminal offense that can be punished by penalty. Crimes are generally agreed upon by society, although they can change as social norms change and evolve. There are some crimes that are commonly accepted as wrong or harmful, such as murder. These crimes are seen as unacceptable by most people. Some crimes are those that have been agreed upon by society as unacceptable, such as public indecency.

Q74. [Essay]

What is criminal law?

Suggested answer: Sample response: Criminal law is a set of legal codes that govern behavior and serves as the foundation of the criminal justice system. The law specifies what acts are against the law and what happens when people violate them. Law has to be formalized, rather than a social convention, with a specific definition of what is unacceptable behavior. In the United States, there must be a clear definition so that people can understand what is and is not acceptable. There are set consequences for what happens for people who violate the law.

Q75. [Essay]

What is the difference between criminal law and civil law?

Suggested answer: Sample response: Criminal law protects the public interest, requires a burden of proof beyond a reasonable doubt, and any legal action is brought by a prosecutor. Consequences of criminal law may result in permanent loss of freedom, life, or property. Civil law protects individuals rather than the public interest. Consequences of civil law may result in loss of property, typically in monetary terms.

Q76. [Essay]

What is the purpose of criminal law?

Suggested answer: Sample response: The primary purpose of criminal law is to maintain social order and stability. It ensures that people know that there are certain behaviors that are unacceptable and not tolerated. Society gives up a small amount of freedom in exchange for protection and regulation by the criminal justice system. As a society, we agree to follow the law and understand that there are consequences for actions. Although some crimes are not agreed upon by everyone, as a society we accept them or work to change ones that are unjust.

Q77. [Essay]

What is the difference between substantive criminal law and criminal procedure?

Suggested answer: Sample response: Substantive criminal law answers the question "What law is enforced?" Procedural criminal law, on the other hand, answers the question "How is the law enforced?" Substantive criminal law establishes the definitions of concepts and principles that apply to all crimes. These include criminal act (actus reus), criminal intent (mens rea), concurrence of actus reus and mens rea, causation, responsibility, and defenses. Procedural criminal law sets the legal standards that govern detection, investigation, and prosecution of crimes. It dictates what is and is not permissible when dealing with the criminal justice system without infringing on the constitutional rights of individuals.

Q78. [Essay]

How can having a felony conviction impact someone's future?

Suggested answer: Sample response: A felony can be punished by at least one year in prison and, for the most serious felonies, death or life in prison without parole. Even after the person is released, they can be prevented from having some jobs, being a member of the armed forces or becoming a police officer, adopting a baby, or getting government assistance. In some states, felons are not allowed to vote, although this is changing.

Q79. [Essay]

Why is the Model Penal Code significant?

Suggested answer: Sample response: The Model Penal Code (MPC) provides a standardized foundation for states when codifying criminal acts. The American Law Institute worked to develop the MPC based on the belief that justice should not depend on the state where the individual lives. Around 37 states have adopted the majority of the MPC, but no state has adopted the MPC as a whole. The MPC also establishes uniform definitions of concepts that may differ from state to state so that there is uniformity in laws at the state level.

Q80. [Essay]

Professors Jerome Hall and Wayne R. LaFare identify the basic principles that comprise the general part of criminal law. List and describe these parts of criminal law and explain their importance.

Suggested answer: Sample response: An individual must commit a criminal act (*actus reus*) and concurrently possess a criminal intent (*mens rea*) to specifically commit that crime. Typically, these two are required to occur at the same time because having the intent to commit a crime without actually committing a crime cannot be justifiably punished. Likewise, committing a crime without any intention of committing that crime may also pose problems in prosecution. For instance, an individual holding the jacket of a friend who is participating in an illegal fight may not be liable as an accomplice simply by providing slight assistance because there might not be specific intent to assist. There is also the concept of causation wherein the criminal act must have directly caused the harm to the victim. It is unjust to punish a would-be murderer for the death of another when the victim died from an unforeseeable lightning storm. Furthermore, while ignorance of the law is not a defense, society must be able to access statutes where criminal acts and intents are clearly stated so individuals may choose to either follow or violate the law. Finally, defenses are the justifications and excuses for committing an act that is typically considered a crime. It is important to differentiate between truly criminal acts and acts that are committed in self-defense, for instance.

Q81. [Essay]

Describe the origins and development of the English common law and its eventual transportation to the American colonies.

Suggested answer: Sample response: English common law is the foundation of criminal law in the United States. Common law began its development in 1066 when William the Conqueror sent judges throughout England to settle disputes in a uniform manner. These standards were written down so that they could be used to guide the decisions of courts in the future. The majority of common law was created based on the rulings of judges in actual court cases. The king and parliament were able to fill gaps in the law by establishing additional laws. Crimes such as murder and arson were established under common law. When the colonists came to North America, they brought English common law with them. All states accepted the common law following the Revolutionary War, and all states except for Louisiana recognized English common law before they joined the union. Louisiana ultimately accepted common law a few years later.

Q82. [Essay]

Explain why the U.S. Constitution states that federal laws may not encroach upon state powers.

Suggested answer: Sample response: The federal criminal code includes laws that were adopted by Congress. Dual sovereignty allows both the state and federal government to prosecute an individual for the same crimes without violating the protection against double jeopardy. The supremacy clause establishes that federal laws are considered superior to state laws when the law concerns preserving the national government. The preemption doctrine means that federal law can preempt state law when there is disagreement. However, there are limits, as the framers of the Constitution wanted to ensure that the federal government was not given too much power. Therefore, it is unconstitutional for the federal law to encroach on areas of law that should be left to the state government. For instance, the interstate commerce clause allows the federal government to regulate and punish the movement of stolen goods across state lines. This makes sense as no state would have jurisdiction in the movement of stolen goods. The Supreme Court limits the power of the federal government to those times when states cannot regulate behavior. If a state can make a decision about actions within its borders, the federal government has limited power to intervene. For example, the federal government cannot prevent Oregon physicians from providing lethal medication under the state's Death with Dignity Act. That is the responsibility of the state, and the federal government cannot infringe.

Q83. [Essay]

Discuss the limitations that the U.S. Constitution places on criminal law.

Suggested answer: Sample response: A state or local law may not regulate an area that is reserved for the federal government. For instance, free speech is protected by federal law. A state cannot decide that people in that state will no longer be allowed to peacefully protest. However, a law may infringe upon civil and political rights in compelling circumstances. Post 9/11, the government required citizens to give up some of their privacy in the interest of protecting citizens from terrorism. Furthermore, a law must be clearly written, and citizens and police must be given notice. If a state wants to make texting while driving illegal, they need to notify citizens of this change and the police need to know what acts they can regulate and what response (ticket, arrest, etc.) is expected. Additionally, a law must not impose cruel and unusual punishment, nor may it be retroactive. If a law is made outlawing the use of hoverboards in public, law enforcement cannot punish someone who used a hoverboard in public before the law was enacted. Moreover, they cannot punish the public use of hoverboards with 10 years in prison because this is disproportionately harsh.

Essay (3)

Q98. [Essay]

List the eight classification categories of crime according to their subject matter. Provide an example of each.

Suggested answer: Sample response: The eight classification categories of crime are (1) crimes against the state, such as treason and sedition, which are considered the most serious crimes; (2) crimes against the person, homicide, which involves cases where one person causes the death of another; (3) crimes against the person, sexual offenses and other crimes (some people consider robbery a crime against the person but others argue that it is a crime against property); (4) crimes against habitation, such as arson; (5) crimes against property, such as burglary and theft; (6) crimes against public order, such as disorderly conduct; (7) crimes against the administration of justice, which occur when someone interferes with the justice system such as obstruction of justice; and (8) crimes against public morals, such as obscenity.

Q99. [Essay]

What is the difference between mala in se and mala prohibita crimes? Provide one example for each.

Suggested answer: Sample response: Mala in se crimes are considered to be inherently evil and would be condemned by society even without any legislative policies that prohibit them. Homicide is a mala in se crime. Historically, societies have agreed that homicide is not acceptable because it is inherently wrong to take the life of another. Mala prohibita crimes are those crimes that are not necessarily considered inherently evil but are still punishable because a statute prohibits it. Drug crimes are mala prohibita. The difference between illegal drugs and legal prescription drugs is the law that makes one legal and the other illegal. Many people argue that alcohol and prescription opioids do more harm than drugs that are illegal.

Q100. [Essay]

What is dual sovereignty? How can a defendant be prosecuted for the same act at both the state and federal levels? Use the Rodney King case to develop support for your answer.

Suggested answer: Sample response: Dual sovereignty is the sharing of power between state and federal governments; however, a preemption doctrine exists whereby federal criminal laws are constitutionally superior to state laws. A defendant can be prosecuted for the same act at both the state and federal levels if the criminal charges slightly differ. Four LA police officers beat Rodney King, breaking his leg and causing other injuries. This incident was videotaped and broadcast around nationally. The LAPD officers were charged with assault and excessive force in state court. They were acquitted of charges except for one charge of an officer that resulted in a hung jury. Many people felt that this was unjust and due in part to racism. This led to riots in LA. The federal government was able to bring charges against officers for violating King's civil rights by willfully using excessive force. This may appear to violate the protection against double jeopardy; however, this protection specifies that a person cannot be tried for the same crime twice in the same court. The officers were charged with different crimes in state and federal court, and this is permissible. The federal government can act to ensure that people are treated fairly and are afforded the rights that they are granted in the Constitution. The federal government has the power and the responsibility to ensure that individual rights are protected.
